BRIEF INFORMATION ABOUT THE ACTIVITY

TOPIC/SUBJECT OF THE ACTIVITY	"A WEBINAR ON ECOSYSTEM, PEOPLE AND CONSERVATION"
--------------------------------------	----------------------------------------------------------

OBJECTIVES	<p>The main objective of this webinar was</p> <ol style="list-style-type: none"> 1. To enrich students on ecosystem and its conservation 2. To inculcate awareness about the rich diversity of medicinal plants in India. 3. This webinar helped the students to understand about important sacred groves and role of tribals in conservation. 4. Awareness generation among the participants about the importance of biodiversity, its loss patterns and human dependence.
METHODOLOGY	<p>An online webinar was delivered by Shri Abhilash Damodaran, Indian Forest Service (Lecturer), Central Academy for State Forest Service, Dehradun. The event was successfully conducted through interactive slides, lecture and questionnaire session at last.</p>
INVITED SPEAKERS WITH AFFILIATION DETAILS (IF ANY)	<p>Shri Abhilash Damodaran, Indian Forest Service (Lecturer), Central Academy for State Forest Service, Dehradun.</p>
OUTCOMES	<p>The lecture delivered by Shri Abhilash Damodaran imparted the students with an in-depth knowledge in the field of Ecosystem, Biodiversity Hotspots, Biogeographic zones, endangered and endemic species of medicinal plants of India and their conservation.</p> <p>The participants understood the importance of sustainable utilization of species to maintain ecological processes and maintain the life supporting systems. Students became aware of the importance of sacred groves in maintaining ecosystem services and sharing benefits to tribals. An additional practice of protecting and preserving the plant wealth; variety of species, habitats, ecosystem and genetic diversity were sensitized. Along with India's role, achievements in biodiversity conservation and its way forward were also learnt by the participants.</p>

ACTIVITY REPORT

Aazadi ka Amrit Mahotsav Society and the Department of Botany, Sri Venkateswara College organized a webinar on “Ecosystem, People and Conservation” on 5th March 2022 via virtual platform on Google Meet and was attended by nearly 70 participants.

Shri Abhilash Damodaran, Indian Forest Service (lecturer), Central Academy for State Forest Service, Dehradun was the speaker of this online webinar. The event commenced with the coordinator, Dr. Ram Kishore Yadav extending a warm welcome of the speaker, followed by Saraswati Vandana by Aditya Raj Jha, student of Botany (H). This was followed by the introductory remarks of Dr. S Venkat Kumar, Vice principal of the college, who introduced the topic of the webinar by focusing on the need of conserving the environment and sustainable development.

He started his lecture by reminding us about how humans are playing god and are driving benefits from the flora and fauna all over the country. He mentioned many examples from all biogeographic zones from the Western Ghats, deserts, or the Trans Himalayan region. He discussed about the recorded forest area and the 16 different types of forests which represent India's ecosystem diversity. He mentioned the biodiversity hotspots which are facing eminent threats. He also discussed about the sacred groves in our country out of which only 20 % have been documented. He later mentioned that in solving all the environmental problems, medicinal plants often get overlooked. Mentioned wild species of onion, Ayurvedic ashwagandha, cup fungi, and many more. He emphasized on the agricultural crisis in the present scenario, and how it could affect us all and how we should give equal importance to the traditional evolved lifestyle. For this he even gave an example of sustainable life of Van Gujjars and their mud houses.

He explained all instances of how our environment is suffering and we should be conserving agrobiodiversity for sustainable development. We all were also told about ethnobotany, medicinal values of plants, intellectual property, knowledge management, access and benefit sharing . He also told us about the legal procedures and various acts in our country. He ended his lecture by telling us to encourage diversification of foods and how it could be better both for the plant and for the one taking care of it.

