

SRI VENKATESWARA COLLEGE

2019-20

ODD SEMESTER

TEACHING PLANS

Department of Mathematics

Sri Venkateswara College

Odd Semester Teaching Plan (July-November 2019)

Ms. Shakuntla Wadhwa

| Month | | Topics | Course | Paper Code/Name |
|--------|------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|-------------------|
| July | Theory | Polynomials, the remainder and factor theorem, synthetic division | B.Sc(H)Maths Sem-I A | BMATH102/Algebra |
| | Practical | NA | | |
| | Tutorial | To discuss the doubts of students related to topics covered in the class. | | |
| | Practical | Introduction to Mathematica and Calculus Practical. (1) Plotting of graphs of function of type (greatest integer function)... (even and odd positive integer), (even and odd positive integer), (a positive integer) , Discuss the effect of and on the graph and to solve different Questions. | | BMATH101/Calculus |
| August | Theory | Fundamental theorem of Algebra, Relation between roots and coefficients, of polynomial equations, Theorems on imaginary, integral and rational roots, Polar representation of complex numbers, De Moivre's theorem, nth roots of unity, Equivalence relations, functions, composition of functions | B.Sc(H)Maths Sem-I A | BMATH102/Algebra |
| | Practical | NA | | |
| | Tutorial | To discuss the doubts of students related to topics covered in the class | | |
| | Practical | 2) Plotting the graphs of polynomials of degree 4 and 5 and their first and second derivatives and analysis of these graphs. 3) Sketching parametric curves 4) Tracing of conics in Cartesian coordinates. | | BMATH101/Calculus |

| | | | | |
|-----------|----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|-------------------|
| September | Theory | Invertibility and inverse of functions, one to one correspondence and cardinality of set, well ordering principle, the division algorithm in \mathbb{Z} , Divisibility and Euclidean Algorithm, Fundamental theorem of arithmetic, Modular arithmetic and basic properties of congruence, Principle of Mathematical Induction | B.Sc(H)Maths Sem-I A | BMATH102/Algebra |
| | Practical | NA | | |
| | Tutorial | To discuss the doubts of students related to topics covered in the class | | |
| | Assignment | Plan to give an assignment related to the syllabus | | |
| | Practical | (5). Obtaining surface of revolution of curves. (6). Sketching ellipsoid, hyperboloid of one and two sheets, elliptic cone, elliptic paraboloid, hyperbolic paraboloid using Cartesian co-ordinates. (7). To find numbers between two real numbers and plotting of finite and infinite subset of \mathbb{R} and to solve different Questions | | BMATH101/Calculus |
| October | Theory | System of Linear equations, Row reduction and echelon forms, Vector equations, the matrix equation $Ax = b$, solution sets of linear systems, applications of linear systems, linear independence. Introduction to linear transformations, Matrix of a linear transformation, inverse of a matrix, characterizations of invertible matrices | B.Sc(H)Maths Sem-I A | BMATH102/Algebra |
| | Practicals | NA | | |
| | Tutorials | To discuss the doubts of students related to topics covered in the class | | |
| | Internal test | To conduct an internal test based on topics covered in the class. | | |

| | | | | |
|----------|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|--------------------|
| | Practicals | 8) Computation of limit, Differentiation, Integration and sketching of vector valued functions 9) Matrix operations: addition, multiplication, inverse, transpose, determinant, rank, Eigenvalues, eigenvectors, characteristic equation, and verification of Cayley Hamilton theorem | B.Sc(H)Maths Sem-I A | BMATH101/ Calculus |
| November | Theory: | Subspaces of R^n , dimension of subspaces of R^n and rank of a matrix, Eigen values, Eigen vectors, and Characteristic Equation of a matrix. | B.Sc(H)Maths Sem-I A | BMATH102/Algebra |
| | Practicals: | NA | | |
| | Tutorials: | To discuss the doubts of students and to solve various exercises of Vector equations, the matrix equation $Ax = b$, solution sets of linear systems, applications of linear systems, linear independence. Introduction to linear transformations, Matrix of a linear transformation, inverse of a matrix, characterizations of invertible | | |
| | Practicals | (11).Complex numbers and their representations, operations like addition, multiplication, division, modulus. Graphical representation of polar form. To take internal LabTest | B.Sc(H)Maths Sem-I | BMATH101/Calculus |

| Month | | Topics | Course | Paper |
|-----------|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------|-------------------------------------|
| JULY | Theory | Limits of Functions | B.Sc.(Hons) Maths Sem III B | C5 : Theory of |
| | Practicals | Making basic programs in C++, compilation and execution. | B.Sc.(Hons) Maths Sem-V | DSE 1: C++ programming |
| | Tutorials | Questions based on Limits of Functions | B.Sc.(Hons) Maths Sem III B | C5 : Theory of Real Functions |
| AUGUST | Theory | Limits of Functions (contd.) | B.Sc.(Hons) Maths Sem III B | C5 : Theory of Real Functions |
| | Practicals | 1. Calculate the Sum of the series $1/1 + 1/2 + 1/3 + \dots + 1/N$ for any positive integer N. 2. Write a user defined function to find the absolute value of an integer. 3. Calculate the factorial of any natural number. 4. Read floating numbers and the average of negative numbers and the average of positive numbers. 5. Write a program that prompts the user to input a positive integer. It should then output a message indicating whether the number is a prime number. 6. Write a program that prompts the user to input the value of a, b and c involved in the equation $ax^2 + bx + c = 0$ and outputs the type of the roots of the equation. | B.Sc.(Hons) Maths Sem-V | DSE 1: C++ programming |
| | Tutorials | Questions based on Limits of Functions | B.Sc.(Hons) Maths Sem III B | C5 : Theory of Real Functions |
| SEPTEMBER | Theory | Continuous Functions, Uniform Continuity | B.Sc.(Hons) Maths Sem III B | C5 : Theory of Real Functions |

| | | | | |
|--|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------|----------------------------------------------|
| | Practicals | <p>7. Write a program that generates Fibonacci numbers.</p> <p>8. Write a program that prompts the user to input five decimal numbers, converts each decimal number to the nearest integer, prints the sum and average of them.</p> <p>9. Write a program that uses <i>while</i> loops to prompt the user to input two integer, output all odd and even numbers between them, output the sum of all even numbers between them, output the sum of the square of the odd numbers between them.</p> <p>10. Write a program that prompts the user to input five decimal numbers. then add them. convert</p> | <p>B.Sc.(Hons) Maths Sem-V</p> | DSE 1: C++ programming |
| | Tutorials | <p>Questions based on</p> <p>Continuous Functions & Uniform Continuity</p> | <p>B.Sc.(Hons) Maths Sem III B</p> | <p>C5 : Theory of Real Functions</p> |
| | <u>Assignment</u> | <p>Based on Limits, Continuity & Uniform Continuity of Functions</p> | <p>B.Sc.(Hons) Maths Sem III B</p> | <p>C5 : Theory of Real Functions</p> |

| | | | | |
|---------|-------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------|-------------------------------|
| OCTOBER | Theory | Differentiability of Functions, Mean Value Theorems, Taylor's Theorems, Maxima & Minima | <p>B.Sc.(Hons) Maths Sem III B</p> | C5 : Theory of Real Functions |
| | Practicals | <p>13. Write a function that takes as a parameter an integer and returns the number of odd, even, and zero digits.</p> <p>14. Enter 100 integers into an array and sort them in an ascending/ descending order and print the largest/ smallest integers.</p> <p>15. Enter 10 integers into an array and then search for a particular integer in the array.</p> <p>16. Multiplication/ Addition of two</p> | <p>B.Sc.(Hons) Maths Sem-V</p> | DSE 1: C++ programming |

| | | | | |
|----------|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------|-------------------------------|
| | Tutorials | Questions based on Differentiability of Functions, Mean Value Theorems, Taylor's Theorems, Maxima & Minima | B.Sc.(Hons) Maths Sem III B | C5 : Theory of Real Functions |
| | <u>Test</u> | Based on whatever have been taught at that point of time. (Oct. 2019) | B.Sc.(Hons) Maths Sem III B | C5 : Theory of Real Functions |
| NOVEMBER | Theory | Taylor's Series & Maclaurin's Series Expansions | B.Sc.(Hons) Maths Sem III B | C5 : Theory of Real Functions |
| | Practicals | 19. Write a program to create the grids using for loops: 20. Write a function that takes an integer as a parameter and returns the number with its digits reversed. | B.Sc.(Hons) Maths Sem-V | DSE 1: C++ programming |
| | Tutorials | Questions based on Taylor's Series & Maclaurin's Series Expansions | B.Sc.(Hons) Maths | C5 : Theory of Real Functions |

Dr. Mainak Mukherjee

| Month | | Topics | Course | Paper Code/Name |
|---------|---------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|-------------------------|
| JULY | Theory | Metric spaces: definition and examples. Sequences in metric spaces. | B.Sc(H) MathsSem-V | C 11- Metric Spaces |
| | Practicals | NA | | |
| | Tutorials | To discuss the doubt of students and various exercise questions and examples related to Metric spaces: definition and examples. Sequences in metric spaces. | | |
| | Practicals | Making basic programs in C++, compilation and execution. | B.Sc.(H) Maths Sem-V DSE-I | C++ programming |
| | | Introduction to Latex and HTML And discuss related software and Practicals. | B.Sc(H) Maths Sem-III B | SEC-I LATEX AND HTML |
| AUGUEST | Theory: | Cauchy sequences, Complete Metric Spaces, Open and closed balls, neighbourhood, open set, interior of a set, Limit point of a set, closed set, diameter of a set, Cantor's Theorem. | B.Sc(H) MathsSem-V | C 11- Metric Spaces |
| | Practicals | NA | | |
| | : Tutorials: | To discuss the doubt of students and various exercise questions and examples related to Cauchy sequences, Complete Metric Spaces, Open and closed balls, neighbourhood, open set, interior of a set, Limit point of a set, closed set, diameter of a set, Cantor's Theorem. | | |
| | | | | |

| | | | |
|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|----------------------|
| Practicals | <p>1. Calculate the Sum of the series $1/1 + 1/2 + 1/3 + \dots + 1/N$ for any positive integer N.</p> <p>2. Write a user defined function to find the absolute value of an integer.</p> <p>3. Calculate the factorial of any natural number.</p> <p>4. Read floating numbers and the average of negative numbers and the average of positive numbers.</p> <p>5. Write a program that prompts the user to input a positive integer. It should then output a message indicating whether the number is a prime number.</p> <p>6. Write a program that prompts the user to input the value of a, b and c involved in the equation $ax^2 + bx + c = 0$ and outputs the type of the roots of the equation.</p> | | |
| Practicals: | Practicals related to Elements of LATEX, Hands-on-training of LATEX. | B.Sc(H) Maths Sem-III B | SEC-I LATEX AND HTML |

| | | | | |
|-----------|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|---------------------|
| September | Theory: | Subspaces, dense sets, separable spaces, Continuous mappings, sequential criterion and other characterizations of continuity, Uniform continuity. | B.Sc(H) Maths Sem-V | C 11- Metric Spaces |
| | Practicals: | NA | | |
| | Tutorials: | To discuss the doubt of students and various exercise questions and examples related to Subspaces, dense sets, separable spaces, Continuous mappings, sequential criterion and other characterizations of continuity, Uniform continuity. | | |
| | Assignments | To be given assignment related to syllabus. | | |

| | | | | |
|---------|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------|----------------------------|
| | Practicals: | <p>7. Write a program that generates Fibonacci numbers.</p> <p>8. Write a program that prompts the user to input five decimal numbers, converts each decimal number to the nearest integer, prints the sum and average of them.</p> <p>9. Write a program that uses while loops to prompt the user to input two integer, output all odd and even numbers between them, output the sum of all even numbers between them, output the sum of the square of the odd numbers between them.</p> <p>10. Write a program that prompts the user to input five decimal numbers, then add them, convert the sum to the nearest integer, and print the result.</p> <p>11. Write a program that prompts the user to enter the lengths of three sides of a triangle and then outputs a message indicating type of triangle.</p> <p>12. Write a value returning function smaller to determine the smallest number from a set of numbers. Use this function to determine the smallest number from a set of 10 numbers.</p> | B.Sc.(H) Maths Sem-V DSE-I | C++ programming |
| | Practicals: | Practicals related to graphics in LATEX, PSTricks. | B.Sc(H) Maths Sem-III B | SEC-I LATEX AND HTML |
| OCTOBER | Theory: | Homeomorphism, Contraction mappings, Banach Fixed point Theorem. Connectedness, connected subsets of R , connectedness and continuous mappings. Compactness. | B.Sc(H) Maths Sem-V | C 11- Metric Spaces |

| | | | | |
|--|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|
| | Tutorials: | To discuss the doubt of students and various exercise questions and examples related to Homeomorphism, Contraction mappings, Banach Fixed point Theorem. Connectedness, connected subsets of R , connectedness and continuous mappings. Compactness. | | |
| | Test | To take internal Test. | | |

| | | | |
|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------|----------------------------|
| Practicals: | 13. Write a function that takes as a parameter an integer and returns the number of odd, even, and zero digits. 14. Enter 100 integers into an array and sort them in an ascending/ descending order and print the largest/ smallest integers. 15. Enter 10 integers into an array and then search for a particular integer in the array. 16. Multiplication/ Addition of two matrices using two dimensional arrays. 17. Using arrays, read the vectors and compute the product and addition of these vectors. 18. Read from a text file and write to a text file. | B.Sc.(H) Maths Sem-V DSE- | C++ programming |
| Test | To take internal Lab Test. | | |
| Practicals: | Practicals related to Beamer presentation. | B.Sc(H) MathsSem-III B | SEC-I LATEX AND HTML |
| Test | To take internal Lab Test. | | |

| | | | | |
|----------|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|---------------------|
| NOVEMBER | Theory: | Compactness and boundedness, continuous functions on compact spaces and to revise whole syllabus, to discuss last previous year questions papers. | B.Sc(H) MathsSem-V | C 11- Metric Spaces |
| | Practicals: | NA | | |
| | Tutorials: | To discuss the doubt of students and various exercise questions and examples related to compactness and boundedness, continuous functions on compact Spaces and to revise whole syllabus, to discuss last previous year questions papers. | | |

| | | | |
|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------|-------------------------|
| Practicals: | 19. Write a program to create the grids using for loops: 20. Write a function that takes an integer as a parameter and returns the number with its digits reversed. | B.Sc.(H) Maths Sem-V DSE-I | C++ programming |
| Practicals: | Practicals related to complete Latex and revise all Practical | B.Sc(H) Maths Sem-III B | SEC-I LATEX AND HTML |

Ms. Pratibha Gaur

| Month | | Topics | Course | Paper Code/Name |
|--------|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|---------------------------------------|
| JULY | Theory | The first-derivative test for relative extrema, Concavity and inflection points, Second derivative test for relative extrema. Curve sketching using | B.Sc(H) Semester-I | Calculus |
| | Tutorials | To discuss the doubt of students and various exercise questions and examples related to Limit and Continuity | BA(P) Sem-I | Calculus |
| | Theory | Techniques for sketching parabola | BA(P) Sem-III | Analytic Geometry and Applied Algebra |
| | Tutorials | To discuss the doubt of students and various exercise questions and examples related to symmetries of a square, Dihedral groups, definition and examples of groups. | B.Sc(H) Maths Sem-III B | C6- Group Theory-I |
| | Practicals | Practical No.7- f be any function and be n any number. For given N and epsilon , find a delta such that for all satisfying , the inequality holds. | B.Sc(H) Maths Sem-III A | C 7- Multivariate Calculus |
| | Practicals | Introduction to Latex and HTML And discuss related software and Practicals. | B.Sc(H) Maths Sem-III B | SEC-I LATEX AND HTML |
| AUGUST | Theory | Limits to infinity and infinite limits, Graphs with asymptotes, Vertical tangents and cusps, L'Hôpital's rule | B.Sc(H) Semester-I | Calculus |
| | Tutorials | To discuss the doubt of students and various exercise questions and examples related to above topics. | BA(P) Sem-I | Calculus |

| | | | |
|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|---------------------------------------|
| Theory | Ellipse and hyperbola. Reflection properties of parabola | BA(P) Sem-III | Analytic Geometry and Applied Algebra |
| Tutorials | To discuss the doubt of students and various exercise questions and examples related to examples of groups including permutation groups and quaternion groups (illustration through matrices), elementary properties of groups. Subgroups and examples of subgroups, centralizer, normalizer, center of a group, product of two subgroups. Properties of cyclic groups, classification of subgroups of | B.Sc(H) Maths Sem-III B | C6- Group Theory-I |
| Practicals: | Practical No.8-To Discuss the limit of the functions when n tends to zero. Practical No.9- To discuss the limit of the following functions when n tends to infinity. *To take a lab test related to above Practicals. | B.Sc(H) Maths Sem-III A | C 7- Multivariate Calculus |
| Practicals: | Practicals related to Elements of LATEX , Hands-on-training of LATEX. | B.Sc(H) Maths Sem-III B | SEC-I LATEX AND HTML |

| | | | | |
|-----------|---------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|---------------------------------------|
| September | Theory | Applications of derivatives in business, economics and life sciences. Higher order derivatives and Leibniz rule for higher order derivatives for the product of two functions. Parametric representation of curves | B.Sc(H) Semester-I | Calculus |
| | Tutorials | To discuss the doubt of students and various exercise questions and examples related to Limit and Continuity | BA(P) Sem-I | Calculus |
| | Theory | ellipse and hyperbola | BA(P) Sem-III | Analytic Geometry and Applied Algebra |
| | Tutorials | To discuss the doubt of students and various exercise questions and examples related to cycle notation for permutations, properties of permutations, even and odd permutations, alternating group, properties of cosets, Lagrange's theorem and consequences | B.Sc(H) Maths Sem-III B | C6- Group Theory-I |
| | Assignments | To be given assignment related to syllabus. | BA(P) Sem-I | Calculus |
| | Practicals : | Practical No.10-. Discuss the continuity of the functions. Practical No.11- To Illustrate the geometric meaning of Rolle's theorem of the functions on the given interval. Practical No .12-To Illustrate the geometric meaning of Lagrange's mean value theorem of the functions | B.Sc(H) Maths Sem-III A | C 7- Multivariate Calculus |
| | Practicals : | Practicals related to graphics in LATEX, PSTricks. | B.Sc(H) Maths Sem-III B | SEC-I LATEX AND HTML |

| | | | | |
|---------|---------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|---------------------------------------|
| OCTOBER | Theory | Polar coordinates and the relationship between Cartesian and polar coordinates. Tracing of curves in polar coordinates. Techniques of sketching conics: parabola, ellipse and hyperbola | B.Sc(H) Semester-I | Calculus |
| | Tutorials | To discuss the doubt of students and various exercise questions and examples related to above syllabus | BA(P) Sem-I | Calculus |
| | Theory | ellipse and hyperbola their applications to signals, classification of quadratic equation representing lines. | BA(P) Sem-III | Analytic Geometry and Applied Algebra |
| | Tutorials | To discuss the doubt of students and various exercise questions and examples related External direct product of a finite number of groups, normal subgroups, factor groups, Cauchy's theorem for finite abelian groups and Group homomorphisms. | B.Sc(H) Maths Sem-III B | C6- Group Theory-I |
| | Test | To take internal Test. | | |
| | Practicals : | Practicals related to Beamer presentation. | B.Sc(H) Maths Sem-III B | SEC-I LATEX AND HTML |
| | Test | To take internal Lab Test. | | |

