### BRIEF INFORMATION ABOUT THE ACTIVITY (CRITERION NO. – II/V/VII):

|                               |   |
|-------------------------------|---|
| TOPIC/SUBJECT OF THE ACTIVITY | Visit to Sanjay Van Biodiversity Park.  |
| OBJECTIVES                    | <ul style="list-style-type: none"> <li>The primary objective of the visit was to create general awareness about the forest, the flora and fauna in. These visits help us to understand how to protect, preserve and propagate forest, wildlife and environment.</li> </ul>  |
| METHODOLOGY                   | <ul style="list-style-type: none"> <li>Different type of plant and animal species found there so students capture pictures of different animals and plants.</li> <li>Students collected the pond water sample to observe the microorganisms.</li> </ul>   |
| OUTCOMES                      | <ul style="list-style-type: none"> <li>This visit created a curiosity and awareness among them to explore biodiversity and students learned about the basic concepts of biodiversity and characteristic features and identified various species. Students realised that how once the most attractive plant like <i>Prosopis</i> turned out to be a threat to biodiversity, by decreasing the water table, due to its vigorously spreading root system. So students got an insight that before implementing or adopting something, one should do a through research upon it , else it may cause damage to biodiversity.</li> </ul> |
