Why Research Ethics and Integrity is Important?

- It is a reflection of respect for those who 'take part' in research
- It ensures no unreasonable, unsafe or thoughtless demands are made by researchers
- It ensures sufficient knowledge is shared by all concerned
- It imposes a common standard in all the above respects
- It has become the norm as an expectation for research activity

What is Research?

"A process of investigation leading to new insights, effectively shared."

The Research Excellence Framework, 2014

A systematic process of collection and analysing information in order to increase understanding of phenomenon with which we are concerned or interested.

Re-Search, is the re-investigation of available study to form a new way or new idea backed by the previous material or studies available

Dr. Priya Rai, was talking about the Ethics, Integrity and Philosophy of Research.

Some examples of Ethics, Integrity and Philosophy of Research

Analytical Framework For Evaluating Research

Three Ethical Principles (Belmont Report)

Respect For Persons
Protecting the *autonomy* of all people and treating them with courtesy and respect and allowing for informed consent. Researchers must be truthful and conduct no deception

Beneficence
The philosophy of *"do no harm"* while maximizing benefits for the research project and minimizing risks to the research subjects

Justice
ensuring reasonable, non-exploitative, and well-considered procedures are administered fairly—the fair distribution of costs and benefits to potential research participants—and equally

Principles Governing Research at Higher Education

RESPECT FOR ANONYMITY AND CONFIDENTIALITY
This principle of respect underpins core practices including informed consent, protection of vulnerable participants' rights to privacy, anonymity and confidentiality

BENEFICENCE-TO DO SOME GOOD
"The principle of beneficence includes the professional mandate to do effective and significant research so as to better serve and promote the welfare of our constituents".

NON-MALEFICENCE - TO DO NO HARM
"The research not purposely cause harm". The two aspects of beneficence require that what is being researched and how the research is being conducted are both beneficial.

STRATEGIC SCHOLARLY PUBLISHING

THINK

OBJECTIVES

- To create awareness about responsible conduct of research, thesis, dissertation, promotion of academic integrity and prevention of misconduct including plagiarism in academic writing among student, faculty, researcher and staff.
- To establish institutional mechanism through education and training to facilitate responsible conduct of research, thesis, dissertation, promotion of academic integrity and deterrence from plagiarism.
- To develop systems to detect plagiarism and to set up mechanisms to prevent plagiarism and punish a student, faculty, researcher or staff of HEI committing the act of plagiarism.

WHAT IS PLAGIARISM?

How it Occurs?

Section 20 UGC Regulations:
"Plagiarism" means the practice of taking someone else's work or idea and passing them as one's own.

University Grants Commission (President) Academic Integrity and Prevention of Plagiarism in Higher Educational Institutions, Regulations, 2014

If I would not mention where the definition came, I am guilty of Plagiarism.

The act of presenting others academic work or ideas including all the published and unpublished materials as your own without the consent of original writer by incorporating into the body of your work both in print and electronic without acknowledgement.

According to Oxford English Dictionary
The work plagiarism is "The wrongful appropriation or purloining and publication as one's own, of the ideas, or the expression of the ideas of another."

Don't do it, it's plagiarism. It's cheating.

Go ahead and use it, no one will know.

UGC's Public Notice on Self Plagiarism

To in line with global standards of ethical publishing established by leading institutions and Committee on Publication Ethics (COPE), the UGC draws the attention of the academic community to the following:

(i) Reproduction, in part or whole, of one's own previously published work without adequate citation and proper acknowledgment and claiming the most recent work as new and original for any academic advantage amounts to 'text-recycling' (also known as 'self-plagiarism') and is not acceptable.

SELF-PLAGIARISM

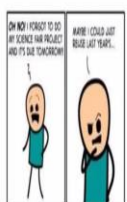

CAN U PLAGIARIZE YOUR OWN WORK?

Self-plagiarism occurs when an author reuses whole or portions of their previous writings text or data without citation in subsequent research papers.

Or Self-plagiarism is the act of presenting a previously submitted work or large chunks of a previously submitted work as completely brand new.

The commonly issues in Self-Plagiarism are:

- Duplication Publication
- Redundant Publication
- Augmented Publication
- Segmented Publication & Fragmented Publication

Salami Publication:

Also referred to as "**salami slicing**", is a variant of the smallest-publishable-unit strategy.

In salami publishing, data gathered by one research project is separately reported (wholly or in part) in multiple end publications.

Salami publishing, apparently named by analogy with the thin slices made from a larger **salami** sausage, is generally considered questionable when not explicitly labeled, as it may lead to the same data being counted multiple times as apparently independent results in aggregate studies