| | | | | |
|----------|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|---------------------------------------|
| November | Theory | Reflection properties of conics, Rotation of axes, Second degree equations and their classification into conics using the discriminant | B.Sc(H) Semester-I | Calculus |
| | Tutorials | To discuss the doubt of students and various exercise questions and examples related to above syllabus | BA(P) Sem-I | Calculus |
| | Theory | Parabola, ellipse and hyperbola and to discuss last previous year questions papers. | BA(P) Sem-III | Analytic Geometry and Applied Algebra |
| | Tutorials | To discuss the doubt of students and various exercise questions and examples related to Properties of homomorphisms, Cayley's theorem, properties of isomorphisms, First, Second and Third isomorphism theorems | B.Sc(H) Maths Sem-III A | C6- Group Theory-I |
| | Practicals: | <p>Practical No .16- Relation of monotonicity & derivatives along with verification of first derivative test.</p> <p>Practical No .17- Relation of monotonicity & derivatives along with verification of first derivative test. Taylor's series - visualization by creating graphs:</p> <p>a. Verification of simple inequalities</p> <p>b. Taylor's Polynomials – approximated up to certain</p> | B.Sc(H) Maths Sem-III A | C 7- Multivariate Calculus |

| | | | |
|--------------------|-----------------------------------------------------------------|----------------------------|-------------------------|
| Practicals: | Practicals related to complete Latex and revise all practical's | B.Sc(H) Maths Sem-III B | SEC-I LATEX AND HTML |
|--------------------|-----------------------------------------------------------------|----------------------------|-------------------------|

| Month | | Topics | Course | Paper Code/Name |
|-----------|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|-------------------------------|
| JULY | Theory: | To introduce the concepts of Algorithms, Convergence, Bisection Method and various problems related to these and to discuss various theorems related to convergence of the method | B.Sc.(Hons.)Maths Sem V | DSE-1(i) Numerical Methods |
| | Practicals: | Basic concepts of Mathematica and Practical (i) of the list given in the syllabus: To | B.Sc.(Hons.)Maths Sem V | DSE-1(i) Numerical Methods |
| | Tutorials: | To discuss the doubt of students and various exercise questions and examples related to polar representation of complex | B.Sc.(Hons.)Maths Sem I | C 2- Algebra |
| AUGUST | Theory: | False position method, Fixed point iteration method, Newton's method, Secant method, LU decomposition, Gauss-Jacobi method and various problems related to these and to discuss various theorems related to convergence of these methods. | B.Sc.(Hons.)Maths Sem V | DSE-1(i) Numerical Methods |
| | Practicals: | Practicals (ii) to find the absolute value of an integer, (iii) to enter 100 integers into an array and sort them in ascending order and (iv) Bisection method, Newton Raphson Method, Secant method, Regula Falsi Method | B.Sc.(Hons.)Maths Sem V | DSE-1(i) Numerical Methods |
| | Tutorials: | To discuss the doubt of students and various exercise questions and examples related to nth roots of unity, De Moivre's theorem for rational indices and its applications | B.Sc.(Hons.)Maths Sem I | C 2- Algebra |
| SEPTEMBER | Theory: | Gauss-Seidel method, SOR iterative method and various problems related to these and to discuss various theorems related to convergence of these methods. | B.Sc.(Hons.)Maths Sem V | DSE-1(i) Numerical Methods |
| | Practicals: | Practicals (v) LU decomposition method and (vi) Gauss-Jacobi method | B.Sc.(Hons.)Maths Sem V | DSE-1(i) Numerical Methods |

| | | | | |
|----------|-----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|-------------------------------|
| | | To discuss the doubt of students and various exercise questions and examples related to equivalence relations, functions, composition of functions | B.Sc.(Hons.)Maths Sem I | C 2- Algebra |
| | Tutorials: | | | |
| | <u>Assignment</u> | Assignment to be given related to syllabus. | B.Sc.(Hons.)Maths Sem V | DSE-1(i) Numerical Methods |
| OCTOBER | Theory | Lagrange and Newton interpolation: linear and higher order, finite difference operators, Numerical differentiation: forward difference, backward difference and central difference | B.Sc.(Hons.)Maths Sem V | DSE-1(i) Numerical Methods |
| | Practicals: | Practicals (vii) SOR method, Gauss Siedel method and (viii) Lagrange Interpolation, Newton Interpolation | B.Sc.(Hons.)Maths Sem V | DSE-1(i) Numerical Methods |
| | Tutorials: | To discuss the doubt of students and various exercise questions and examples related to one to one correspondence and cardinality of a set, well-ordering property of positive integers | B.Sc.(Hons.)Maths Sem I | C 2- Algebra |
| | <u>Mid Term Test</u> | To take internal Test based on the syllabus covered. | B.Sc.(Hons.)Maths Sem V | DSE-1(i) Numerical Methods |
| | | To take internal Lab Test based on the syllabus covered. | B.Sc.(Hons.)Maths Sem V | DSE-1(i) Numerical Methods |
| | | | | |
| NOVEMBER | Theory: | Integration: trapezoidal rule, Simson's rule, Euler's method and to revise whole syllabus. To discuss previous year questions papers some of which are available on my Blog https://numericalmaths.wordpress.com/ | B.Sc.(Hons.)Maths Sem V | DSE-1(i) Numerical Methods |

| | | | |
|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|----------------------------|
| Practicals: | Practical (ix):Simpson's rule and revise all practicals | B.Sc.(Hons.)Maths Sem V | DSE-1 Numerical Methods |
| Tutorials: | To discuss the doubt of students and various exercise questions and examples related to division algorithm, divisibility and Euclidean algorithm | B.Sc.(Hons.)Maths Sem I | C 2- Algebra |

Deepti Jain

| Month | | Topics | Course | Paper Code/Name |
|-------|------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------|-------------------------------------------|
| JULY | Theory | Definition and examples of ordered sets, Chains and antichains, Order-isomorphism, The Covering Relation, Hasse Diagram, The dual of an ordered set and The Duality Principle, Top and Bottom, Maximal and minimal elements. | B.Sc.(H) Mathematics V Semester | DSE-II(ii) Discrete Mathematics |
| | Tutorial | Exercises and doubts based on Hasse diagram and Order-isomorphism, Verification or order-preserving, order-embedding and order-isomorphisms. | | |
| | Practical | N/A | | |
| | Theory | Order and degree of partial differential equations, Concept of linear and non-linear partial differential equations. | B.A. Prog V Semester | Differential Equations |
| | Practical | N/A | | |
| | Practical | Introduction to Latex: 1. What is Tex and Latex? 2. To create Latex file 3. To add title, author and date 4. Mathematical Typesetting | B.Sc.(H) Mathematics III Semester | |

| | | | | |
|--|------------------|------------------------------------------------------------------------------------------------------------------------|--------------------------------------|-------------------------------|
| | | | | |
| | Practical | Use of mathematica for the following Numerical programs: (i) Calculate the sum $1/1 + 1/2 + 1/3 + \dots + 1/N$. | B.Sc(H) Mathematics V Semester | DSE 1(i) Numerical Methods |

| | | | | |
|--------|------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------|-------------------------------------------|
| AUGUST | Theory | Sums of ordered sets, Product of ordered sets, Order-preserving maps, Order-embedding map and order-isomorphism maps, Lattices as ordered sets, Lattices as algebraic structures, The Connecting Lemma, Sublattices, Product of lattices, Lattice homomorphism, Complete Lattices, Distributive and Modular lattices, The M3-N5 Theorem. | B.Sc.(H) Mathematics V Semester | DSE-II(ii) Discrete Mathematics |
| | Tutorial | Exercises based on join and meet in an ordered set, Examples of lattices and complete lattices, relationship between order-isomorphism and lattice-isomorphism, Construction of ordered sets and lattices satisfying given conditions. | | |
| | Practical | N/A | | |
| | Theory | Formation of first order partial differential equations, Linear partial differential equations of first order. | B.A. Prog V Semester | Differential Equations |
| | Practical | N/A | | |
| | Practical | 5. Delimiters 6. Arrays 7. Multi-line Expressions | B.Sc.(H) Mathematics III Semester | SEC-I |
| | Practical | (ii) To find the absolute value of an integer. (iii) Enter 100 integers into an array and sort them in an ascending order. | B.Sc.(H) Mathematics V Semester | DSE 1(i) Numerical Methods |

| | | | | |
|-----------|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------|---------------------------------------|
| | | | | |
| SEPTEMBER | Theory | Boolean Algebras, Boolean Polynomials, minimal forms of Boolean polynomials, Quinn-McCluskey method, Karnaugh diagrams, Switching Circuits and applications of switching circuits. | B.Sc.(H) Mathematics V Semester | DSE-II(ii) Discrete Mathematics |
| | Tutorial | Exercises and doubts based on Boolean polynomials and switching circuits. | | |
| | Practical | N/A | | |
| | Assignment | Question from the topics including ordered sets, Lattices and Boolean Algebras. | | |
| | Theory | Langrange's method, Charpit's method | B.A. Prog V Semester | Differential Equations |
| | Practical | N/A | | |

| | | | | |
|---------|-----------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|---------------------------------------|
| | Assignment | Questions from the topics: First order partial differential equations. | | |
| | Practical | 8. How to use Graphics. Assignments based on inserting graphics | B.Sc.(H) Mathmatics III Semester | SEC-I |
| | Practical | Bisection Method, Newton Raphson Method, Secant Method and Regulai Falsi Method and LU decomposition Method. | B.Sc.(H) Mathmatics V Semester | DSE 1(i) Numerical Methods |
| OCTOBER | Theory | Definition, examples and basic properties of graphs, pseudographs, Complete graphs, Bipartite graphs, Isomorphism of graphs, Paths and circuits, Eulerian circuits, Hamiltonian cycles, The adjacency matrix. | B.Sc.(H) Mathematics V Semester | DSE-II(ii) Discrete Mathematics |
| | Tutorial | Exercises based on isomorphism of graphs, paths and circuits and adjacency matrix. | | |
| | Practical | N/A | | |
| | Mid Term <hr/> Test <hr/> | Ordered Sets, Lattices, Boolean Algebras, Graphs. | | |
| | Theory | Classification of second order partial differential equations into elliptic, parabolic and hyperbolic through illustrations. | B.A. Prog V Semester | Differential Equations |

| | | | | |
|--|--------------------------|--------------------------------------------------------------------------------------------------|-----------------------------------------|-------------------------------|
| | Practical | N/A | | |
| | Mid Term Test | Questions based on the topics: First order and second order partial differential equations. | | |
| | Practical | Using PSTricks 1. Simple pictures 2. Plotting Functions 3. Plotting pictures with nodes | B.Sc.(H) Mathematics III Semester | SEC-I |
| | Practical | Gauss-Jacobi Method, Gauss-Seidel Method and Lagrange Interpolation. | B.Sc.(H) Mathematics V Semester | DSE 1(i) Numerical Methods |

| | | | | |
|----------|------------------|----------------------------------------------------------------------------------------------------------------|----------------------------------------|-------------------------------------------|
| NOVEMBER | Theory | Weighted Graphs, Travelling salesman's Problem, Shortest path, Dijkstra's algorithm, Floyd-Warshall algorithm. | B.Sc.(H) Mathmatics V Semester | DSE-II(ii) Discrete Mathematics |
| | Tutorial | Exercises based on various algorithms mentioned above to find the shortest path in a given weighted graph. | | |
| | Practical | N/A | | |
| | Theory | Revision of the entire syllabus. | B.A. Prog V Semester | Differential Equations |
| | Practical | N/A | | |
| | Practical | 1. Beamer Presentation 2. HTML 3. Revision of all topics | B.Sc.(H) Mathmatics III Semester | SEC-I |
| | Practical | Simpson's Rule. Revision of all topics. Practical Examination. | B.Sc.(H) Mathmatics V Semester | DSE 1(i) Numerical Methods |

Ninian Nauneet Kujur

| Month | | Topics | Course | Paper |
|--------|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|---------------------------------------|
| July | Theory | Limits of functions (epsilon-delta approach), sequential criterion for limits, | Bsc(H) Maths-Sem III(B) | Theory of real functions (C5) |
| | Theory | Techniques for sketching parabola, | BA(P) Sem III | Analytic Geometry and Applied Algebra |
| | Practicals | Elements of LaTeX | Bsc(H) Maths-Sem III(B) | SEC-1 LaTeX and HTML |
| | Tutorials | Exercise questions related to the concept of limits. | Bsc(H) Maths-Sem III(B) | Theory of real functions (C5) |
| August | Theory | Divergence criteria, Limit theorems, one sided limits. Infinite limits & limits at infinity, Continuous functions, sequential criterion for continuity & discontinuity. Algebra of continuous functions, Continuous functions on an interval, intermediate value theorem | Bsc(H) Maths-Sem III(B) | Theory of real functions (C5) |
| | Theory | Techniques for sketching ellipse and hyperbola. | BA(P) Sem III | Analytic Geometry and Applied Algebra |
| | Practicals | Hands-on-training of LaTeX; graphics in LaTeX | Bsc(H) Maths-Sem III(B) | SEC-1 LaTeX and HTML |
| | Tutorials | Exercise questions related to the concept of continuity. | Bsc(H) Maths-Sem III(B) | Theory of real functions (C5) |

| | | | | |
|-----------|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|---------------------------------------|
| September | Theory | Location of roots theorem, preservation of intervals theorem, Uniform continuity, non-uniform continuity criteria, uniform continuity theorem. Differentiability of a function at a point & in an interval, Carathéodory's theorem, algebra of differentiable functions. | Bsc(H) Maths- SemIII(B) | Theory of real functions (C5) |
| | Theory | Reflection properties of parabola, ellipse and hyperbola and their applications to signals, | BA(P) Sem III | Analytic Geometry and Applied Algebra |
| | Practicals: | PSTricks; Beamer presentation | Bsc(H) Maths- SemIII(B) | SEC-1 LaTeX and HTML |
| | Tutorials | Questions related to Uniform continuity and differentiability. | Bsc(H) Maths- SemIII(B) | Theory of real functions (C5) |

| | | | | |
|---------|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|---------------------------------------|
| October | Theory: | Relative extrema, interior extremum theorem. Rolle's theorem, Mean value theorem, intermediate value property of derivatives - Darboux's theorem. Applications of mean value theorem to inequalities & approximation of polynomials Taylor's theorem to inequalities. Cauchy's mean value theorem. Taylor's theorem with Lagrange's form of remainder, Taylor's theorem with Cauchy's form of remainder, application of Taylor's theorem to convex functions, relative extrema Portion upto Mean Value | Bsc(H) Maths-SemIII(B) | Theory of real functions (C5) |
| | Theory | Classification of quadratic equation representing lines, parabola, ellipse and hyperbola | BA(P) Sem III | Analytic Geometry and Applied Algebra |
| | Assignment | Based on portion covered | | |
| | Practicals | HTML, creating simple web pages | Bsc(H) Maths-SemIII(B) | SEC-1 LaTeX and HTML |
| | Tutorials | Questions based on mean value theorems, Taylor's and Lagrange's theorem | Bsc(H) Maths-SemIII(B) | Theory of real functions (C5) |

| | | | | |
|----------|---------------|-------------------------------------------------------------------------------------------|---------------------------|-------------------------------|
| November | Theory | Taylor's series & Maclaurin's series expansions of exponential & trigonometric functions. | Bsc(H) Maths-SemIII(B) | Theory of real functions (C5) |
|----------|---------------|-------------------------------------------------------------------------------------------|---------------------------|-------------------------------|

| | | | | |
|--|-------------------|-------------------------------------------------------------------------------|-----------------------------|---------------------------------------|
| | | Revision | BA(P) Sem III | Analytic Geometry and Applied Algebra |
| | Practicals | images and links, design of web pages. | BSc.(H) Maths-Sem-III(B) | Multivariate Calculus |
| | Tutorials | Questions based on Cauchy form of remainder, expansions of various functions. | Bsc(H) Maths-Sem III(B) | Theory of real functions (C5) |

Amit Kumar

| Month | | Topics | Course | Paper Code/Name |
|-------|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|-----------------|
| July | Theory | Symmetries of a square, Dihedral groups, definition and examples of groups | B.sc Math(H) IIIA | ALGEBRA |
| | Tutorials | To Discuss the Doubt of students and to solve various exercise of Symmetries of a square, Dihedral groups, definition and examples | B.sc Math(H) IIIA | ALGEBRA |
| | Theory | The first derivative test, concavity and inflection points, Second derivative test, Curve sketching using first and second derivative test | B.Sc(H) Math Sem-I | CALCULUS |
| | Practicals | Introduction to Mathematica and Calculus Practical. (1) Plotting of graphs of function of type (greatest integer function)... (even and odd positive integer), (even and odd positive integer), (a positive integer) , , , Discuss the effect of and on the graph and to solve different Questions. | B.Sc(H) Math Sem-I | CALCULUS |

| | | | | |
|---------------|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------|-------------------|
| August | Theory: | Subgroups and examples of subgroups, centralizer, normalizer, center of a group, product of two subgroups, Properties of cyclic groups, classification of subgroups of cyclic groups | B.sc Math(H) IIIA | ALGEBRA |
| | Tutorias | To Discuss the Doubt of students and to solve various exercise of Quaternion groups (illustration through matrices), elementary properties of groups. Subgroups and examples of subgroups, centralizer, normalizer, center of a group, product of two subgroups, Properties of cyclic groups, classification of subgroups of | B.sc Math(H) IIIA | ALGEBRA |
| | Theory | limits at infinity, graphs with asymptotes. Graphs with asymptotes, L'Hopital's rule, applications in business, economics and life sciences., Higher order derivatives, Applications of Leibnitz rule. Parametric representation of curves and tracing of parametric | B.Sc(H) Maths Sem-I | Calculus |
| | Assignmens | To be given assignment related to syllabus. | B.Sc(H) Maths Sem-I and Sem-III | Calculus /Algebra |
| | Practicals: | (2). Plotting the graphs of polynomial of degree 4 and 5, the derivative graph, the second derivative graph and comparing them. (3). Sketching parametric curves. (4). Tracing of conics in Cartesian coordinates. Giving Assignment related to above topics. | | Calculus |
| Septemb er | Theory | Cycle notation for permutations, properties of permutations, even and odd permutations, alternating group, properties of cosets, Lagrange's theorem and consequences including Fermat's Little theorem, And test related to | B.Sc(H) Maths Sem-III | Algebra |

| | | | |
|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|------------------|
| Tutorials | To Discuss the Doubt of students and to solve various exercise of Cycle notation for permutations, properties of permutations, even and odd permutations, alternating group, properties of cosets, Lagrange's theorem and consequences including Fermat's Little theorem, External direct product of a finite number of | B.Sc(H) Maths Sem-III | Algebra |
| Theory | Parametric representation of curves and tracing of parametric curves, Polar coordinates and tracing of curves in polar coordinates, Reduction formulae, derivations and illustrations of reduction formulae of the type, Volumes by slicing; disks and washers methods, Volumes by cylindrical shells. Arc length, arc length of | B.Sc(H) Maths Sem-I | Calculus |
| Practicals | 5). Obtaining surface of revolution of curves. (6). Sketching ellipsoid, hyperboloid of one and two sheets, elliptic cone, elliptic paraboloid, hyperbolic paraboloid using Cartesian co-ordinates. (7). To find numbers between two | B.Sc(H) Maths Sem-I | Calculus |
| Test | To take class test related to syllabus And class lab test related to above Practicals. | B.Sc(H) Maths Sem-I/IV | Calculus/Algebra |

| | | | | |
|---------|-------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|----------|
| October | Theory | External direct product of a finite number of groups Normal subgroups, factor groups, Cauchy's theorem for finite abelian groups. Group homomorphism, properties of homomorphism. Cayley's | B.Sc(H) Maths Sem-III | Algebra |
| | Tutorials | To Discuss the Doubt of students and to solve various exercise of Normal subgroups, factor groups, Cauchy's theorem for finite isomorphism, abelian groups. Group homomorphism, | B.Sc(H) Maths Sem-III | Algebra |
| | Theory | Introduction to vector functions and their graphs, operations with vector-valued functions, limits and continuity of vector functions, differentiation and integration of vector functions. Modeling ballistics and planetary motion, Kepler's second law. Curvature, tangential | B.Sc(H) Maths Sem-I | Calculus |
| | Practicals | (8). Matrix operations (addition, multiplication, inverse, transpose, determinant, rank, eigenvectors, eigenvalues, Characteristic equation and verification of Cayley Hamilton equation, system of linear equations) (9) Graph of Hyperbolic functions. (10). Computation of limit, | B.Sc(H) Maths Sem-I | Calculus |

| | | | | |
|---------|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|------------------|
| | Test | To take internal test related to syllabus And internal lab test related to above Practicals. | B.Sc(H) Maths Sem-II/IV | Calculus/Algebra |
| Novmber | Theory | First, Second and Third isomorphism theorems and To Revised whole syllabus And to Discuss last previous year questions | B.Sc(H) Maths Sem-III | Algebra |
| | Tutorials: | To Discuss the Doubt of students and to solve various exercise of Properties of isomorphism, First, Second and Third isomorphism theorems | B.Sc(H) Maths Sem-III | Algebra |
| | Theory: | Conic Section, Rotation of axes and second degree equations, classification into conics using the discriminate, Revise whole syllabus, to Discuss last previous year questions | B.Sc(H) Maths Sem-I | Calculus |
| | Practicals: | 11).Complex numbers and their representations, operations like addition, multiplication, division, modulus. Graphical representation of polar form. (12). To take internal Lab Test. | B.Sc(H) Maths Sem-I | Calculus |

