## EVENT REPORT

Event- Annual Evolvere Fest 2021 with an International Webinar on “Recent Methodologies towards using a Consortium of Soil Bacteria to biodegrade PET Plastic.”

Date- 29th October 2021

Timings- 5:00 pm - 7:50 pm

Mode- Online

Venue- Zoom Platform

Objective-The objective of this Annual Fest was to organize a fun and informative fusion of learning. By organising modern day concerned activities such as ‘Best out of Waste’ and including a **webinar related to the theme (Biodegradable plastic through soil bacteria) the main motive was to enlighten attendees with an interactive event that combined both creative and intellectual minds.**

**Evolvere, the Zoological Society** of Sri Venkateswara College, University of Delhi hosted their **Annual Fest** on 29th October 2021. Along with various interactive activities, the society also organised an international webinar on ‘Recent Methodologies towards using a Consortium of Soil Bacteria to biodegrade PET Plastic.’ given by Prof. Jay Mellies. The activities and the webinar were hosted through the online mode on Zoom Platform.

The Annual Fest began at 5:00 pm with the display of the entries received in the photography and the ‘best out of waste’ competition. Following which the final round - Rapid Fire round - of the quiz competition was conducted. Announcements of the competitions were declared, following which at 6:30 pm an international webinar titled ‘Recent Methodologies towards using a Consortium of Soil Bacteria to biodegrade PET Plastic.’ given by **Prof. Jay Mellies from the Department of Biology, Reed College, Oregon, USA**. The talk lasted an hour followed by a Q/A session and the event concluded at 7:50 pm.

Prof. Jay Mellies’ talk focused on applying a consortium of soil bacteria to help aid in the biodegradation of PET Plastic.

The webinar imparted a useful insight in the recent research of biodegradable plastic. It showcased areas that were still under research and required further studies whilst providing hope to the audience. Hope came from the aspect of the information that plastic can be degraded to an extent. Overall, the talk uplifted both the intellectual aspect of the mind and the social aspect. It proved that research in the area could be fruitful as it could help curb the plastic pollution problem in the future. His talk ended with a question answer session, making the event interactive and inquisitive. The collected feedback was highly positive and encouraging.
