BRIEF INFORMATION ABOUT THE ACTIVITY

TOPIC/SUBJECT OF THE ACTIVITY	"A Skill Enhancement Workshop on Sericulture: A Promising Self Employment Avenue"
--------------------------------------	---

OBJECTIVES	The main objective of this webinar was to give the students an exposure to Sericulture that plays important roles in employment generation and poverty alleviation. This webinar helped the students to understand the large demand of handwoven silk in the world and the scope for the establishment of large production units. The explanation of diseases of Muga silkworm and their management were also taken into consideration. Skill Development Initiatives for Entrepreneurs in Sericulture were also discussed.
METHODOLOGY	An online lecture was delivered by Dr.Subadas Singh, Scientist, Central Muga Eri Research & Training Institute, Central Silk Board , Ministry of Textiles, GOI. The event was successfully conducted through interactive slides, lectures, virtual tour of sericulture facilities and questionnaire sessions at last.
INVITED SPEAKERS WITH AFFILIATION DETAILS (IF ANY)	Dr. Subadas Singh , Scientist, Central Muga Eri Research and Training Institute, Central Silk Board, Ministry of Textiles, GoI
OUTCOMES	The lecture delivered by Dr. Subadas Singh imparted the students with an in-depth knowledge of the field of Sericulture <ul style="list-style-type: none"> ● An overview of Eri silk industry and the uniqueness of muga silk as the golden species is the pride of India. ● Students become aware about the need for the conservation of important Biodiversity of North-East India. ● The way in which Ericulture provides a sustainable livelihood venture to the people. ● Types of disease of Muga silkworm, symptoms, diagnosis, and their management. ● Natural dying of Eri yarn and it's reach to global market. Moreover students got to know about the trainings programs for farmers, students, NGOs and the state sericulture officers.

ACTIVITY REPORT

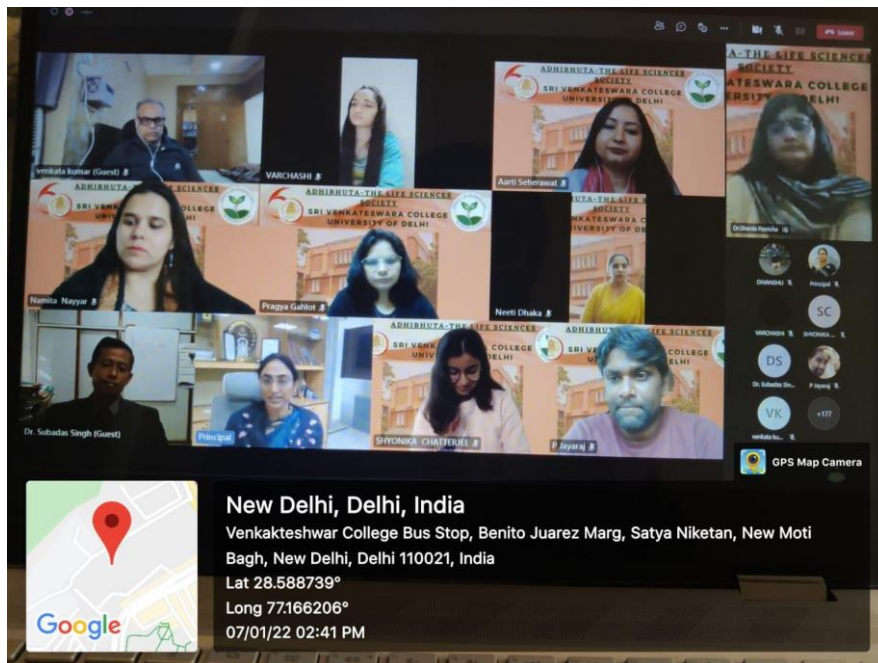

Adhibhuta-the life sciences society of Sri Venkateswara College organised a skill enhancement workshop on "Sericulture- a promising self employment Avenue" on 7th January 2022. Dr. Subadas Singh, scientist, Central Muga Eri Research and training institute was the speaker of this online workshop. The event commenced with Saraswati Vandana followed by the introductory remarks of Dr. Sharda Pasricha, Coordinator Life Sciences, who mentioned how India is the 2nd largest producer of silk and how silk production generates employment. Following a brief introduction regarding the purpose of the workshop, our principal Prof. C. Sheela Reddy also mentioned the importance of this workshop and how it will help students " think outside the box". This was followed by Dr. Venkata Kumar introducing the speaker and his interest in the research field of applied entomology and radiation biology. Dr. Singh started the workshop by discussing Sericulture as a cottage industry which plays an important role in employment generation and poverty alienation. He also highlighted the factors that makes Sericulture so unique like, low investment and high return, vibrancy to rural economy and equity distribution and how it favours ecology and environment. Sericulture is one of the most profitable activities in the rural sector because of the availability of indigenous technology at low cost, regular and quick returns and large demand and popularity of hand woven silk.He explained the types of silkworms in North Eastern states of India- Muga, Tasar, Eri and Mulberry. He also explained the life cycle and management of these silkworms and the process of production of each type of silk. After discussing the types of pests that infest silks he also mentioned that rearing of poor quality seed, poor quality foliage, unhygienic rearing, high temperature or pH can also lead to diseases.

After providing special attention to the career opportunities provided by sericulture, the floor was opened for the attendees to ask their questions and doubts for the Q&A session which was chaired by Dr. Aarti Seherawat and Dr. Namita Nayyar. Several doubts regarding the maintenance of silk, it's rearing and economical prospects were cleared by Dr. Singh. The workshop concluded with the Vote of Thanks presented by Dr Namita Nayyar, thanking all esteemed guests, faculty members and participants of the event.

Principal welcoming the speaker for the workshop

Plant taxonomy of Castor (*Ricinus communis*)

Kingdom: Plantae - Plants

Subkingdom: Tracheobionta

Superdivision: Spermatophyta - Seed plants

Division: Magnoliophyta - Flowering plants

Class: Magnoliopsida – Dicotyledons

Order: Euphorbiales

Family: Euphorbiaceae

Genus: *Ricinus* L.

Species: *Ricinus communis* L.

Propagation: Sexual methods i.e., seeds
Spacing: 90-120 x 40-60

E CERTIFICATE FOR ALL PARTICIPANTS

By Dr. Subadas Singh
Scientist, Central Muga Eri Research & Training Institute, Central Silk Board , Ministry of Textiles, GOI.

With his keen interest in the research field of Applied Entomology and Radiation Biology , he has vast knowledge on application of radiations to many insect-pests controlling applications. He has also worked in DPPQS, Faridabad, Ministry of Agriculture, GOI as Research Associate in Entomology to undertake Pest Risk Analysis for import and export of agriculture consignments among the countries.