Dr. Nisha Bohra

| <u>Month</u> | | <u>Topics</u> | <u>Course</u> | <u>Paper Name and code</u> |
|--------------|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|----------------------------|
| July | Theory 1 | Equivalence relations, functions | B.Sc. (H) Mathematics I A | Algebra, BMATH102 |
| | Theory 2 | Metric Spaces: Definitions and examples | B.Sc. (H) Mathematics III B | Metric spaces, C11 |
| | Tutorial Theory 1 | To discuss the doubt of the students and exercise problems based on the topic covered in the class. | B.Sc. (H) Mathematics I A | Algebra, BMATH102 |
| | Tutorial Theory 2 | To discuss the doubt of the students and exercise problems based on the topic covered in the class. | B.Sc. (H) Mathematics III B | Metric spaces, C11 |
| | Practical 1 | 1. Plotting the graphs of various functions | B.Sc. (H) Mathematics I A (Batch 1) | Calculus, BMATH101 |
| | Practical 2 | 1. Discuss the limit of the given functions of x as x tends to zero | B.Sc. (H) Mathematics II year | Multivariate calculus, C7 |
| August | Theory 1 | Composition of functions, Invertibility and inverse of functions, One-to-one correspondence | B.Sc. (H) Mathematics I A | Algebra, BMATH102 |
| | Theory 2 | Sequences in metric spaces, Cauchy sequences, Complete metric spaces, open and closed balls, Neighbourhood, open set, Interior of a set, Limit point of a set. | B.Sc. (H) Mathematics III B | Metric spaces, C11 |

| | | | | |
|--|-------------------|-----------------------------------------------------------------------------------------------------|-----------------------------|--------------------|
| | Tutorial Theory 1 | To discuss the doubt of the students and exercise problems based on the topic covered in the class. | B.Sc. (H) Mathematics I A | Algebra, BMATH102 |
| | Tutorial Theory 2 | To discuss the doubt of the students and exercise problems based on the topic covered in the class. | B.Sc. (H) Mathematics III B | Metric spaces, C11 |

| | | | | |
|-----------|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|---------------------------|
| | Practical 1 | <ol style="list-style-type: none"> Plotting the graphs of functions depending upon parameters a and b. To discuss and observe the changes in the real constants a, b on the graphs. Plotting the graphs of polynomials of degree 4 and 5 and their first and second derivatives. | B.Sc. (H) Mathematics I A (Batch 1) | Calculus, BMATH101 |
| | Practical 2 | <ol style="list-style-type: none"> Discuss the limit of the given functions of x as x tends to infinity. Discuss the continuity of given functions of x at $x=0$. Illustrate the geometric meaning of Rolle's theorem of the given functions on the given interval. | B.Sc. (H) Mathematics II year | Multivariate calculus, C7 |
| September | Theory 1 | Cardinality of set, countable and uncountable sets, well ordering principle, the division algorithm in \mathbb{Z} , Divisibility and the Euclidean algorithm. | B.Sc. (H) Mathematics I A | Algebra, BMATH102 |
| | Theory 2 | Closed set, diameter of a set, Cantor's Theorem, Subspaces, dense sets, separable spaces, Continuous mappings, Sequential criteria and other characterizations of continuity | B.Sc. (H) Mathematics III B | Metric spaces, C11 |
| | Tutorial Theory 1 | To discuss the doubt of the students and exercise problems based on the topic covered in the class. | B.Sc. (H) Mathematics I A | Algebra, BMATH102 |

| | | | | |
|--|-------------------|------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|--------------------|
| | Tutorial Theory 2 | To discuss the doubt of the students and exercise problems based on the topic covered in the class. | B.Sc. (H) Mathematics III B | Metric spaces, C11 |
| | Practical 1 | <ol style="list-style-type: none"> Sketching parametric curves Tracing of conics in Cartesian coordinates. | B.Sc. (H) Mathematics I A (Batch 1) | Calculus, BMATH101 |

| | | | | |
|---------|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|---------------------------|
| | Practical 2 | 6. Illustrate the geometric meaning of Lagrange's theorem of the given functions on the given interval. 7. Verification of Maximumminimum theorem, boundedness theorem and intermediate value theorem for various functions and the failure of conclusion in case of any of the hypothesis is weakened. | B.Sc. (H) Mathematics II year | Multivariate calculus, C7 |
| October | Theory 1 | Fundamental theorem of arithmetic, Modular arithmetic and basic properties of congruence. | B.Sc. (H) Mathematics I A | Algebra, BMATH102 |
| | Theory-2 | Uniform continuity, Homeomorphism, Contraction mappings, Banach Fixed point theorem, Connectedness, connectedness and continuous mappings | B.Sc. (H) Mathematics III B | Metric spaces, C11 |
| | Tutorial Theory 1 | To discuss the doubt of the students and exercise problems based on the topic covered in the class. | B.Sc. (H) Mathematics I A | Algebra, BMATH102 |
| | Tutorial Theory 2 | To discuss the doubt of the students and exercise problems based on the topic covered in the class. | B.Sc. (H) Mathematics III B | Metric spaces, C11 |

| | | | | |
|--|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|---------------------------|
| | Practical 1 | 8. Obtaining surface of revolution of curves 9. Graph of hyperbolic functions | B.Sc. (H) Mathematics I A (Batch 1) | Calculus, BMATH101 |
| | Practical 2 | 8. locating points of relative and absolute extremum for different functions 9. Relation of monotonicity and derivatives along with verification of first derivative test. | B.Sc. (H) Mathematics II year | Multivariate calculus, C7 |
| | Assignment | Assignment given on the topics covered in the class before mid-semester break | B.Sc. (H) Mathematics I A and III B | Algebra and Metric Spaces |

| | | | | |
|----------|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|---------------------------|
| | Internal Test | Internal Exam conducted on the basis of topics covered in the class | B.Sc. (H) Mathematics I A and III B | Algebra and Metric Spaces |
| November | Theory 1 | Factored form of a polynomial, Fundamental theorem of Algebra, Relations between the roots and the coefficients of polynomial equations, Theorems on imaginary, integral and rational roots. | B.Sc. (H) Mathematics I A | Algebra, BMATH102 |
| | Theory 2 | Compactness, Compactness and boundedness, continuous functions on compact spaces | B.Sc. (H) Mathematics III B | Metric spaces, C11 |
| | Tutorial Theory 1 | To discuss the doubt of the students and exercise problems based on the topic covered in the class. | B.Sc. (H) Mathematics I A | Algebra, BMATH102 |
| | Tutorial Theory 2 | To discuss the doubt of the students and exercise problems based on the topic covered in the class. | B.Sc. (H) Mathematics III B | Metric spaces, C11 |
| | Practical 1 | 10.Computation of limit, Differentiation, Integration and sketching of vector valued functions. | B.Sc. (H) Mathematics I A (Batch 1) | Calculus, BMATH101 |
| | Practical 2 | 10 Taylor series- visualization by creating graphs. | B.Sc. (H) Mathematics II year | Multivariate calculus, C7 |

| Month | | Topics | Course | Paper Code/Name |
|--------|---------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|----------------------------|
| JULY | Theory | Symmetries of a square, Dihedral groups, definition and examples of groups including permutation groups. | B.Sc(H)Maths Sem-III-B | C6-Group Theory-I |
| | Tutorials | To Discuss the doubt of students and to solve various exercise of Symmetries of a square, Dihedral groups, definition and examples of groups including permutation groups. | B.Sc(H)Maths Sem-III-B | C6-Group Theory-I |
| | Theory | Automorphism, Inner Automorphism, Automorphism groups. | B.Sc(H)Maths Sem-VIA | C6-Group Theory-I I |
| | Practicals: | Introduction to Latex and Html, To discuss html document as tag, head, body, title, heading, paragraph, title, list, creating simple web page related above topics. Giving assignment and taking lab test. | B.Sc(H)Maths Sem-III A | SEC-1 Latex and HTML |
| | Tutorials | To discuss the doubt of students and to solve various exercise of automorphism, inner automorphism, and automorphism groups. | B.Sc(H)Maths Sem-VIA | C6-Group Theory-I I |
| | Practicals : | Practical No.1-To Draw surfaces and find level curves at the given heights. Practical No.7- f be any function and n any number. For given N and ϵ , find a δ such that for all satisfying the inequality holds. | B.Sc(H)Maths Sem-IVB | C 7- Multivariate Calculus |
| AUGUST | Theory | Quaternion groups (illustration through matrices), elementary properties of groups. Subgroups and examples of subgroups, centralizer, normalizer, center of a group, product of two subgroups, Properties of cyclic groups, classification of subgroups of cyclic | B.Sc(H)Maths Sem-III-B | C6-Group Theory-I |

| | | | | |
|-----------|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|----------------------------|
| | Tutorials: | To discuss the doubt of students and to solve various exercise of Quaternion groups (illustration through matrices), elementary properties of groups. Subgroups and examples of subgroups, centralizer, normalizer, center of a group, product of two subgroups, Properties of cyclic groups, classification of subgroups of cyclic groups test related to above topics. | B.Sc(H)Maths Sem-III-B | C6-Group Theory-I |
| | Theory | Automorphism groups of finite and infinite cyclic groups, applications of factor groups to automorphism groups. | B.Sc(H)Maths Sem-VIA | C6-Group Theory-I I |
| | Practicals: | Html style , Html list, html block , html table, html link, html images, insert pdf creating webpage related to above topics And solving exercises questions from 5 | B.Sc(H)Maths Sem-III A | SEC-1 Latex and HTML |
| | Tutorials | To discuss the doubt of students and to solve various exercise of automorphism groups of finite and infinite cyclic groups, applications of factor groups to automorphism groups. | B.Sc(H)Maths Sem-VIA | C6-Group Theory-I I |
| | Practicals : | Practical No.2-To draws the surfaces and discuss whether limit exists or not as approaches to the given points. Find the limit, if it exists: Practical No.3-To Draw the tangent plane to the following surfaces at the given point. | B.Sc(H)Maths Sem-IVB | C 7- Multivariate Calculus |
| SEPTEMBER | Theory | Cycle notation for permutations, properties of permutations, even and odd permutations, alternating group, properties of cosets, Lagrange's theorem and consequences including Fermat's Little theorem, External direct product of a finite number of groups | B.Sc(H)Maths Sem-III-B | C6-Group Theory-I |

| | | | |
|---------|---------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------|
| | | | |
| | Tutorials: | To discuss the doubt of students and to solve various exercise of Cycle notation for permutations, properties of permutations, even and odd permutations, alternating group, properties of cosets, Lagrange's theorem and consequences including Fermat's Little theorem, External direct product of | B.Sc(H)Maths Sem-III-B C6-Group Theory-I |
| | Assignment | Plan to give assignment related to syllabus | B.Sc(H)Maths Sem-III-B C6-Group Theory-I |
| | Theory | Characteristic subgroups, Commutator subgroup and its properties. | B.Sc(H)Maths Sem-VIA C6-Group Theory-I I |
| | Practicals: | Design of web pages, To discuss the element of latex, typesetting a simple document. To discuss command of sectioning, assents mathematical symbol in latex, to type example of given books and solving | B.Sc(H)Maths Sem-III A SEC-1 Latex and HTML |
| | Theory | Two –phase method, Big M method and their comparison, Duality, formulation of dual problem. | B.Sc(H)Maths Sem-V-A Linear programming problems and Game theory |
| | Tutorials | To discuss the doubt of students and to solve various exercise of characteristic subgroups, commentator subgroup and its properties. | B.Sc(H)Maths Sem-VIA C6-Group Theory-I I |
| | Practicals : | Practical No.4- Use an incremental approximation to estimate the functions at the given point and compare it with calculated value. Practical No. 5-To find critical points and identify relative maxima, relative minima or saddle points to surfaces, if it exist | B.Sc(H)Maths Sem-IVB C 7- Multivariate Calculus |
| OCTOBER | Theory | Normal subgroups, factor groups, Cauchy's theorem for finite abelian groups. Group homomorphism, properties of homomorphism, Cayley's theorem, Properties of isomorphism. | B.Sc(H)Maths Sem-III-B C6-Group Theory-I |

| | | | | |
|----------|---------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|---------------------------------------------|
| | Tutorials: | To discuss the doubt of students and to solve various exercise of Normal subgroups, factor groups, Cauchy's theorem for finite abelian groups. Group homomorphism, properties of homomorphism, Cayley's theorem, | B.Sc(H)Maths Sem-III-B | C6-Group Theory-I |
| | Test | To take internal Test | B.Sc(H)Maths Sem-III-B | C6-Group Theory-I |
| | Theory | Properties of external direct products, the group of units modulo n as an external direct product, internal direct | B.Sc(H)Maths Sem-VIA | C6-Group Theory-I I |
| | Practicals: | Working Mathematical Typesetting , Arrays , Delimiters, Multiline formulas , Graphics ,PS trick, Plotting of functions in Latex, to type example of given books and solving exercises questions from | B.Sc(H)Maths Sem-III A | SEC-1 Latex and HTML |
| | Test | To take internal Test | B.Sc.(H) Math Sem-V-A | Linear programming problems and Game theory |
| | Tutorials | To discuss the doubt of students and to solve various exercise of properties of external direct products, the group of | B.Sc.(H) Maths Sem-VIA | C6-Group Theory-I I |
| | Practicals : | Practical No.6-To draw the regions D and check whether these regions are of Type I or Type II : | B.Sc.(H) Maths Sem-IVB | C 7- Multivariate Calculus |
| | Test | To give assignment related to above topics and To take internal Lab Test | B.Sc.(H) Math Sem-IVB | C 7- Multivariate Calculus |
| NOVEMBER | Theory | First, Second and Third isomorphism theorems and to revise whole syllabus And , to discuss previous year questions | B.Sc(H)Maths Sem-III-B | C6-Group Theory-I |
| | Tutorials: | To discuss the Doubt of students and to solve various exercise of properties of isomorphism, First, Second and Third isomorphism theorems and to revise | B.Sc. (H) Math Sem-III-B | C6-Group Theory-I |
| | Theory | Fundamental Theorem of finite abelian groups. | B.Sc.(H)Math Sem-VIA | C6-Group Theory-I I |
| | Practicals: | Beamer presentation, examples of given books and solving exercises questions from given references books, giving assignment and taking lab test | B.Sc(H)Maths Sem-III A | SEC-1 Latex and HTML |

| | | | | |
|--|---------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|---------------------|
| | Tutorials | To discuss the doubt of students and to solve various exercise questions. To revise of Introduction to fundamental Theorem of finite abelian groups. Further, to discuss previous year questions papers. | B.Sc(H) Maths Sem-VIA | C6-Group Theory-I I |
| | Practicals : | To revise whole practical | | |

Ms.RajniArora

| Month | | Topics | Course | Paper Code/Name |
|--------|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|------------------------------------|
| JULY | Theory 1 | Introduction to structured programming: data types-simple data types, floating datatypes, character data types, string data types, arithmetic operators and operator precedence, variables and constant declarations, expressions | B.Sc.(H) Maths Sem-V DSE-I | C++ programming |
| | Theory 2 | Introduction to TeX and LaTeX, typesetting a simple document, adding basic information, mathematical symbols, environments, sectioning and | B.Sc.(H) Mathematics Sem-3 | SEC-1 LaTeX and HTML |
| | Theory 3 | First order ordinary differential equations: Basic concepts and ideas. | B.Sc.(H) Chemistry Sem-3 | GE-3 Differential Equations |
| | Practical | Making basic programs in C++, compilation and execution. | B.Sc.(H) Maths Sem-V DSE-I | C++ programming |
| AUGUST | Theory 1 | Input using the extraction operator and cin, output using the insertion operator and cout, pre-processor directives, increment(++) and decrement(--) operations, creating a C++ program, input/output, relational operators, logical operators and logical expressions, if and if-else statement, switch and break statements; related problems. | B.Sc.(H) Maths Sem-V DSE-I | C++ programming |
| | Theory 2 | Footnotes, Assents and symbols, Mathematical typesetting (Elementary and advanced), subscript, superscript, fractions, roots, ellipsis, arrays, delimiters, multiline formulas, spacing and changing style in math mode | B.Sc.(H) Mathematics Sem-3 | SEC-1 LaTeX and HTML |
| | Theory 3 | Exact differential equations, Integrating factors, Bernoulli | B.Sc.(H) Chemistry | GE-3 Differential |

| | | | | |
|-----------|------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------|----------------------------------------|
| | | equations, Orthogonal trajectories of curves, Existence and uniqueness of solutions, Second order differential equations: Homogenous linear equations of second order; related problems | Sem-3 | Equations |
| | Practical | 1. Calculate the Sum of the series $\frac{1}{1} + \frac{1}{2} + \frac{1}{3} + \dots + \frac{1}{N}$ for any positive integer N. 2. Write a user defined function to find the absolute value of an integer. 3. Calculate the factorial of any natural number. 4. Read floating numbers and the average of negative numbers and the average of positive numbers. 5. Write a program that prompts the user to input a positive integer. It should then output a message indicating whether the number is a prime number. 6. Write a program that prompts the user to input the value of a, b and c involved in the equation $ax^2 + bx + c = 0$ and outputs the type of the roots of the equation. | B.Sc.(H) Maths Sem-V DSE-I | C++ programming |
| | Tutorials | To discuss the doubts of students and various exercise questions related to first and second order ordinary differential equations | B.Sc.(H) Chemistry Sem-3 | GE-3 Differential Equations |
| SEPTEMBER | Theory 1 | “for”, “while” and “do-while” loops and continue statement, nested control statement, value returning functions, value versus reference parameters; related problems | B.Sc.(H) Maths Sem-V DSE-I | C++ programming |

| | | | | |
|--|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|------------------------------------|
| | Theory 2 | Graphics in LaTeX, use of PS Tricks | B.Sc.(H) Mathematics Sem-3 | SEC-1 LaTeX and HTML |
| | Theory 3 | Second order homogenous equations with constant coefficients, Differential operator, Euler-Cauchy equation, Existence and uniqueness theory, Wronskian, Non-homogenous ordinary differential equations, Solution by undetermined coefficients, Solution by variation of parameters; related problems | B.Sc.(H) Chemistry Sem-3 | GE-3 Differential Equations |
| | Practicals | <p>7. Write a program that generates Fibonacci numbers.</p> <p>8. Write a program that prompts the user to input five decimal numbers, converts each decimal number to the nearest integer, prints the sum and average of them.</p> <p>9. Write a program that uses <i>while</i> loops to prompt the user to input two integer, output all odd and even numbers between them, output the sum of all even numbers between them, output the sum of the square of the odd numbers between them.</p> <p>10. Write a program that prompts the user to input five decimal numbers, then add them, convert the sum to the nearest integer, and print the result.</p> <p>11. Write a program that prompts the user to enter the lengths of three sides of a triangle and then outputs a message indicating type of triangle.</p> <p>12. Write a value returning function <i>smaller</i> to determine</p> | B.Sc.(H) Maths Sem-V DSE-I | C++ programming |