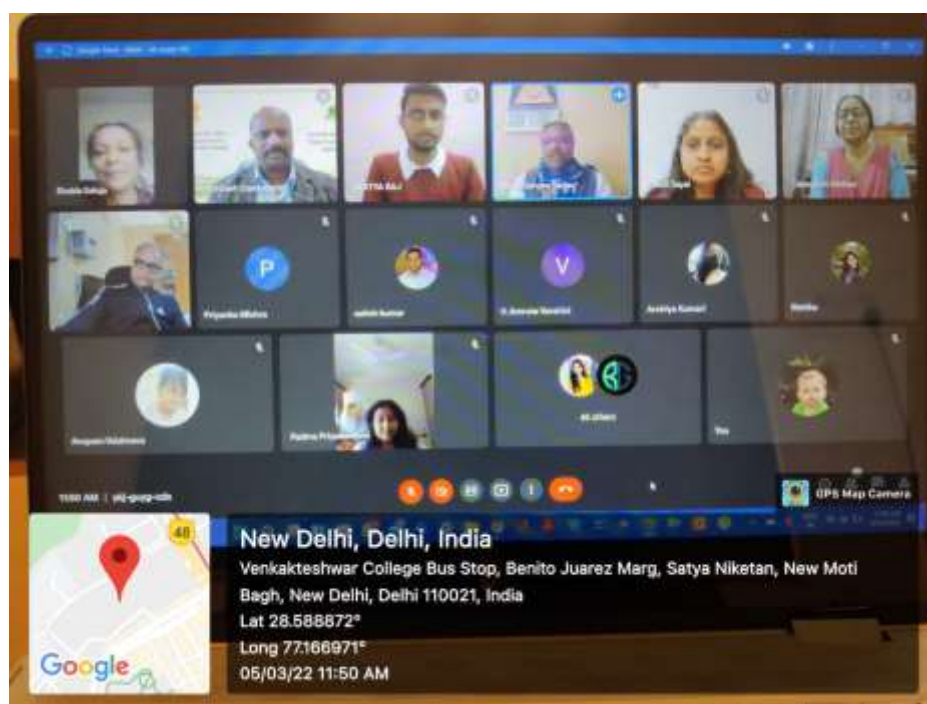

After the webinar the floor was opened for discussion between participants and the speaker, the session was chaired by Dr. Pamil Tayal, and she took all the questions posted on the chatbox. Our speaker answered all the queries in a very enthusiastic and enthralling manner. Discussion

ended up inspiring a lot of young minds to take up several sustainable practices to help curate better tomorrow.

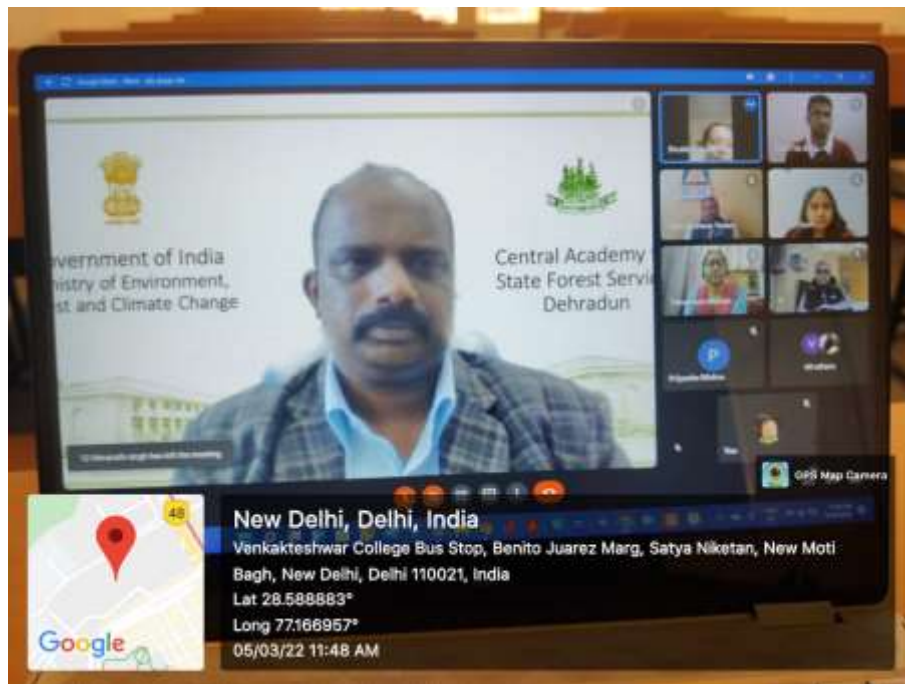

The webinar was concluded with the Vote of thanks by Dr. Tabassum Afshan, thanking all the esteemed guests , faculty members and participants of the event.