| | | | | |
|---------|-------------------|-------------------------------------------------------------------------------------------------------------------------|----------------------------|------------------------------------|
| | | the smallest number from a set of numbers. Use this function to determine the smallest number from a set of 10 numbers. | | |
| | Tutorials | To discuss the doubts of students and various exercise questions related to topics done so far. | B.Sc.(H) Chemistry Sem-3 | GE-3 Differential Equations |
| | Assignment | Problems covering all topics done during July- September | B.Sc.(H) Maths Sem-V DSE-I | C++ programming |
| | | Problems covering all topics done during July- September | B.Sc.(H) Mathematics Sem-3 | SEC-1 LaTeX and HTML |
| | | Problems covering all topics done during July- September | B.Sc.(H) Chemistry Sem-3 | GE-3 Differential Equations |
| OCTOBER | Theory 1 | local and global variables, one dimensional array, two-dimensional array, pointer data and pointer variables. | B.Sc.(H) Maths Sem-V DSE-I | C++ programming |
| | Theory 2 | Plotting of functions in LaTeX, Beamer presentation, Introduction to HTML, creating simple web pages | B.Sc.(H) Mathematics Sem-3 | SEC-1 LaTeX and HTML |

| | | | | |
|----------|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|------------------------------------|
| | Theory 3 | Higher order homogenous equations with constant coefficients, System of differential equations, System of differential equations; related problems | B.Sc.(H) Chemistry Sem-3 | GE-3 Differential Equations |
| | Practicals | 13. Write a function that takes as a parameter an integer and returns the number of odd, even, and zero digits. 14. Enter 100 integers into an array and sort them in an ascending/ descending order and print the largest/ smallest integers. 15. Enter 10 integers into an array and then search for a particular integer in the array. 16. Multiplication/ Addition of two matrices using two dimensional arrays. 17. Using arrays, read the vectors and compute the product and addition of these vectors. 18. Read from a text file and write to a text file. | B.Sc.(H) Maths Sem-V DSE-I | C++ programming |
| | Tutorials | To discuss the doubts of students and various exercise questions related to partial differential equations | B.Sc.(H) Chemistry Sem-3 | GE-3 Differential Equations |
| | <u>Mid Term Test</u> | Problems from all the topics covered till date | B.Sc.(H) Maths Sem-V DSE-I | C++ programming |
| | | Problems from all the topics covered in class till that date | B.Sc. (H) Mathematics Sem-3 | SEC-1 LaTeX and HTML |
| | | Problems from all the topics covered in class till that date | B.Sc. (H) Chemistry Sem-3 | GE-3 Differential Equations |
| NOVEMBER | Theory 1 | Revision and doubts sessions | B.Sc.(H) Maths Sem-V DSE-I | C++ programming |

| | | | | |
|--|------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|------------------------------------|
| | Theory 2 | Tricks to customize HTML page and revision of the syllabus | B.Sc. (H) Mathematics Sem-3 | SEC-1 LaTeX and HTML |
| | Theory 3 | Conversion of n th order ODEs to a system, Basic concepts and ideas, Homogenous system with constant coefficients; related problems | B.Sc. (H) Chemistry Sem-3 | GE-3 Differential Equations |
| | Practical | 19. Write a program to create the grids using for loops: 20. Write a function that takes an integer as a parameter and returns the number with its digits reversed. | B.Sc.(H) Maths Sem-V DSE-I | C++ programming |
| | Tutorials | To discuss the doubts of students and last years' question papers | B.Sc.(H) Chemistry Sem-3 | GE-3 Differential Equations |

| | Tutorials: | Relevance of Gandhi in Our life | | |
| | <u>Mid Term Test</u> | | | |
| NOVEMBER | Theory: | Understanding the Overall Gandhi's Philosophy and Contribution Revision of previous topics | B.A (Prog) Vth Semester | Paper GE (Interdisciplinary): Reading Gandhi |
| | Tutorials: | Where do you find Gandhi ji | | |

(Dr Santosh Kumar Singh)

**SEMESTER WISE
TEACHING PLAN (2019-
2020)**

SRI VENKATESWARA COLLEGE

Name of the Faculty: Namita Pandey

Department: Political Science

Semester : I/III/V

| Month | | Topics | Course | Paper Code/Name |
|--------|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|-------------------------------|
| JULY | Theory | Approaches to Understanding Patriarchy. Feminist theory of Sex/Gender Distinction Biologism vs. Social Construction Understanding Patriarchy and Feminism | BA(Hons), Fifth Semester, Political Science | Feminism: Theory and Practice |
| | Practicals | | | |
| | Tutorials | Discussion on Sylvia Walby - Theorizing Patriarchy | | |
| AUGUST | Theory: | Liberal Theory of Feminism. Discussion of First Wave of Feminism with special reference to Mary Wollstonecraft & other Feminist authors. Marxist theory of Feminism with special reference to Marx and Engels perspective on Feminism | | |

| | | | | |
|--|--------------------|------------------------------------------------------------|--|--|
| | | | | |
| | Practicals: | | | |
| | Tutorials: | Understanding Sex/Gender distinctions in day to day living | | |

| | | |
|-----------|-------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | <u>Assignment</u> : | Critically Examine the liberal theory of Feminism from Marxian Perspective |
| SEPTEMBER | Theory: | Socialist Theory of Feminism with Special reference to Dual Patriarchy, Zilla Einstein's notion of Capitalist Patriarchy Emphasis on Women's Question from Neomarxist Perspective Radical Theory of Feminism |
| | Practicals: | |
| | Tutorials: | A discussion on Betty Friedans Feminine Mystique, Simon De Beauvoir's Second Sex |

| | | |
|---------|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | <u>Test</u> | A Critical Comparison between Radical and Socialist Feminism |
| OCTOBER | Theory: | Origin of Feminist in the West: Women in French Revolution, Suffrage Movement in Britain and West, Feminism in Socialist Countries, Women in Russian Revolution, Feminist Movements in China and Cuba, Feminist Issues and Women's Participation in Anti Colonial and national Liberation Movements with special reference to India |
| | Practicals: | |
| | Tutorials: | Class Presentation on Women in Indian National Movement |

| | | |
|----------|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| NOVEMBER | Theory: | <p>Traditional Historiography and Feminist Critiques: A Criticism of Traditional History by Analyzing the Social Reform movement and Indian National Movement & Position of Women in India</p> <p>Family in India: Patrilineal and Matrilineal, Patterns of Consumption, Intra Household Bargaining and Entitlement, Property Rights</p> <p>Women in Work, Sexual Division of Productive and Reproductive Work, Paid, Underpaid and Unpaid work, Visible and Invisible Work, Methods of Computing Women's Work, Female Head Households</p> |
| | Practicals: | |

| | | |
|--|-------------------|--------------------------------------------------------------------------------|
| | Tutorials: | A discussion on domestic labor debate emerging in the context of unpaid labour |
|--|-------------------|--------------------------------------------------------------------------------|

**SEMESTER WISE
TEACHING PLAN (2019-
2020)**

SRI VENKATESWARA COLLEGE

**Name of the Faculty: DR JITA
MISHRA**

Department: POLITICAL SCIENCE

Semester : I/III/V Understanding Political Theory

| Month | | Topics | Course | Paper Code/Name |
|----------|-------------------|----------------------------------------------|----------------------------------------------------------------|--------------------------------------------------|
| JANUARY | Theory | What is Politics Theorising the political | Ba Hons Political science 1st year 1 st semester | Paper 1 1,1 Understanding Political theory |
| | Practicals | | | |
| | Tutorials | Liberal and Marxist view of Politics | | |
| FEBRUARY | Theory: | What is theory Normative and emperical | | |

| | | | | |
|--|--------------------|--------------------------|--|--|
| | Practicals: | | | |
| | Tutorials: | Discussion on positivism | | |

| | | |
|-------|----------------------------|------------------------------------------------------|
| | <u>Assignment :</u> | Nature and purpose of political theory |
| MARCH | Theory: | Marxist , Conservative, anarchist liberal approaches |
| | Practicals: | |
| | Tutorials: | Conservatives |
| | <u>Test</u> | What are the main principles of conservative theory? |

| | | |
|-------|--------------------|---------------------------------------------------------------|
| APRIL | Theory: | Historical approach Feminism.liberal, radical feminism |
| | Practicals: | |
| | Tutorials: | Discussion on liberal feminism |

| | | |
|-----|--------------------|---------------------------------------------|
| MAY | Theory: | Postmodernism Revision of earlier topics |
| | Practicals: | |
| | Tutorials: | Socialist feminism |

Department: Botany

Semester : I/III/V 2019-20

| Month | | Topics | Course | Paper Code/Name |
|--------|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------|------------------|
| JULY | Theory | Introduction to paper and discussion about the paper | B.Sc. (H) Botany Semester V | Plant Physiology |
| | | Cereals-wheat and rice: general account | B.Sc. (H) Botany Semester IV | Economic Botany |
| | Practicals | <ul style="list-style-type: none"> To determine osmotic potential of plant cell sap by plasmolytic method | B.Sc. (H) Botany Semester V | Plant Physiology |
| | | Cereals | B.Sc. (H) Botany Semester IV | Economic Botany |
| | Tutorials | ----- | | |
| AUGUST | Theory: | Essential and beneficial elements, macro and micronutrients, methods of study and use, criteria of essentiality, deficiency symptoms, role, chelating agents | B.Sc. (H) Botany Semester V | Plant Physiology |
| | | Cereals: origin, evolution, morphology, post-harvest processing, uses, green revolution, millets and pseudocereals Legumes: general account, importance to man and ecosystem Beverages: tea, coffee, morphology, processing, uses Oils and fats: description, classification, extraction, uses, health implications, groundnut, coconut, linseed, mustard | B.Sc. (H) Botany Semester IV | Economic Botany |

| | | | | |
|-----------|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------|------------------|
| | Practicals: | <ul style="list-style-type: none"> To determine water potential of given tissue by weight method. To study the effect of two environmental factors (light and wind) on transpiration by excised twig To calculate stomatal index and stomatal frequency from two surfaces of leaves of a mesophyte and xerophytes. To calculate the area of open stoma and percentage of leaf area open through stomata in a mesophyte and xerophytes (both surfaces). | B.Sc. (H) Botany Semester V | Plant Physiology |
| | | <ul style="list-style-type: none"> Legumes Fruits Sugar and starches spices | B.Sc. (H) Botany Semester IV | Economic Botany |
| | Tutorials: | ----- | | |
| SEPTEMBER | Theory: | Nutrient uptake, soil as a nutrient reservoir, transport of ions across cell membrane, passive absorption, electrochemical gradient, facilitated diffusion | B.Sc. (H) Botany Semester V | Plant Physiology |
| | | Natural rubber: para-rubber, tapping, processing and uses Drug-yielding plants: <i>Cinchona</i> , <i>Digitalis</i> , <i>Papaver</i> , <i>Cannabis</i> | B.Sc. (H) Botany Semester IV | Economic Botany |

| | | | | |
|---------|----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------|------------------|
| | Practicals: | <ul style="list-style-type: none"> To study the phenomenon of seed germination To study the induction of amylase activity in germinating barley grains To study the effect of different concentrations of IAA on coleoptiles elongation To demonstrate bolting <ul style="list-style-type: none"> Beverages Oils and fats Essential oil-yielding plants Rubber | B.Sc. (H) Botany Semester V | Plant Physiology |
| | Tutorials: | ----- | | |
| | <u>Assignment :</u> | Given to all students for respective papers | | |
| | | | | |
| OCTOBER | Theory: | Active absorption, role of ATP, carrier systems, proton ATPase pump, ion flux | B.Sc. (H) Botany Semester V | Plant Physiology |
| | | Tobacco: morphology, Processing, uses Fibres: cotton | B.Sc. (H) Botany Semester IV | Economic Botany |
| | Practicals: | <ul style="list-style-type: none"> To demonstrate effect of auxins on rooting To demonstrate suction due to transpiration To demonstrate fruit ripening <ul style="list-style-type: none"> Drug-yielding plants Tobacco Fibre-yielding plants | B.Sc. (H) Botany Semester V | Plant Physiology |
| | | | B.Sc. (H) Botany Semester IV | Economic Botany |
| | Tutorials: | ----- | | |
| | <u>Test</u> | Conducted for all papers | | |

| | | | | |
|----------|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------|------------------|
| NOVEMBER | Theory: | Uniport, co-transport, symport, antiport Fibres: Jute | B.Sc. (H) Botany Semester V | Plant Physiology |
| | | | B.Sc. (H) Botany Semester IV | Economic Botany |
| | Practicals: | <ul style="list-style-type: none"> • Repetitions of experiments which students feel • Revision and test • Repetitions of experiments which students feel • Revision and test | B.Sc. (H) Botany Semester V | Plant Physiology |
| | | | B.Sc. (H) Botany Semester IV | Economic Botany |
| | Tutorials: | ----- | | |

SEMESTER WISE TEACHING PLAN
(July-Dec 2019)
SRI VENKATESWARA COLLEGE

Name of the Faculty: Dr. Aditi Kothari-Chhajer

Department: BOTANY

Semester : I/III/V

| Month | | Topics | Course | Paper |
|--------|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------|-----------------------------------------|
| JULY | Theory | General characteristics, adaptations to land habit, Classification, Range of thallus organization of Bryophytes | B.Sc(P) Life Sciences Sem I | Biodiversity |
| | | Cell Fractionation- Differential and density Gradient centrifugation, sucrose and CsCl ₂ density gradient | B.Sc. (H) Botany Sem V | Analytical techniques in Plant Sciences |
| | | Unit 2 : Photosynthesis –an introduction. Photosynthetic equation, structure of chloroplasts | B.sc. (H) Biol.Sc. Sem I | Light and Life |
| | Practicals | <ul style="list-style-type: none"> Study of Blotting techniques: Southern, Northern and Western, DNA fingerprinting, DNA sequencing, PCR through photographs. | B.Sc. (H) Botany Sem V | Analytical techniques in Plant Sciences |
| | | <ul style="list-style-type: none"> Models of viruses T-Phage and TMV, Line drawing/Photograph of Lytic and Lysogenic Cycle. Types of Bacteria from | B.Sc.(P.) Life Science Sem I | Biodiversity |
| | | <ul style="list-style-type: none"> Demonstration of etiolation and de-etiolation | B.sc. (H) Biol.Sc. Sem I | Light and Life |
| AUGUST | Tutorials | | | |
| | Theory: | Classification , morphology, anatomy and reproduction of Charophyta | B.Sc(P) Life Sciences Sem I | Biodiversity |
| | | Analytical centrifugation, ultracentrifugation, marker enzymes Unit 3: Radioisotopes-introduction, autoradiography, pulse-chase experiment, uses of autoradiography in biological research | B.Sc. (H) Botany Sem V | Analytical techniques in Plant Sciences |
| | | Light and Dark Reactions, Mechanism of Photolysis of water and oxygen evolution, Q- cycle, O ₂ -evolving complex | B.sc. (H) Biol.Sc. Sem I | Light and Life |
| | Practicals: | <ul style="list-style-type: none"> To separate nitrogenous bases by paper chromatography. To separate sugars by thin layer chromatography. Isolation of chloroplasts by differential centrifugation | B.Sc. (H) Botany Sem V | Analytical techniques in Plant Sciences |
| | | <ul style="list-style-type: none"> Gram staining Study of vegetative and reproductive structures of Nostoc, Chlamydomonas (electron micrographs), Oedogonium, Vaucheria, Fucus* | B.Sc.(P.) Life Science Sem I | Biodiversity |

| | | | | |
|-----------|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------|-----------------------------------------|
| | | <ul style="list-style-type: none"> Rhizopus and Penicillium: Asexual stage from temporary mounts and sexual structures through permanent slides. Alternaria: Specimens/photographs and tease mounts. | | |
| | | <ul style="list-style-type: none"> Chromatographic Separation of chloroplast pigments Hills reaction and study of the effect of light intensity Molls Half leaf experiment (Light and CO₂) | B.sc. (H) Biol.Sc. Sem I | Light and Life |
| SEPTEMBER | Theory: | Morphology, anatomy and reproduction of Funaria | B.Sc(P) Life Sciences Sem I | Biodiversity |
| | | Reaction Centres ,C3, C4 and CAM plants and their comparative account, Photoautotrophs, Photoheterotrophs and chemoautotrophs | B.sc. (H) Biol.Sc. Sem I | Light and Life |
| | Practicals: | <ul style="list-style-type: none"> To separate chloroplast pigments by column chromatography. To estimate protein concentration through Lowry's methods. PAGE. AGE | B.Sc. (H) Botany Sem V | Analytical techniques in Plant Sciences |
| | | <ul style="list-style-type: none"> Puccinia: Herbarium specimens of Black Stem Rust of Wheat and infected Barberry leaves; section/tease mounts of spores on Wheat and permanent slides of both the hosts. Agaricus: Specimens of button stage and full grown mushroom; Sectioning of gills of Agaricus. Lichens: Study of growth forms of lichens (crustose, foliose and fruticose) Mycorrhiza: ecto mycorrhiza and endo mycorrhiza (Photographs) Marchantia, Funaria | B.Sc.(P.) Life Science Sem I | Biodiversity |
| | | <ul style="list-style-type: none"> Demonstration of oxygen liberation during photosynthesis using <i>Hydrilla</i>. Mesurement of Light using Luxmeter Blackmanns Law of limiting factors (using <i>Hydrilla</i>) | B.sc. (H) Biol.Sc. Sem I | Light and Life |
| | Tutorials: | | | |
| OCTOBER | Theory: | Ecology and economic importance of bryophytes with special mention of Sphagnum. | B.Sc(P) Life Sciences Sem I | Biodiversity |

| | | | | |
|----------|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------|-----------------------------------------|
| | | Mass spectrometry, X-Ray diffraction, X-Ray crystallography, Electrophoresis (AGE, PAGE, SDS-PAGE), Blotting Techniques (Northern, Southern and Western) | B.Sc. (H) Botany Sem V | DSE-1 |
| | | Oxygenic and Anoxygenic Photosynthesis, Photoperiodism: SDP, LDP and DNP plants, Vernalization | B.sc. (H) Biol.Sc. Sem I | Light and Life |
| | Practicals: | <ul style="list-style-type: none"> Study of different microscopic techniques using photographs/micrographs (freeze fracture, freeze etching, negative staining, positive staining, fluorescence and FISH). Preparation of permanent slides (double staining). ELISA | B.Sc. (H) Botany Sem V | Analytical techniques in Plant Sciences |
| | | <ul style="list-style-type: none"> Selaginella, Equisetum Cycas- morphology (coralloid roots, bulbil, leaf), t.s. coralloid root, t.s. rachis, v.s. leaflet, v.s. microsporophyll, w.m. spores (temporary slides), l.s. ovule, t.s. root (permanent slide) Pinus- morphology (long and dwarf shoots, w.m. dwarf shoot, male and female), w.m. dwarf shoot, t.s. needle, t.s. stem,, l.s./t.s. male cone, w.m. microsporophyll, w.m. microspores (temporary slides), l.s. female cone, t.l.s. & r.l.s. stem (permanent slide) | B.Sc.(P.) Life Science Sem I | Biodiversity |
| | | <ul style="list-style-type: none"> Study of red and blue light on seed germination and development of pigments Study of photoautotrophic and photosynthetic bacteria, chloroplast, quantasome, bioluminescent plants | B.sc. (H) Biol.Sc. Sem I | Light and Life |
| | | | | |
| | Tutorials: | | | |
| NOVEMBER | Theory: | Cycas | B.Sc(P) Life Sciences Sem I | Biodiversity |
| | | FISH, Chromosome Banding and Chromosome Painting | B.Sc. (H) Botany Sem V | DSE-1 |
| | | Discussion of previous years question papers and revision of concepts | B.sc. (H) Biol.Sc. Sem I | Light and Life |
| | Practicals: | <ul style="list-style-type: none"> Revision of experiments and Mock Practical | B.Sc. (H) Botany Sem V | Analytical |
| | | <ul style="list-style-type: none"> Completion of any unfinished practicals | B.Sc.(P.) Life Science Sem I | Biodiversity |
| | | <ul style="list-style-type: none"> Revision of experiments and Mock Practical | B.sc. (H) Biol.Sc. Sem I | Light and Life |
| | Tutorials: | | | |

| SEPTEMBER | Theory: | <ul style="list-style-type: none">• Types and pollination and associated adaptations• Pollen-pistil interaction and process of fertilization• Self incompatibility: types and genetic mechanisms• Methods to overcome incompatibility with examples | B.Sc. (H) Biological Sciences | Growth and Reproduction |

| | | | | |
|--|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|-------------------------|
| | Practicals | <ul style="list-style-type: none">• Observe intra-ovarian pollination, test tube fertilization through photographs/ videos• Observe different pollination mechanisms through photographs/ videos and field visits | B.Sc. (H) Biological Sciences | Growth and Reproduction |
|--|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|-------------------------|

| | | | | |
|-----------------|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|-------------------------|
| OCTOBER | Theory: | <ul style="list-style-type: none"> • Endosperm: types • Embryo: Types of embryogeny and associated structures • Seed: structure, dispersal mechanism • Polyembryony and apomixis | B.Sc. (H) Biological Sciences | Growth and Reproduction |
| | Practicals | <ul style="list-style-type: none"> • Dissection of embryo at various stages of development from <i>Cucumis</i> and <i>Calliandra</i> • Study of seed dispersal mechanism | B.Sc. (H) Biological Sciences | Growth and Reproduction |
| NOVEMBER | Theory: | <ul style="list-style-type: none"> • Genetic regulation of flowering in plants • Genetic regulation of embryogenesis in plants | B.Sc. (H) Biological Sciences | Growth and Reproduction |
| | Practicals | <ul style="list-style-type: none"> • Dissection of endosperm | B.Sc. (H) Biological Sciences | Growth and Reproduction |

SEMESTER WISE TEACHING PLAN SRI VENKATESWARA COLLEGE

Name of the Faculty: Dr. Neeti Mehla

Department: Botany

Academic year- 2019-2020

Semester: I/III/V

| Month | | Topics | Course | Paper Code/Name |
|--------|-------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| JULY | Theory | <ul style="list-style-type: none"> ❖ Introduction to Transcription in prokaryotes ❖ Plant water relations- Concept of water potential ❖ Cytoplasmic Inheritance- Chloroplast variegation in Chloroplast, Kappa particles in paramecium | <ul style="list-style-type: none"> ❖ BSc.Life Sciences (V Sem) ❖ BSc. Botany (H) (V Sem) ❖ BSc. Botany (H) (III Sem) | <ul style="list-style-type: none"> ❖ Cell and molecular Biology (1 Theory) ❖ Plant Physiology(1 Theory) ❖ Plant physiology and Metabolism (GE) 1Theory ❖ Concept of Genetics(2 theory) |
| | Practicals | <p>Introduction to the paper of Cell and molecular Biology</p> <p>Introduction to Mendel's Monohybrid and Dihybrid ratio. Study of Gene interactions ratios 9:7,15:1</p> | <p>BSc.Life Sciences (V Sem)</p> <p>Bsc .Botany (H) III Semester</p> | <p>Cell and molecular Biology</p> <p>Concepts of Genetics</p> |
| | Tutorials | | | |
| AUGUST | Theory: | <ul style="list-style-type: none"> ❖ Transcription in prokaryotes and Eukaryotes and their differences ❖ Pathway of Water movement, concept of Symplast and Apoplast, Ascent of Sap and Transpiration. Factors affecting transpiration, mechanism of stomatal movement, Antitranspirants and Guttation ❖ Types of mutations- somatic, germinal, spontaneous, induced auxotrophic, biochemical and lethal mutations. Types of mutations- back, suppressor, substitution and frameshift mutations. | <ul style="list-style-type: none"> ❖ BSc.Life Sciences (V Sem) ❖ BSc. Botany (H) (V Sem) ❖ BSc. Botany (H) (III Sem) | <ul style="list-style-type: none"> ❖ Cell and Molecular Biology ❖ Plant physioplogy ❖ Concepts of Genetics |

| | | | | |
|-----------|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | | Effect of physical mutagens- ionizing and non-ionizing radiations. Effect of chemical mutagens- base analogs, 5 Bromo uracil, nitrous acid, acridines and alkylating agents. | | |
| | Practicals: | Study the effect of temperature and organic solvent on semipermeable membrane. Study of mitosis and meiosis To measure the cell size through micrometry. To study structure of plant cell Gene interaction using rajma seeds, complementary genes and dominant epistasis (9:6:1,12:3:1,13:3 and 9:3:4 ratios using Rajmah seeds Pedigree analysis for dominant and recessive autosomal and sex linked traits. To study various divisional stages of Meiosis using <i>Allium cepa</i> flower buds | BSc.Life Sciences (V Sem) BSc. Botany (H) (III Sem) | Cell and Molecular Biology Concepts of Genetics |
| | Tutorials: | | | |
| SEPTEMBER | Theory: | Different types of RNA and Translation in Prokaryotes and Eukaryotes. Translocation in the phloem- Pressure flow model for translocation of photoassimilates from source to sink cells. Detection of mutations- CLB method of mutation. Transposons, DNA repair mechanisms Structural changes in chromosomes- Deletion-definition, causes, mechanism, genetic effects examples and significance. Duplication, inversion and translocation-definition, causes, mechanism, genetic effects, examples and significance. Numerical changes in chromosomes. | ❖ BSc.Life Sciences (V Sem) ❖ BSc. Botany (H) (V Sem) ❖ GE III Sem ❖ BSc. Botany (H) (III Sem) | ❖ Cell and molecular biology ❖ Plant Physiology ❖ Plant Physiology and Metabolism ❖ Concepts of Genetics |
| | Practicals: | Demonstration of Plasmolysis and Deplasmolysis. To study structure of NPC, special chromosomes and study of DNA packaging. Preparation of mitochondria from cheek epithelial cells. To study structure of Animal cell | BSc. Botany (H) (III Sem) | Concepts of Genetics |

| | | | | |
|---------|---------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------|
| | | And striated muscle fibre. Multiple alleles – concept and mechanism, blood typing (A,B,O and Rh factor). Study of various genetic Disorders like Sickle cell Anemia,Xeroderma pigmentosum,Albinism and Red green color Blindness To study various divisional stages of Meiosis using <i>Allium cepa</i> flower buds | | |
| | Tutorials: | | | |
| | <u>Assignment:</u> | | Bsc. Botany (H) IIISem | Concepts of Genetics |
| OCTOBER | Theory: | Genetic Code and principles of microscopy.Confocal microscopy,phase contrast microscopy and fluorescence microscopy.SEM,TEM Phloem loading and Phloem unloading. Numerical changes in chromosomes- euploidy, polyploidy- auto and allo polyploidy, mechanism, non-disjunction of chromosomes and examples- <i>Triticale Gossipium Raphanobrassica</i> ,wheat and modern bread wheat. Aneuploidy- causes and mechanism, examples <i>Datura</i> spp.,Down syndrome, Turner syndrome and klinefelter syndrome. | ❖ BSc.Life Sciences (V Sem) ❖ BSc. Botany (H) (V Sem) ❖ Botany GE ❖ BSc. Botany (H) (III Sem) | ❖ Cell and Molecular Biology ❖ Plant Physiology ❖ Plant physiology and Metabolism ❖ Concept of genetics |
| | Practicals: | To study prokaryotic cell and Eukaryotic cell Study cell organelles. Demonstration of Dialysis Preparation of the karyotype and Idiogram from somatic metaphase chromosome. Study of Aneuploidy in humans- Down syndrome, Turner syndrome, Klinefelter syndrome.Study of translocation ring and laggard, inversion bridge and mutlivalents. Meiosis from onion flower buds | BSc.Life Sciences (V Sem) BSc. Botany (H) (III Sem) | Cell and Molecular Biology Concepts of Genetics |
| | Tutorials: | | | |
| | <u>Test</u> | | ❖ BSc.Botany (H)III sem | Concept of Genetics |

| | | | | |
|----------|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------|
| NOVEMBER | Theory: | <p>X-ray diffraction analysis.</p> <p>Source and Sink relationship</p> <p>Classical versus molecular concept of gene, complementation test for functional allelism</p> | <p>❖ BSc.Life Sciences (V Sem)</p> <p>❖ BSc. Botany (H) (V Sem)</p> <p>❖ GE Plant Physiology and Metabolism</p> <p>❖ BSc. Botany (H) (III Sem)</p> | <p>❖ Cell and Molecular Biology</p> <p>❖ Plant Physiology</p> <p>❖ Concept of Genetics</p> |
| | Practicals: | Revision and Test for all courses | <p>BSc.Life Sciences (V Sem)</p> <p>BSc. Botany (H) (V Sem)</p> <p>Botany GE III – Plant physiology and Metabolism</p> <p>BSc. Botany (H) (III Sem)</p> | <p>Cell and Molecular Biology</p> <p>Plant physiology</p> <p>Plant physiology and Metabolism</p> <p>Concepts of Genetics</p> |
| | Tutorials: | | | |

SEMESTER WISE TEACHING PLAN (2019-2020)
SRI VENKATESWARA COLLEGE

Name of the Faculty: Dr. Yogendra Kumar Gautam

Department: Botany

Semester: I/III/V

| Month | | Topics | Course | Paper Code/Name |
|-----------|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|----------------------------------|
| JULY | Theory | Discovery and general structure of Viruses. | B.Sc.(H) Botany (Sem: I) | BHCC-I/ Microbio. & Phycology |
| | | Endosperm: General introduction & Types. | B.Sc. Life Sc. (Sem: III) | CC-3/Plant Anatomy & Embryology |
| | | Introduction to microbial world. General characteristics of Algae. | B.Sc. Life Sc. (Sem: I) | LSCC-2/Biodiversity |
| | Practicals | T.S. of Stem: Monocot: <i>Zea mays</i> ; Dicot: <i>Helianthus</i> | B.Sc. Life Sc. (Sem: III) | CC-3/Plant Anatomy & Embryology |
| | | Study of vegetative and reproductive structures of <i>Nostoc</i> , through temporary preparations and permanent slides. | B.Sc. Life Sc. (Sem: I) | LSCC-2/Biodiversity |
| | Tutorials | ----- | | |
| AUGUST | Theory: | Photosynthesis: Introduction, Historical contribution of Julius von Sachs, Blackman, Emerson, Engelmann, Hill, Arnon. | B.Sc.(H) Botany (Sem: III) | GE-III/Plant Physio.& Metabolism |
| | | Viruses: Discovery, physiochemical and biological characteristics; classification (Baltimore). General structure with special reference to viroids and prions. | B.Sc.(H) Botany (Sem: I) | BHCC-I/ Microbio. & Phycology |
| | | Structure, functions and development of endosperm; | B.Sc. Life Sc. (Sem: III) | CC-3/Plant Anatomy & Embryology |
| | | Bacteria — Discovery, General characteristics and cell structure. | B.Sc. Life Sc. (Sem: I) | LSCC-2/Biodiversity |
| | Practicals: | Study of Dicot and Monocot leaf. Adaptive anatomy: Xerophyte (<i>Nerium</i> leaf) and Hydrophyte (<i>Hydrilla</i> stem). T.S. of Root: Dicot: <i>Helianthus</i> T.S. of root: Monocot: <i>Zea mays</i> | B.Sc. Life Sc. (Sem: III) | CC-3/Plant Anatomy & Embryology |
| | | Study of Vegetative and Reproductive Structures in <i>Vaucheria</i> and <i>Ectocarpus</i> through temporary preparations and permanent slides. Study of Asexual stage from Temporary/ Tease Mounts in <i>Rhizopus</i> and <i>Alternaria</i> . Study of Asexual stage from Temporary/ Tease Mounts in <i>Penicillium</i> . | B.Sc. Life Sc. (Sem: I) | LSCC-2/Biodiversity |
| | Tutorials: | ----- | | |
| | | | | |
| SEPTEMBER | Theory: | Photosynthetic pigments (chlorophyll a and b, xanthophyll, carotene); Photosystem I and II, reaction center, antenna molecules. Electron transport and mechanism of ATP synthesis, | B.Sc.(H) Botany (Sem: III) | GE-III/Plant Physio.& Metabolism |

| | | | | |
|---------|---------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|-------------------------------------|
| | | Viruses-General account of replication, DNA virus (T-phage), lytic and lysogenic cycle; RNA virus (TMV). Viral diseases | B.Sc.(H) Botany (Sem: I) | BHCC-I/ Microbio. & Phycology |
| | | Embryo - Dicot and monocot embryo; Embryo-endosperm relationship. Vascular cambium – structure and function. | B.Sc. Life Sc. (Sem: III) | CC-3/Plant Anatomy & Embryology |
| | | Bacteria Reproduction — vegetative, asexual and recombination (conjugation, transformation and transduction); Economic importance. | B.Sc. Life Sc. (Sem: I) | LSCC-2/Biodiversity |
| | Practicals: | Study of embryo sac showing egg apparatus, microsporogenesis and Polygonum type of embryo sac. Structure of anther (young and mature), tapetum (amoeboid and secretory) (Permanent slides) Dissection of endosperm from developing seeds. | B.Sc. Life Sc. (Sem: III) | CC-3/Plant Anatomy & Embryology |
| | | Black Stem Rust of Wheat and Infected Barberry Leaves (Herbarium Specimens/ Photographs) <i>Puccinia</i> -Tease Mounts of Spores on Wheat, Section of infected portion of Wheat and Barberry (Permanent Slides). <i>Marchantia</i> -Morphology of Thallus, W.M. Rhizoids, V.S. Thallus through Gemma Cup, W.M. Gemma (all temporary slides), L.S. Sporophyte (Permanent slide). <i>Funaria</i> - Morphology of Gametophyte bearing Sporophyte, W.M. Rhizoids, W.M. Leaf, W.M. Operculum, W.M. Peristome, W.M. Spores (all temporary slides), L.S. Capsule (Permanent Slide). | B.Sc. Life Sc. (Sem: I) | LSCC-2/Biodiversity |
| | Tutorials: | ----- | | |
| | Assignment : | Assignment Topics allotted to students from whole the syllabus. Assignments collected | B.Sc. Life Sc. (Sem: III) | CC-3/Plant Anatomy & Embryology |
| | Theory: | C3 pathway; C4 and CAM plants, Photorespiration Nitrogen metabolism- Biological nitrogen fixation. | B.Sc.(H) Botany (Sem: III) | GE-III/Plant Physio.& Metabolism |
| OCTOBER | | Bacteria: Discovery, general characteristics. Types-archaebacteria, eubacteria, wall-less forms (mycoplasma and spheroplasts) Cell structure, nutritional types, | B.Sc.(H) Botany (Sem: I) | BHCC-I/ Microbio. & Phycology |
| | | Vascular cambium- Development, elements and seasonal activity. | B.Sc. Life Sc. (Sem: III) | CC-3/Plant Anatomy & Embryology |
| | | Viruses – Discovery; General Structure- RNA virus (TMV) and DNA virus (T- phage). | B.Sc. Life Sc. (Sem: I) | LSCC-2/Biodiversity |
| | Practicals: | Dissection of endosperm from developing seeds. Calculation of percentage of germinated pollen in a given medium. Ultrastructure of mature egg apparatus cells through electron micrographs. Pollination types and seed dispersal mechanisms (including appendages, aril, caruncle). | B.Sc. Life Sc. (Sem: III) | CC-3/Plant Anatomy & Embryology |
| | | <i>Selaginella</i> - Morphology, Temporary Slides of T.S. Stem, W.M. Strobilus, W.M. Microsporophyll and Megasporephyll, L.S. Strobilus (Permanent Slide). <i>Equisetum</i> - Morphology, Temporary Slides of T.S. Stem (Internode), L.S. / T.S. Strobilus, W.M. Sporangophore, W.M. Spores (Wet and Dry). | B.Sc. Life Sc. (Sem: I) | LSCC-2/Biodiversity |

| | | | | |
|----------|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|----------------------------------|
| | Tutorials: | ----- | | |
| | Test | Scheduled the date after mid sem. break | | |
| NOVEMBER | Theory: | Nitrogen metabolism- Nodulation, nitrate and ammonia assimilation. Dinitrogenase, NR, NiR, transamination. | B.Sc.(H) Botany (Sem: III) | GE-III/Plant Physio.& Metabolism |
| | | Bacteria: Reproduction-vegetative, asexual and recombination (conjugation, transformation and transduction), Bacterial diseases. Applied Microbiology: Economic importance of viruses and bacteria. Criteria, system of Fritsch, and evolutionary classification of Lee, significant contributions of important phycologists (F.E. Fritsch, G.M. Smith, R.N. Singh, T.V. Desikachary, H.D. Kumar, M.O.P.Iyengar). | B.Sc.(H) Botany (Sem: I) | BHCC-I/ Microbio. & Phycology |
| | | Wood (heartwood and sapwood). Secondary growth in root and stem. | B.Sc. Life Sc. (Sem: III) | CC-3/Plant Anatomy & Embryology |
| | | Economic importance of viruses. Economic importance of bacteria. | B.Sc. Life Sc. (Sem: I) | LSCC-2/Biodiversity |
| | Practicals: | Types of ovules: anatropous, orthotropous, circinotropous, amphitropous/ campylotropous. Study of meristems through permanent slides. Tissues (parenchyma, collenchyma and sclerenchyma); Macerated xylary elements, Phloem. | B.Sc. Life Sc. (Sem: III) | CC-3/Plant Anatomy & Embryology |
| | | <i>Cycas</i> - Morphology (Coralloid Roots, Leaf, Microsporophyll, Megasporephyll), T.S. Coralloid Root, V.S. Leaflet, V.S. Microsporophyll, W.M. Spores, L.S. Ovule <i>Pinus</i> - Morphology (Long and Dwarf Shoots, Male and Female Cones), W.M. Dwarf Shoot, T.S. Needle, L.S/ T.S. Male Cone, W.M. Microsporophyll, W.M. Microspores, L.S Female Cone. <i>Pteris</i> - Morphology, V.S. Sporophyll, W.M. Sporangium, W.M. Spores, W.M. Prothallus with Sex Organs. | B.Sc. Life Sc. (Sem: I) | LSCC-2/Biodiversity |
| | Tutorials: | ----- | | |

**SEMESTER WISE
TEACHING PLAN
SRI VENKATESWARA COLLEGE**

Name of the Faculty: Dr. Tabassum Afshan

Department: Botany

Semester : III

| Month | | Topics | Course | Paper Code/Name |
|--------|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------|----------------------------------------|
| AUGUST | Theory | 1.Classification of tissues, Simple and Complex Tissues | B.Sc. Botany (Hons) | CC – V (Anatomy of Angiosperms) |
| | | 2.Methodology of Ethnobotanical studies : a).Field work b).Herbarium c).Ancient literature d).Archaeological findings e). Temples and sacred places | B.Sc. Botany (Hons) B.Sc. Life Science | SEC - Ethnobotany SEC - Ethnobotany |
| | Practicals | 1. Dicot, Monocot Stem—T.S. Dicot, Monocot Root—T.S. | B.Sc. Botany (Hons) | CC – V (Anatomy of Angiosperms) |
| | | 2.Collection methods of plants from the field | B.Sc. Life Science | SEC - Ethnobotany |
| | | 3. Study of meristems through permanent slides and photographs | B.Sc. Life Science | CC – III /Plant Anatomy and Embryology |
| | | 4. Tissues (parenchyma, collenchyma and sclerenchyma), Macerated xylary elements, Phloem (permanent slides, photographs) | | |
| | | 5.Stem : Monocot: <i>Zea mays</i> , Dicot : <i>Helianthus</i> | | |
| | Tutorials | | | |

| | | | | |
|-----------|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------|
| SEPTEMBER | Theory: | <p>1. Pits and plasmodesmata, Wall ingrowths and transfer cells, adcrustation and incrustation, Ergastic substances.</p> <p>2. Stem : Organisation of shoot apex(Apical cell theory, Histogen theory, Tunica Corpus theory, Continuing meristematic residue, Cytohistological zonation.</p> <p>3.Role of Ethnobotany in modern medicine : Medico Ethnobotanical sources in India, significance of the following plants in Ethnobotanical practices(along with their habitat and morphology)a)<i>Azardirachta indica</i>, b)<i>Ocimum sanctum</i>, c)<i>Vitex negundo</i>, d)<i>Gloriosa superba</i></p> | <p>B.Sc. Botany (Hons)</p> <p>B.Sc. Botany (Hons) B.Sc. Life Science</p> | <p>CC – V / Anatomy of Angiosperms</p> <p>SEC : Ethnobotany SEC : Ethnobotany</p> |
| | Practicals: | <p>1. Parenchyma, Collenchyma, Sclerenchyma – P.S.</p> <p>2.Periderm, Lenticels, Trichomes, Stomata.</p> <p>3. Dicot, Monocot leaf -T.S.</p> <p>4. Preparation and labelling of Herbarium specimens (10 plants)</p> <p>5. Extraction of crude extracts from various ethnobotanically related plant material</p> <p>6.Root : Monocot: <i>Zea mays</i> , Dicot : <i>Helianthus</i></p> <p>7. Leaf : Dicot and Monocot (only permanent slides)</p> <p>8. Adaptive anatomy : Xerophyte (Nerium leaf), Hydrophyte (Hydrilla stem)</p> <p>9. Structure of anther (young and mature)</p> | <p>B.Sc. Botany (Hons.)</p> <p>B.Sc. Life Science</p> <p>B.Sc. Life Science</p> | <p>CC – V / Anatomy of Angiosperms</p> <p>SEC : Ethnobotany</p> <p>CC – III /Plant Anatomy and Embryology</p> |
| | Tutorials: | | | |

| | | | | |

| | | | | |
|----------|----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------|
| | Practicals: | <p>1. Kranz anatomy, Hydrophytes, Xerophytes, Heartwood, Sapwood, Tyloses, Secretory tissues –Lithocyst, Cavities, Laticifers</p> <p>2. Field Survey and collection of information on Ethnobotanical uses from traditional healers (any 2)</p> <p>3. To develop scientific knowledge of plants used for treatment of various purposes in ancient literature.</p> <p>4. Types of ovules : anatropous, orthotropous, circinotropous, amphitropous, campylotropous</p> <p>5. Female gametophyte: Polygonum (monosporic) type of Embryo sac (permanent slides/ photographs)</p> <p>6. Pollination types and seed dispersal mechanism (including appendages, aril, caruncle) photographs/ specimens</p> | <p>B.Sc. Botany (Hons.)</p> <p>B.Sc. Life Science</p> <p>B.Sc. Life Science</p> | <p>CC – V / Anatomy of Angiosperms</p> <p>SEC Ethnobotany</p> <p>CC – III /Plant Anatomy and Embryology</p> |
| | Tutorials: | | | |
| | <u>Assignment :</u> | Entire syllabus | | |
| NOVEMBER | Theory: | <p>1. Vascular Cambium – Structure, Function and Seasonal Activity of Cambium, Secondary growth in root and Stem.</p> <p>2. Wood – Axially and radially oriented elements, types of rays and axial Parenchyma, cyclic aspects and reaction wood, sap wood and heart wood, ring and diffuse porous wood, early and late wood, tyloses, dendrochronology</p> <p>3. Periderm – Development and composition of Periderm, Rhytidome and lenticels</p> <p>4. Role of Ethnic groups in conservation of plant genetic resources, endangered taxa and forest management (participatory management), Ethnobotany as a tool to protect interests of ethnic groups, sharing of wealth concept with few examples from India</p> <p>5. Ethnobotany and legal aspects – Biopiracy, Intellectual property rights and traditional knowledge</p> | <p>B.Sc. Botany (Hons.)</p> <p>B. Sc. Botany (Hons)</p> <p>B.Sc. Life Science</p> | <p>CC – V / Anatomy of Angiosperms</p> <p>SEC : Ethnobotany</p> <p>SEC : Ethnobotany</p> |

| | | | | |
|--|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------|
| | Practicals: | 1.Epidermal hairs, Trichomes, Maceration, Ring porous, Diffuse porous(Photographs) 2. Knowledge of some plants used in various ceremonies 3.Dissection of embryo/ endosperm from developing seeds 4. Calculation of percentage of germinated pollen in a given medium | B.Sc. Botany (Hons.) B.Sc. Botany (Hons) B.Sc. Life Science | CC – V / Anatomy of Angiosperms SEC : Ethnobotany CC – III /Plant Anatomy and Embryology |
| | Tutorials: | | | |

SRI VENKATESWARA COLLEGE

Name of the Faculty: Dr. Pamil Tayal

Department: Botany

Semester : I/ III/ V

| Month | | Topics | Course | Paper Code/Name |
|-------|-------------------|-----------------------------------------------------------------------------------------------------------------------------------|---------------------------------------|----------------------------------------------------|
| JULY | Theory | Overview of Prokaryotic and eukaryotic cells, History and cell Theory, Differences between Plant and Animal Cells | B.Sc.(H) Biological Science (III Sem) | Concepts in Cell Biology (1 Theory) |
| | | Structural organization of chloroplast, primary and accessory pigments | B.Sc. Botany (H) (I Sem) | Biomolecules and Cell Biology (2 Theory) |
| | | Statistics, data, population | B.Sc. Botany (H) (V Sem) | Analytical Techniques in Plant Sciences (1 Theory) |
| | | Collection of data primary and secondary - types | B.Sc. Botany (H) (V Sem) | Biostatistics (1 Theory) |
| | Practicals | Study of plant cell structure with the help of epidermal peel of Onion/ Crinum/ Rhoecy, etc. | B.Sc. Botany (H) (I Sem) | Biomolecules and Cell Biology |
| | | Study of Prokaryotic and eukaryotic structures using photographs Study of Cell wall, primary and secondary pits, plasmodesmata | B.Sc.(H) Biological Science (III Sem) | Concepts in Cell Biology |
| | | Collection methods of plants from the field | BSc.Life Sciences (V Sem) | Ethnobotany |

| | | | | |

|-----------|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|----------------------------------------------------|
| | Tutorials: | | | |
| SEPTEMBER | Theory: | Regulation of cell cycle, Microscopy (SEM, TEM, STEM, Fluorescence) Flow Cytometry | BSc.(H) Biological Science (III Sem) | Concepts in Cell Biology (1 Theory) |
| | | Golgi apparatus, its organization and functions, Lysosomes, Eukaryotic cell cycle, regulation of cell cycle, mitosis and meiosis | BSc. Botany (H) (I Sem) | Biomolecules and Cell Biology (2 Theory) |
| | | Arithmetic mean, mode, median; Measures of dispersion: Range, mean deviation, variation, standard deviation | BSc. Botany (H) (V Sem) | Analytical Techniques in Plant Sciences (1 Theory) |
| | | Classification - tabulation and presentation of data - sampling methods. | BSc. Botany (H) (V Sem) | Biostatistics (1 Theory) |
| | | | | |
| | Practicals: | Study of cell and its organelles with the help of electron micrographs, To determine the enzyme activity assessment in plant extract (Catalase, Amylase and Urease), Study the effect of plasmolysis and deplasmolysis Study the effect of organic solvent on membrane permeability | BSc. Botany (H) (I Sem) | Biomolecules and Cell Biology |
| | | Study of the microscopic techniques – Florescence microscopy, autoradiography, freeze fracture, , freeze etching and shadow casting. | BSc.(H) Biological Science (III Sem) | Concepts in Cell Biology |
| | | Preparation and labelling of Herbarium specimens (10 plants) Extraction of crude extracts from various ethnobotanically related plant material | BSc.Life Sciences (V Sem) | Ethnobotany |

| | | | | |
|--|---------------------------|---------------------------------|--|--|
| | Tutorials: | | | |
| | <u>Assignment:</u> | Topics from the entire syllabus | | |

| | | | | |
|---------|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| OCTOBER | Theory: | <p>Cell wall – distribution, chemical composition, functions and variations in prokaryotic and eukaryotic cells, primary and secondary cell walls, types of pits in plant cells</p> <p>Role and structure of microtubules, microfilaments and intermediary filaments, structure of peroxisomes and its function</p> <p>Principles of microscopy; Light microscopy; Fluorescence microscopy; Confocal microscopy; Use of fluorochromes: (a) Flow cytometry (FACS)</p> <p>Chi-square test for goodness of fit.</p> | <p>BSc.(H) Biological Science (III Sem)</p> <p>BSc. Botany (H) (I Sem)</p> <p>BSc. Botany (H) (V Sem)</p> <p>BSc. Botany (H) (V Sem)</p> | <p>Concepts in Cell Biology (1 Theory)</p> <p>Biomolecules and Cell Biology (2 Theory)</p> <p>Analytical Techniques in Plant Sciences (1 Theory)</p> <p>Biostatistics (1 Theory)</p> |
| | Practicals: | <p>Study the effect of temperature on membrane permeability</p> <p>Study of cell and its organelles with the help of electron micrographs</p> <p>Study of electron micrographs of organelle</p> <p>Cytochemical staining of DNA by feulgen, Cytochemical staining of Proteins by bromophenol blue, Cytochemical staining of Polysaccharides by PAS</p> <p>Knowledge of some plants used in various ceremonies</p> | <p>BSc. Botany (H) (I Sem)</p> <p>BSc.(H) Biological Science (III Sem)</p> <p>BSc.Life Sciences (V Sem)</p> | <p>Biomolecules and Cell Biology</p> <p>Concepts in Cell Biology</p> <p>Ethnobotany</p> |

| | | | | |

SEMESTER WISE TEACHING PLAN SRI VENKATESWARA COLLEGE

Name of the Faculty: Dr. Sunita Yadav
Semester : I/III/V

Department: Botany

| Month | | Topics | Course | Paper Code/Name |
|--------|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------|------------------------------------|
| JULY | Theory | Introduction to paper and discussion about the paper | B.Sc. (H) Botany Semester V | Plant Physiology |
| | | Introduction to paper Unit 6: Structure and properties of enzymes | GE-III | Plant physiology and metabolism |
| | Practicals | <ul style="list-style-type: none"> To determine osmotic potential of plant cell sap by plasmolytic method | B.Sc. (H) Botany Semester V | Plant Physiology |
| | | <ul style="list-style-type: none"> To determine osmotic potential of plant cell sap by plasmolytic method | GE-III | Plant physiology and metabolism |
| | Tutorials | ----- | | |
| AUGUST | Theory: | Unit-5 Plant Growth regulators: Discovery, structure, bioassay and physiological roles | B.Sc. (H) Botany Semester V | Plant Physiology |
| | | Unit 6: Mechanism of enzyme catalysis and inhibition Unit 7: Biological nitrogen fixation, nitrate and ammonium assimilation Unit8: Physiological roles of auxins, gibberellins | GE-III | Plant physiology and metabolism |

| | | | | |
|-----------|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------|---------------------------------------------------------|
| | Practicals: | <ul style="list-style-type: none"> To determine water potential of given tissue by weight method. To study the effect of two environmental factors (light and wind) on transpiration by excised twig To calculate stomatal index and stomatal frequency from two surfaces of leaves of a mesophyte and xerophytes. To calculate the area of open stoma and percentage of leaf area open through stomata in a mesophyte and xerophytes (both surfaces). <ul style="list-style-type: none"> Comparison of the rate of respiration in any two parts of a plant. To study the effect of two environmental factors (light and wind) on transpiration by excised twig To demonstrate hill reaction | B.Sc. (H) Botany Semester V | Plant Physiology |
| | Tutorials: | ----- | | |
| SEPTEMBER | Theory: | Unit-6 physiology of flowering: photoperiodism, Flowering stimulus, florigen, vernalization, seed dormancy Unit-7 Phytochrome: discovery, chemical nature, role in photomorphogenesis, LER and HIR, mode of action Unit 8: Physiological roles of cytokinins, ABA, ethylene Unit 9: Photoperiodism, phytochrome, red and far red responses on photomorphogenesis, vernalization Unit 1: Importance of water, water potential and its components, Transpiration, Root pressure, Guttation | B.Sc. (H) Botany Semester V GE-III | Plant Physiology Plant physiology and metabolism |

| | | | | |
|---------|---------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------|---------------------------------|
| | Practicals: | <ul style="list-style-type: none"> To study the phenomenon of seed germination To study the induction of amylase activity in germinating barley grains To study the effect of different concentrations of IAA on coleoptiles elongation To demonstrate bolting | B.Sc. (H) Botany Semester V | Plant Physiology |
| | | <ul style="list-style-type: none"> To study the activity of catalase To study the effect of pH on catalase To study the effect of enzyme concentration on catalase | GE-III | Plant physiology and metabolism |
| | Tutorials: | ----- | | |
| | Assignment : | Given to all students for respective papers | | |
| OCTOBER | Theory: | Unit-1 Plant water relationship: water potential, aquaporins, pathway of water movement, root pressure, guttation, ascent of sap, transpiration | B.Sc. (H) Botany Semester V | Plant Physiology |
| | | Unit 2: Essential elements, macro and micronutrients, criteria of essentiality of elements, role of essential elements Unit 3: Composition of phloem sap, girdling experiment, pressure flow model, phloem loading and unloading Unit 5: Glycolysis, anaerobic respiration | GE-III | Plant physiology and metabolism |
| | Practicals: | <ul style="list-style-type: none"> To demonstrate effect of auxins on rooting To demonstrate suction due to transpiration To demonstrate fruit ripening | B.Sc. (H) Botany Semester V | Plant Physiology |
| | | <ul style="list-style-type: none"> To demonstrate bolting To demonstrate effect of auxins on rooting To demonstrate suction due to transpiration | GE-III | Plant physiology and metabolism |
| | Tutorials: | ----- | | |
| | Test | Conducted for all papers | | |

| | | | | |
|----------|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------|---------------------------------|
| NOVEMBER | Theory: | Unit-4 translocation in the phloem: pressure-flow hypothesis, phloem loading and unloading, source-sink relationship Revision and test | B.Sc. (H) Botany Semester V | Plant Physiology |
| | | Unit 5: TCA cycle, oxidative phosphorylation Revision and test | GE-III | Plant physiology and metabolism |
| | Practicals: | <ul style="list-style-type: none"> • Repetitions of experiments which students feel • Revision and test | B.Sc. (H) Botany Semester V | Plant Physiology |
| | | <ul style="list-style-type: none"> • Repetitions of experiments which students feel • Revision and test | GE-III | Plant physiology and metabolism |
| | Tutorials: | ----- | | |

SEMESTER WISE TEACHING PLAN
2019-2020
ODD SEMESTER

SEMESTER WISE TEACHING PLAN
SRI VENKATESWARA COLLEGE
(2019-20) (July-December)

Name of the Faculty: Dr. S. Venkata Kumar

Department: Commerce

Semester: I

| Month | Type of Class | Topics | Course | Paper Code/Name |
|-----------------------|-------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|---------------------------|
| JULY-2019 | Theory | 1. The Indian Contract Act 1872: (a) Meaning, characteristics and kinds. (b) Essentials of a valid contracts- offer and acceptance, | 1. B.Com. (Hons) – IA | 1. BCH 1.3: Business Laws |
| | Practicals | | | |
| | Tutorials | 1. Case laws of offer and acceptance presented by students. | 1. B.Com. (Hons) - IA | 1. BCH 1.3: Business Laws |
| Month | Type of Class | Topics | Course | Paper Code/Name |
| AUGUST-2019 | Theory | 1. The Indian contract Act 1872: consideration, contractual capacity, free consent, legality of objects, void agreements, | 1.Com. (Hons) – IA | 1. BCH 1.3: Business Laws |
| | Practicals | | | |
| | Tutorials | 1. Presentation of case studies vis-à-vis rules. | 1. B.Com. (Hons) - IA | 1. BCH 1.3: Business Laws |
| Month | Type of Class | Topics | Course | Paper Code/Name |
| SEPTEMBER-2019 | Theory | 1. The Indian contract Act, 1872: discharge of contracts- modes of discharge including breach and its remedies, contingent contracts, quasi contracts, contract of indemnity and guarantee, contract of bailment and contract of Agency. 2. The sales of goods Act, 1930: the contract of sale, meaning and difference between sale and agreement to sell, | 1. B.Com. (Hons) – IA | 1. BCH1.3: Business Laws |
| | Practicals | | | |

| | | | | |
|----------------------|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|----------------------------|
| | Tutorials | 1. Case study on contractual capacity & legality of objects | 1. B.Com. (Hons) - IA | 1. Business Laws |
| | Assignment | 1. Topic allots for 1st assignment and collect it and topic allot for 2 nd Assignment also. | 1. B.Com. (Hons) – IA | 1.BCH 1.3: Business Laws |
| Month | Type of Class | Topics | Course | Paper Code/Name |
| OCTOBER-2019 | Theory | 1. The sales of goods Act, 1930: Conditions and warranties, transfer of ownerships in goods including sale by non-owners, performance of contract of sale. | 1.B.Com. (Hons) – IA | 1. BCH 1.3 Business Laws |
| | Practicals | | | |
| | Tutorials | 1. Case study presentation by student on sale of Goods Act 1930. | 1. B.Com. (Hons) - IA | 1. BCH 1.3: Business Laws |
| | Test | 1. 2nd week of October give Notice for conducting Internal Examination date Schedule and collect 2 nd Assignment also. | 1 B.Com. (Hons) - IA | 1. BCH 1.3: Business Laws |
| Month | Type of Class | Topics | Course | Paper Code/Name |
| NOVEMBER-2019 | Theory | 1. The sales of goods Act, 1930: unpaid seller: meaning and rights of unpaid seller against the goods and the buyer. | 1. B.Com. (Hons) – IA | 1. BCH 1.3: Business Laws |
| | Practicals | | | |
| | Tutorials | 1. Case study presentation by student on sale of Goods Act 1930. | 1. B.Com. (Hons) - IA | 1.BCH 1.3: Business Laws |
| | Test | 1. Conduct internal examination and finalize the internal Assessment. | 1.B.Com (Hons)-IA | 1. BCH 1.3: Business Laws. |

SEMESTER WISE TEACHING PLAN
SRI VENKATESWARA COLLEGE
(2019-20) Odd Semester

Name of the Faculty: Mrs. Sunita Chhabra

Department: Commerce

Semester: 3rd

| Month | | Topics | Course | Paper Code/Name |
|----------------|-------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|-----------------------------------------------|
| JULY 2019 | Theory: | 1. Concept, functions of HRM. Roles, status and competencies of HR manager. | B.Com(Hons) – III Sem Sec A | BCH 3.1 Human Resource Management |
| | | 1. Need for study management and functions, coordination. | B.Com(Hons) – III Sem Sec B | BCH 3.3 Management and Principles Application |
| | Tutorials: | 1. Concept of Human Resource Management and its characteristics. | B.Com(Hons) – III Sem Sec A | BCH 3.1 Human Resource Management |
| | | 1. Characteristics of management. | B.Com(Hons) – III Sem Sec B | BCH 3.3 Management and Principles Application |
| AUGUST 2019 | Theory: | 1. HR policies, evolution of HRM 2. Human Resource planning – quantitative and qualitative dimensions 3. Job Analysis 4. Job description and job specification | B.Com(Hons) – III Sem Sec A | BCH 3.1 Human Resource Management |
| | | 1. Evolution of management thought – classical, human relation, behavior, system, contingency approach 2. MBO, Re-engineering, learning organization, fortune at the bottom of the pyramid | B.Com(Hons) – III Sem Sec B | BCH 3.3 Management and Principles Application |

| | | | | |
|----------------|-------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|-----------------------------------------------|
| | Tutorials: | <ol style="list-style-type: none"> 1. Functions of HRM 2. Operative functions of HRM 3. Difference between personnel management and HRM | B.Com(Hons) – III Sem Sec A | BCH 3.1 Human Resource Management |
| | | <ol style="list-style-type: none"> 1. Coordination – principles, system approach to management 2. Planning process 3. Growth strategies | B.Com(Hons) – III Sem Sec B | BCH 3.3 Management and Principles Application |
| SEPTEMBER 2019 | Theory: | <ol style="list-style-type: none"> 1. Recruitment – concept and sources 2. Selection – concept and process 3. Test and interview placement, induction and socialization 4. Emerging challenges of HRM – workforce diversity, empowerment, downsizing, VRS, work life balance | B.Com(Hons) – III Sem Sec A | BCH 3.1 Human Resource Management |
| | | <ol style="list-style-type: none"> 1. Trends and challenges of management in global scenarios, emerging issues 2. Type of plans, Strategic planning, growth strategies, environmental analysis and diagnosis, SWOT/TOWS/WOTS-UP, BCG Matrix 3. Business environment and decision making – process, techniques, bonded rationality 4. Organizing – process, span of management, delegation of authority 5. Different types of authority – lines, staff and functional, principles of organization | B.Com(Hons) – III Sem Sec B | BCH 3.3 Management and Principles Application |

| | | | | |
|--------------|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|-----------------------------------------------|
| | Tutorials: | <ol style="list-style-type: none"> 1. HR policy 2. Workload and workforce analysis 3. Different types of employment tests used for selection of employees | B.Com(Hons) – III Sem Sec A | BCH 3.1 Human Resource Management |
| | | <ol style="list-style-type: none"> 1. Span of management 2. Quantitative and qualitative decision making 3. Fortune at the bottom of the pyramid | B.Com(Hons) – III Sem Sec B | BCH 3.3 Management and Principles Application |
| | Assignment: | <ol style="list-style-type: none"> 1. Contingency approach to management 2. MBO, fortune at the bottom of the pyramid, management task in future | B.Com(Hons) – III Sem Sec B | BCH 3.3 Management and Principles Application |
| OCTOBER 2019 | Theory: | <ol style="list-style-type: none"> 1. Performance appraisal – nature, objectives and process 2. Performance management , methods of performance appraisal 3. Potential appraisal and employee counseling | B.Com(Hons) – III Sem Sec A | BCH 3.1 Human Resource Management |
| | | <ol style="list-style-type: none"> 1. Decentralization, formal and informal organization, type of organization structure 2. Staffing – recruitment, selection, training and development, career development and performance appraisal 3. Motivation theories – Maslow, Herzberg, Mcgregors, Ouchi 4. Leadership theories, transactional and transformational | B.Com(Hons) – III Sem Sec B | BCH 3.3 Management and Principles Application |

| | | | | |
|---------------|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|-----------------------------------------------|
| | Tutorials: | 1. Process of performance appraisal 2. Methods of performance appraisal | B.Com(Hons) – III Sem Sec A | BCH 3.1 Human Resource Management |
| | | 1. Type of organizational structure – project and matrix 2. Motivation theories 3. Performance appraisal, selection of employees | B.Com(Hons) – III Sem Sec B | BCH 3.3 Management and Principles Application |
| | Test: | 1. Unit 1 – Human Resource Management 2. Unit 2 – Acquisition of Human Resource | B.Com(Hons) – III Sem Sec A | BCH 3.1 Human Resource Management |
| | | 1. Unit 1 – Introduction 2. Unit 2 – Planning 3. Unit 3 – Delegation of authority | B.Com(Hons) – III Sem Sec B | BCH 3.3 Management and Principles Application |
| | Theory: | 1. e-HRM and Human Resource information system 2. Impact of HRM practices on organizational performance 3. HR audit and contemporary issues in HRM | B.Com(Hons) – III Sem Sec A | BCH 3.1 Human Resource Management |
| | | 1. Communication process, oral, written, formal, informal 2. Barriers to communication over coming barriers 3. Control process, techniques – ratio analysis (ROI), budgetary control, EVA, MVA, PERT and CPM | B.Com(Hons) – III Sem Sec B | BCH 3.3 Management and Principles Application |
| NOVEMBER 2019 | Tutorials: | 1. Human Resource information system 2. Contemporary issues in HR – outsourcing of HR activities, etc. | B.Com(Hons) – III Sem Sec A | BCH 3.1 Human Resource Management |
| | | 1. Techniques of control 2. Communication barriers and measures to resolve | B.Com(Hons) – III Sem Sec B | BCH 3.3 Management and Principles Application |

SEMESTER WISE TEACHING PLAN
SRI VENKATESWARA COLLEGE

(2019-20)

Name of the Faculty: Mrs. Sunita Chhabra

Department: Commerce

Semester: 5th

| Month | | Topics | Course | Paper Code/Name |
|---------------------------|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------|------------------------------------------|
| July – August 2019 | Theory | 1. Introduction: Meaning, Nature and scope of marketing; Evolution of marketing concept and modern marketing concept; Marketing mix. 2. Marketing Environment- macro and micro environmental concepts; Consumer buying process; Factors influencing consumer buying decisions. 3. Market segmentation – meaning, benefits, and Bases of segmentation; Positioning – meaning and importance; Major bases of positioning a product | B.Com. (Hons.) 5 th Semester CBCS | Paper BCH 5.1 Principles of Marketing |
| | Tutorials | 1. Nature of marketing. 2. Difference between marketing and selling. 3. Marketing mix and its components. 4. Marketing Environment – explain customer supplier, social cultural technological environment. | | |
| September 2019 | Theory | 1. Product: Concept, Product classification; Major product decisions: Product attributes Branding, Packaging and labeling; After-sales service; Product life cycle, new product development. 2. Pricing: Significance, factors affecting price determination, major pricing methods; pricing policies and strategies. 3. Promotion: Nature and importance, promotion mix, Promotion tools, advertising personal selling, public relation, sales promotion and publicity. | B.Com. (Hons.) 5 th Semester CBCS | Paper BCH 5.1 Principles of Marketing |
| | Tutorials | 1. Dimensions of product in 5 layers. 2. Branding. 3. Product life cycle. 4. Pricing | | |

| | | | | |
|----------------------|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------|------------------------------------------|
| | Assignment | <ol style="list-style-type: none"> 1. Consumer Behaviour. 2. Write note on marketing and selling, significance of marketing. | | |
| October 2019 | Theory | <ol style="list-style-type: none"> 1. Factors affecting promotion mix, integrated marketing communication approach. 2. Distribution: Channels of distribution – Meaning, importance, and functions; Factors affecting choice of distribution channel; Distribution logistics: Meaning, importance and decisions. 3. Retailing: Store based, Non store based, specialty store, super market, retail vending machine, mail order house. | B.Com. (Hons.) 5 th Semester CBCS | Paper BCH 5.1 Principles of Marketing |
| | Tutorials | <ol style="list-style-type: none"> 1. Pricing policies and factors affecting pricing. 2. Skimming and penetration pricing. 3. Distribution logistics. 4. Retailing – store based and non-store based. | | |
| | Test | <ol style="list-style-type: none"> 1. Introduction 2. Consumer Behavior 3. Market selection 4. Product 5. Pricing 6. Promotion | | |
| November 2019 | Theory | <ol style="list-style-type: none"> 1. Management of Retailing; an overview in India changing scenario. 2. Development and Issues in Marketing: Rural, Social, Online, Direct, Services, Green and relationship marketing, marketing ethics. | B.Com. (Hons.) 5 th Semester CBCS | Paper BCH 5.1 Principles of Marketing |
| | Tutorials | <ol style="list-style-type: none"> 1. Promotion mix 2. Relationship, green, online and direct marketing. | | |

SEMESTER WISE TEACHING PLAN
SRI VENKATESWARA COLLEGE
JULY-DEC 2019

Name of the Faculty: Ms Pooja Jain

Department: Commerce

Semester: I/III/V

| Month | Type of Class | Topics | Course | Paper Code/Name |
|--------|---------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------|
| JULY | Theory | 1. Unit I: Nature and Scope, Difference between cost accounting and management accounting, cost control, cost reduction, cost management, difference between cost control, cost reduction and cost management. 2. Unit 1: Introduction: Meaning, nature, concepts, advantages, disadvantages and reasons for transacting online, types of E-commerce 3. Unit 1: Introduction: Meaning of computers and functions of computer | 1. B.Com. (Hons) – V A+B 2. B.Com. (Hons) – III A+B 3. B.Com III | 1. BCH 5.3/Management Accounting 2. BCH 3.5 E-Commerce 3. BC 3.4 Computer Applications in business |
| | Practicals | Introduction to HTML, Creating and viewing a Webpage and basic HTML tags. | 1. B.Com. (Hons) – V A 2. B.Com. (Hons) – V B | 1. BCH 3.5 E-Commerce Practical Part C |
| | Tutorials | Basics and significance of Management Accounting will be discussed | 1. B.Com. (Hons) – V A+B | 1. BCH 5.3/Management Accounting |
| Month | Type of Class | Topics | Course | Paper Code/Name |
| AUGUST | Theory | 1. Unit IV: a. Absorption versus variable costing: Distinctive features and income determination. b. Cost-Volume-Profit Analysis: Break-even analysis- algebraic and graphic methods. Contribution / sales ratio, key factor. Margin of safety. Angle of incidence. Determination of cost indifference point. Unit II: Budgeting and budgetary control: Concept of budget and budgetary control, objectives, merits, and limitations | 1. B.Com. (Hons) – V A+B 2. B.Com. (Hons) – III A+B 3. B.Com III | 1. BCH 5.3/Management Accounting 2. BCH 3.5 E-Commerce 3. BC 3.4 Computer Applications in business |

| | | | | |
|--|-------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------|----------------------------------------|
| | | <p>2. | | Practical | External Exam conducted for Financial Accounting (TALLY) & Income Tax (ITR filling) | 1. B.Com – (H) I Semester-I 2. B.Com – (H) II Semester – III | 1. BC 1.2 : Financial Accounting 2. BCH 3.2: Income Tax |
|--|------------------|-------------------------------------------------------------------------------------|-----------------------------------------------------------------|--------------------------------------------------------------------------|

SEMESTER WISE TEACHING PLAN
SRI VENKATESWARA COLLEGE
(2019-20)

Name of the Faculty: Mohini Yadav

Department: Commerce

Semester:

| Month | | Topics | Course | Paper Code/Name |
|-------------------------|-----------------------------|---------------------------------------------------------------------------------------|------------------|--------------------------------------------------------------------------|
| July-August 2019 | Theory | Unit-I: Introduction | B.COM – Sem I | BC 1.2 - Financial Accounting |
| | | Unit I: Introduction to Organisations & Management Unit V: Context of Business | Generic Elective | BCH 1.4(b)-Business Organization and Management |
| | | Unit 1: Regulations of Domestic Market Unit 2: Foreign Trade Policy and Procedures | B.COM – Sem V | BC 5.4 b – Economics Regulation of Domestic and Foreign Exchange Markets |
| | Tutorials/ Practical | Unit-I: Introduction | B.COM – Sem I | BC 1.2 - Financial Accounting |
| | | Unit I: Introduction to Organisations & Management Unit V: Context of Business | Generic Elective | BCH 1.4(b)-Business Organization and Management |
| | | Basics of Access and Excel – Loan Sheet, Capital Budgeting | B.COM – Sem III | BC 3.4a – Computer Applications of Business |
| September 2019 | Theory | Unit-II: Depreciation accounting and inventory valuation | B.COM – Sem I | BC 1.2 - Financial Accounting |
| | | Unit II: Entrepreneurship: Founding the Business | Generic Elective | BCH 1.4(b)-Business Organization and Management |
| | | Unit 3: Industries Development Regulation | B.COM – Sem V | BC 5.4 b – Economics Regulation of Domestic and Foreign Exchange Markets |
| | Tutorials | Unit-II: Depreciation accounting and inventory valuation | B.COM – Sem I | BC 1.2 - Financial Accounting |
| | | Unit II: Entrepreneurship: Founding the Business | Generic Elective | BCH 1.4(b)-Business Organization and Management |
| | | MS Access questions upto 2 tables and Excel – Frequency Distribution, Depreciation | B.COM – Sem III | BC 3.4a – Computer Applications of Business |

| | | | | |
|----------------------|-------------------|--------------------------------------------------------------------------------------------|------------------|--------------------------------------------------------------------------|
| | Assignment | Depreciation accounting and inventory valuation | B.COM – Sem I | BC 1.2 - Financial Accounting |
| | | Unit II: Entrepreneurship: Founding the Business | Generic Elective | BCH 1.4(b)-Business Organization and Management |
| | | Unit 3: Industries Development Regulation | B.COM – Sem V | BC 5.4 b – Economics Regulation of Domestic and Foreign Exchange Markets |
| October 2019 | Theory | Unit-IV: Branch and departmental accounting | B.COM – Sem I | BC 1.2 - Financial Accounting |
| | | Unit III: Organisation of Business | Generic Elective | BCH 1.4(b)-Business Organization and Management |
| | | Unit 4: Foreign Exchange Market | B.COM – Sem V | BC 5.4 b – Economics Regulation of Domestic and Foreign Exchange Markets |
| | | | | |
| | Tutorials | Unit-IV: Branch and departmental accounting | B.COM – Sem I | BC 1.2 - Financial Accounting |
| | | Unit III: Organisation of Business | Generic Elective | BCH 1.4(b)-Business Organization and Management |
| | | MS Access questions up-to 3 tables and Excel – Regression, What-If-Analysis, Solver, Pivot | B.COM – Sem III | BC 3.4a – Computer Applications of Business |
| | Test | Depreciation, Inventory and Hire Purchase | B.COM – Sem I | BC 1.2 - Financial Accounting |
| | | Unit II: Entrepreneurship: Founding the Business Unit III: Organisation of Business | Generic Elective | BCH 1.4(b)-Business Organization and Management |
| November 2019 | | Unit 3: Industries Development Regulation Unit 4: Foreign Exchange Market | B.COM – Sem V | BC 5.4 b – Economics Regulation of Domestic and Foreign Exchange Markets |
| | Theory | Unit-IV: Branch and departmental accounting | B.COM – Sem I | BC 1.2 - Financial Accounting |
| | | Unit IV: Management of Business | Generic Elective | BCH 1.4(b)-Business Organization and Management |
| | | Unit 5: FEMA 1999 | B.COM – Sem V | BC 5.4 b – Economics Regulation of Domestic and Foreign Exchange Markets |
| | Tutorials | Unit-IV: Branch and departmental accounting | B.COM – Sem I | BC 1.2 - Financial Accounting |
| | | Unit IV: Management of Business | Generic Elective | BCH 1.4(b)-Business Organization and Management |
| | | MS Access questions up-to 3 tables and Excel – Ratio Analysis, Word, PPT | B.COM – Sem III | BC 3.4a – Computer Applications of Business |

SEMESTER WISE TEACHING PLAN
SRI VENKATESWARA COLLEGE
July-November, 2019

Name of the Faculty: Dr. Neeru Kumar

Department: Electronics

Semester: Third

| Month | | Topics | Course | Paper Code/Name |
|---------------|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| JULY | Theory: | Number System and Codes | B.Sc. Electronics | CC VI/ Digital Electronics and VHDL |
| | Practicals: | Sem III: To verify and design AND, OR, NOT and XOR gates using NAND gates. Sem III: Introduction to PCB designing and various CAD software. Sem III: 1. Generate the Fibonacci series up to the given limit N and also print the number of elements in the series. 2. Find minimum and maximum of N numbers. | | CC VI/ Digital Electronics and VHDL Lab SEC/Design and Fabrication of PrintedCircuit Boards CCVII/ C Programming and Data Structures |
| | Tutorials: | | | |
| | | | | |
| AUGUST | Theory: | Logic Gates and Boolean algebra Combinational Logic Analysis and Design | B.Sc. Electronics | CC VI/ Digital Electronics and VHDL |
| | | | | |
| | Practicals: | Sem III: 1.To convert a Boolean expression into logic gate circuit and assemble it using logic gate IC's. 2.Design a Half and Full Adder. 3.Design a Half and Full Subtractor. Sem III: Installation and introduction to EAGLE. Designing of the PCB layout of Blinky Box using IC 555 Timer. Designing of the PCB layout of Low Pass Filter using IC 741. Designing of the PCB layout of High Pass | | CC VI/ Digital Electronics and VHDL Lab SEC/Design and Fabrication of PrintedCircuit Boards |

| | | | | |
|------------------|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| | | Filter using IC 741. Sem III: 3. Find the GCD of two integer numbers. 4. Calculate factorial of a given number. 5. Find all the roots of a quadratic equation $Ax^2 + Bx + C = 0$ for non – zero coefficients A, B and C. Else report error. 6. Calculate the value of $\sin(x)$ and $\cos(x)$ using the series. Also print $\sin(x)$ and $\cos(x)$ value using library function. 7. Generate and print prime numbers up to an integer N. | | CCVII/ C Programming and Data Structures |
| | Tutorials: | | | |
| SEPTEMBER | Theory: | Sequential logic design Programmable Logic Devices | B.Sc. Electronics | CC VI/ Digital Electronics and VHDL |
| | Practicals: | Sem III: 1.Design a seven segment display driver. 2. Design a 4 X 1 Multiplexer using gates 3.To build a Flip- Flop Circuits using elementary gates. (RS, Clocked RS, D-type). Sem III: Designing of the PCB layout of Band Pass Filter using IC 741 Designing of the PCB layout of Differentiator. Designing of the PCB layout of Integrator. Sem III: 8. Sort given N numbers in ascending order. 9. Find the sum & difference of two matrices of order MxN and PxQ. 10. Find the product of two matrices of order MxN and PxQ. 11. Find the transpose of given MxN matrix. 12. Find the sum of principle and secondary diagonal elements of the given MxN matrix. 13. Calculate the subject wise and student wise totals and store them as a part of the structure. 14. Maintain an account of a customer using classes | | CC VI/ Digital Electronics and VHDL Lab SEC/Design and Fabrication of PrintedCircuit Boards CCVII/ C Programming and Data Structures |

| | | | | |
|----------------|--------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|
| | | 23. Implement Insertion sort, Merge sort, Bubble sort, Selection sort. | | |
| | <u>Assignment</u> | | | |
| | <u>Tutorials:</u> | | | |
| OCTOBER | Theory | Introduction to VHDL Behavioral Modeling Sequential Processing | B.Sc. Electronics | CC VI/ Digital Electronics and VHDL |
| | Practicals: | <p>Sem III: 1.Design a counter using D/T/JK Flip-Flop. 2.Design a shift register and study Serial and parallel shifting of data.</p> <p>Sem III: Designing of the PCB layout of Full Wave Bridge Rectifier. Designing of the PCB layout of Half and Full Adder. Designing of the PCB layout of Half and Full Subtractor.</p> <p>Sem III: 15. Implement linear and circular linked lists using single and double pointers. 16. Create a stack and perform Pop, Push, Traverse operations on the stack using Linear Linked list 17. Create circular linked list having information about a college and perform Insertion at front, Deletion at end. 18. Create a Linear Queue using Linked List and implement different operations such as Insert, Delete, and Display the queue elements. 19. Implement polynomial addition and subtraction using linked lists. 20. Implement sparse matrices using arrays and linked lists. 21. Create a Binary Tree to perform Tree traversals (Preorder, Postorder, Inorder) using the concept of recursion. 22. Implement binary search tree using linked lists. Compare its time complexity over that of linear search.</p> | | <p>CC VI/ Digital Electronics and VHDL Lab</p> <p>SEC/Design and Fabrication of PrintedCircuit Boards</p> <p>CCVII/ C Programming and Data Structures</p> |

| | | | | |
|-----------------|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | Tutorials: | | | |
| | <u>Mid Term Test</u> | | | |
| NOVEMBER | Theory: | Data types of VHDL | B.Sc. Electronics | CC VI/ Digital Electronics and VHDL |
| | | | | |
| | Practicals: | Sem III: To implement all the hardware experiments in VHDL software. Sem III: Designing of the PCB layout of 4×1 Multiplexer. | | CC VI/ Digital Electronics and VHDL Lab SEC/Design and Fabrication of PrintedCircuit Boards CCVII/ C Programming and Data Structures |
| | Tutorials: | | | |

Teaching Plan for the Semester
July - December (2019)
Dr Lalita Josyula / Department of Electronics

Paper : BSc(Hons) / Electronics (III Sem) – C Programming & Data Structures

| <div>Subject</div> <div>Month</div> | Theory | Practicals |
|-------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| July | Introduction, Importance of C, Character set, Tokens, keywords, identifier, constants, basic data types, | 1. Generate the Fibonacci series up to the given limit N and also print the number of elements in the series. 2. Find minimum and maximum of N numbers. |
| August | variables: declaration & assigning values. Structure of C program, Arithmetic operators, relational operators, logical operators, assignment operators, increment and decrement operators, conditional operators, bit wise operators, expressions and evaluation of expressions, type cast operator, implicit conversions, precedence of operators. Arrays- concepts, declaration, accessing elements, storing elements, two-dimensional and multidimensional arrays. Input output statement and library functions (math and string related functions). Decision making, branching & looping: Decision making, branching and looping: if, if-else, else-if, switch statement, break, for loop, while loop and do loop. Functions: Defining functions, function arguments and passing, returning values from functions. Assignment for 10 Marks -IA!! | 3. Find the GCD of two integer numbers. 4. Calculate factorial of a given number. 5. Find all the roots of a quadratic equation $Ax^2 + Bx + C = 0$ for non-zero coefficients A, B and C. Else report error. 6. Calculate the value of $\sin(x)$ and $\cos(x)$ using the series. Also print $\sin(x)$ and $\cos(x)$ value using library function. 7. Generate and print prime numbers up to an integer N. |

|-----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| September | <p>Structures: defining and declaring a structure variables, accessing structure members, initializing a structure, copying and comparing structure variables, array of structures, arrays within structures, structures within structures, structures and functions. Pointers.</p> <p>Searching and sorting: Insertion sort, selection sort, bubble sort, merge sort, linear Search, binary search.</p> <p>Introduction to C++: Object oriented programming, characteristics of an object-oriented language.</p> <p>Written Test for 10 Marks -IA After Semester Break !!</p> | <p>8. Sort given N numbers in ascending order.</p> <p>9. Find the sum & difference of two matrices of order MxN and PxQ.</p> <p>10. Find the product of two matrices of order MxN and PxQ.</p> <p>11. Find the transpose of given MxN matrix.</p> <p>12. Find the sum of principle and secondary diagonal elements of the given MxN matrix.</p> <p>13. Calculate the subject wise and student wise totals and store them as a part of the structure.</p> <p>14. Maintain an account of a customer using classes</p> <p>23. Implement Insertion sort, Merge sort, Bubble sort, Selection sort.</p> |
| October | <p>Data Structures: Definition of stack, array implementation of stack, conversion of infix expression to prefix, postfix expressions, evaluation of postfix expression.</p> <p>Definition of Queue, Circular queues, Array implementation of queues. Linked List and its implementation, Link list implementation of stack and queue, Circular and doubly linked list, Trees : Introduction to trees, Binary search tree, Insertion and searching in a BST, preorder, postorder and inorder traversal (recursive)</p> | <p>15. Implement linear and circular linked lists using single and double pointers.</p> <p>16. Create a stack and perform Pop, Push, Traverse operations on the stack using Linear Linked list</p> <p>17. Create circular linked list having information about a college and perform Insertion at front, Deletion at end.</p> <p>18. Create a Linear Queue using Linked List and implement different operations such as Insert, Delete, and Display the queue elements.</p> <p>19. Implement polynomial addition and subtraction using linked lists.</p> <p>20. Implement sparse matrices using arrays and linked lists.</p> <p>21. Create a Binary Tree to perform Tree traversals (Preorder, Postorder, Inorder) using the concept of recursion.</p> <p>22. Implement binary search tree using linked lists. Compare its time complexity over that of linear search.</p> |
| November | Final Exams | <p>Submit Project Work !</p> <p>Final Exams</p> |

Paper : Generic Elective (GE-II) / Sem I– Data Sciences

| | | |
|---------|--------|------------|
| Subject | Theory | Practicals |
| Month | | |

| | | |
|-----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| July | <p>Introduction to Data Science: Concept of Data Science, Traits of Big data, Web Scraping, Analysis vs Reporting</p> | <p>Overview of Programming: Structure of a Python Program, Elements of Python</p> <p>Introduction to Python: Python Interpreter, Using Python as calculator, Python shell, Indentation. Atoms, Identifiers and keywords, Literals, Strings, Operators (Arithmetic operator, Relational operator, Logical or Boolean operator, Assignment, Operator, Ternary operator, Bitwise operator, Increment or Decrement operator)</p> |
| August | <p>Introduction to Programming Tools for Data Science: Toolkits using Python: Matplotlib, NumPy, Scikit-learn, NLTK; Visualizing Data: Bar Charts, Line Charts, Scatterplots; Working with data: Reading Files, Scraping the Web, Using APIs (Example: Using the Twitter APIs), Cleaning and Munging, Manipulating Data, Rescaling, Dimensionality Reduction</p> | <p>Creating Python Programs: Input and Output Statements, Control statements (Branching, Looping, Conditional Statement, Exit function, Difference between break, continue and pass.), Defining Functions, default arguments, Errors and Exceptions. Iteration and Recursion: Conditional execution, Alternative execution, Nested conditionals, The return statement, Recursion, Stack diagrams for recursive functions, Multiple assignment, The while statement, Tables, Two-dimensional tables</p> |
| September | <p>Mathematical Foundations: Linear Algebra: Vectors, Matrices; Statistics: Describing a Single Set of Data, Correlation, Simpson's Paradox, Correlation and Causation; Probability: Dependence and Independence, Conditional Probability, Bayes's Theorem, Random Variables, Continuous Distributions, The Normal Distribution, The Central Limit Theorem ; Hypothesis and Inference: Statistical Hypothesis Testing, Confidence Intervals, Phacking, Bayesian Inference</p> <p>Machine Learning: Overview of Machine learning concepts – Over fitting and train/test splits, Types of Machine learning – Supervised, Unsupervised, Reinforced learning, Introduction to Bayes Theorem, Linear Regression- model assumptions, regularization (lasso, ridge, elastic net),</p> | <p>Strings and Lists: String as a compound data type, Length, Traversal and the for loop, String slices, String comparison, A find function, Looping and counting, List values, Accessing elements, List length, List membership, Lists and for loops, List operations, List deletion. Cloning lists, Nested lists</p> <p>Python programs/ Exercises based on : NumPy, Scikit-learn, Scipy , NLTK; Visualizing Data: Bar Charts, Line Charts, Scatterplots using Matplotlib ; Working with Data using Pandas</p> |

| | | |
|----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| October | <p>Classification and Regression algorithms- Naïve Bayes, K-Nearest Neighbours, logistic regression, support vector machines (SVM), decision trees, and random forest, Classification Errors, Analysis of Time Series- Linear Systems Analysis, Nonlinear Dynamics, Rule Induction, Neural Networks Learning And Generalization, Overview of Deep Learning.</p> | <p>Object Oriented Programming: Introduction to Classes, Objects and Methods, Standard Libraries.</p> <ol style="list-style-type: none"> 1. Write a programme in Python to predict the class of the flower based on available attributes. 2. Write a programme in Python to predict if a loan will get approved or not. 3. Write a programme in Python to predict the traffic on a new mode of transport. 4. Write a programme in Python to predict the class of user. 5. Write a programme in Python to indentify the tweets which are hate tweets and which are not. 6. Write a programme in Python to predict the age of the actors. |
| November | Final Exams | <p>Submit Project Work ! Final Exams</p> |

SEMESTER WISE TEACHING PLAN
SRI VENKATESWARA COLLEGE
Academic Session 2019-2020 (Odd Semester)

Name of the Faculty: Dr. Nutan Kala Joshi

Department: Electronics

Semester: Theory : B.Sc(H) Electronics, Sem V

Practical : B.Sc(H) Electronics, Sem I
 B.Sc(H) Electronics, Sem V

| Month | | Topics | Course | Paper Code/Name |
|-------------------|------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|-----------------------------------|
| JULY/August -2019 | Theory | Unit-1 Vector Analysis: Scalars and Vectors, Vector Algebra, Rectangular (Cartesian) Coordinate System, Vector Components and Unit Vector, Vector Field, Products, Cylindrical Coordinates, Spherical Coordinates, Differential Length, Area and Volume, Line Surface and Volume integrals, Del Operator, Gradient of a Scalar, Divergence and Curl of a Vector, the Laplacian. Electrostatic Fields: Coulomb's Law and Electric Field, Field due to Discrete and Continuous Charge Distributions, Electric Flux Density, Gauss's Law and Applications, Divergence Theorem and Maxwell's First Equation. Electric Potential, Potential due to a Charge and Charge distribution, Electric dipole Electric Fields in Conductors, Current and Current Density, Continuity of Current, Metallic Conductor Properties Dielectric materials, Polarization, Dielectric Constant, Isotropic and Anisotropic dielectrics, Boundary conditions, Capacitance and Capacitors. Electrostatic Energy and Forces Plus Unit –II Poisson's Equation and Laplace's Equation (Introduction) Divergence and Stoke Theorem Maxwells 1 st and 2 nd Equation Scaler Potential | B.Sc(H) Electronics Sem-V | Core-Course-XII/ Electromagnetics |
| | Practical | 1. Understanding and Plotting Vectors 2. Transformation of vectors into various coordinate systems. 3. 2D and 3D Graphical plotting with change of view and rotation. | B.Sc(H) Electronics Sem-V | Core-Course-XII/ Electromagnetics |

| | | | | |
|-----------|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------|----------------------------------------------------------------------------------------|
| | | | | |
| | | SEM V : Introductory Lab/ Program to implement Bisection Method , Secant Method and Regula falsi method. | B.Sc(H) Electronics Sem-V | DSE-2 Lab : Numerical Techniques |
| | | Familiarization with a) Resistance in series, parallel and series – Parallel. b) Capacitors & Inductors in series & Parallel. c) Multimeter – Checking of components. d) Voltage sources in series, parallel and series – Parallel e) Voltage and Current dividers Verification of Kirchoff's Law. Verification of Norton's theorem. Verification of Thevenin's Theorem. | B.Sc.(Hons) Electronics, Sem I | Core-Course-I/ Basic Circuit Theory and Network Analysis Lab |
| SEPTEMBER | Theory | Boundary Conditions, Method of Images. Dielectric materials, Polarization, Dielectric Constant, Isotropic and Anisotropic dielectrics UNIT-2 Poisson's Equation and Laplace's Equation: Derivation of Poisson's and Laplace's equation, Uniqueness Theorem, Examples of Solution of Laplace's Equation: Cartesian, Cylindrical and Spherical Coordinates. Magnetostatics: Biot Savart's law and Applications, Magnetic dipole, Ampere's Circuital Law, Curl and Stoke's Theorem, Maxwell's Equation, Magnetic Flux and Magnetic Flux Density, Scalar and Vector Magnetic Potentials Magnetization in Materials and Permeability, Anisotropic materials, Magnetic Boundary Conditions, Inductors and Inductances, Magnetic Energy, Magnetic Circuits. Inductances and Inductors, Magnetic Energy, Forces and Torques. | B.Sc(H) Electronics Sem-V | Core-Course-XII/ Electromagnetics |
| | Practicals | 4. Representation of the Gradient of a scalar field, Divergence and Curl of Vector Fields. 5. Plots of Electric field and Electric Potential due to charge distributions. 6. Plots of Magnetic Flux Density due to current carrying wire. Program to implement Newton Raphson Method , Trapezoidal rule , Simpson's rule and Runge Kutta Method. | B.Sc(H) Electronics Sem-V B.Sc(H) Electronics Sem-V | Core-Course-XII/ Electromagnetics DSE-2 Lab : Numerical Techniques |

| | | | | |
|----------|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------|------------------------------------------------------------------------------------|
| | | Verification of Superposition Theorem. Verification of the Maximum Power Transfer Theorem. Measurement of Amplitude, Frequency & Phase difference using CRO. | B.Sc.(Hons) Electronics, Sem I | Core-Course-I/ Basic Circuit Theory and Network Analysis Lab |
| | <u>Assignment</u> | | | |
| OCTOBER | Theory | Unit-3 Varying Fields and Maxwell's Equations: Faraday's Law of Electromagnetic Induction, Stationary Circuit in Time - Varying Magnetic Field, Transformer and Motional EMF, Displacement Current, Maxwell's Equations in differential and integral form and Constitutive Relations. Potential Functions, Lorentz gauge and the Wave Equation for Potentials, Concept of Retarded Potentials. Electromagnetic Boundary Conditions. Time-Harmonic Electromagnetic Fields and use of Phasors Unit-4 Electromagnetic Wave Propagation: Harmonic Electromagnetic Fields and use of Phasors, the Electromagnetic Spectrum, Wave Equation in a source free isotropic homogeneous media. | B.Sc(H) Electronics Sem-V | Core-Course-XII/ Electromagnetics |
| | Practicals: | 7. Programs and Contour Plots to illustrate Method of Images 8. Solutions of Poisson and Laplace Equations –contour plots of charge and potential distributions Program to implement Euler-Cauchy Method and Gauss-Jordon Method | B.Sc(H) Electronics Sem-V B.Sc (H) Electronics Sem-V | Core-Course-XII/ Electromagnetics DSE-2 Lab : Numerical Techniques |
| | | RC Circuits: Time Constant, Differentiator, Integrator. Designing of a Low Pass RC Filter and study of its Frequency Response. Designing of a High Pass RC Filter and study of its Frequency Response. | B.Sc.(Hons) Electronics, Sem I | Core-Course-I/ Basic Circuit Theory and Network Analysis Lab |
| | <u>Mid Term Test</u> | | | |
| NOVEMBER | Theory: | Uniform Plane Waves in Lossless and Lossy unbounded homogeneous media, Wave Polarization, Phase and Group velocity, Flow of Electromagnetic Power and Poynting Vector. Uniform Plane wave incident on a Plane conductor boundary, concept of reflection and standing wave. Guided Electromagnetic Wave Propagation: Waves | B.Sc(H) Electronics Sem-V | Core-Course-XII/ Electromagnetics |

| | | | | |
|--|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------|--------------------------------------------------------------|
| | | along Uniform Guiding Structures, TEM, TE and TM waves, Electromagnetic Wave Propagation in Parallel Plate and Rectangular Metallic Waveguides | | |
| | Practicals: | 9. Introduction to Computational Electromagnetics: Simple Boundary Value Problems by Finite Difference/Finite Element Methods | B.Sc (H) Electronics Sem-V | Core-Course-XII/ Electromagnetics |
| | | Program to implement Gauss-Seidel Iteration | B.Sc (H) Electronics Sem-V | DSE-2 Lab : Numerical Techniques |
| | | Study of the Frequency Response of a Series LCR Circuit and determination of its (a) Resonant Frequency (b) Impedance at Resonance (c) Quality Factor Q (d) Band Width. | B.Sc.(Hons) Electronics, Sem I | Core-Course-I/ Basic Circuit Theory and Network Analysis Lab |

Semester: V

| Month | | Topics | Course | Paper Code/Name |
|--------|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|-----------------------------------------------------------------------------------------------------------------------|
| JULY | Theory | Introduction to microprocessor, Different types, Difference between microprocessor and microcontroller, Introduction to 8085 microprocessors | B.Sc. (H) | Core Course-XI Microprocessor and microcontrollers |
| | Practical | Sem V: Program for addition and subtraction using 8085 microprocessors SEM V : Introductory Lab Sem III: Half Wave Rectifiers with C-filter, and Zener Regulation | B.Sc. (H) | Core Course-XI Microprocessor and microcontrollers DSE-2 Lab : Numerical Techniques Core Course V |
| AUGUST | Theory | Basic architecture of 8085 microprocessors, Block diagram, Instruction set, Addressing modes, Memory mapping and I/O mapping | B.Sc. (H) | Core Course-XI Microprocessor and microcontrollers |
| | Practical | Sem V: Program for multibyte addition and subtraction, Program for block movement of data, Program for ascending and descending order Sem V: Program to implement Bisection Method , Secant Method and Regula falsi method. Sem III : Full Wave (Bridge and center tapped) Rectifiers with C-filter, and Zener and load Regulation , Clipping and Clamping networks | B.Sc. (H) | Core Course-XI Microprocessor and microcontrollers DSE-2 Lab : Numerical Techniques Core Course V |

| | | | | |
|-----------|-----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|-----------------------------------------------------------------------------------------------------------------|
| SEPTEMBER | Theory | Interrupt structure of 8085 microprocessors, Various interrupts, Latency and response time, Concept of interfacing of various devices with 8085 microprocessors using interrupt Introduction to microcontrollers, Different types of microcontrollers, CISC & RISC architecture, Introduction to PIC16F887 microcontroller | B.Sc. (H) | Core Course-XI Microprocessor and microcontrollers |
| | Practical | Sem V: Program for GCD, Program for truth table of logic gates, Fibonacci series, Program to find minimum and maximum among N numbers, Division of 16-bit number Sem V: Program to implement Newton Raphson Method , Trapezoidal rule , Simpson's rule and Runge Kutta Method. Sem III: DC Biasing: Fixed Bias, Collector to base feedback and Voltage divider, CE Amplifier Design its and frequency response | B.Sc. (H) | Core Course-XI Microprocessor and microcontrollers DSE-2 Lab : Numerical Techniques Core Course V |
| | <u>Assignment</u> | Programs based on 8085 microprocessors | B.Sc. (H) | Core Course-XI Microprocessor and microcontrollers |
| OCTOBER | Theory | Instruction set of PIC microcontrollers, I/O ports, Timer and interrupts, Addressing modes and Introduction to interfacing | B.Sc. (H) | Core Course-XI Microprocessor and microcontrollers |
| | Practical | Sem V: Interfacing of PIC microcontroller with LEDs, Stepper motor, Generation of different waveforms, A/D converter Sem V: Program to implement Euler-Cauchy Method and Gauss-Jordon Method Sem III:, Power Amplifiers: Class A, B and C, Hartley, Colpitts. | B.Sc. (H) | Core Course-XI Microprocessor and microcontrollers DSE-2 Lab : Numerical Techniques Core Course V |
| | <u>Mid Term Test</u> | Complete 8085 microprocessors, Introduction to PIC microcontroller | B.Sc. (H) | Core Course-XI Microprocessor and microcontrollers |
| NOVEMBER | Theory | Interfacing of various I/O devices with PIC microcontroller | B.Sc. (H) | Core Course-XI Microprocessor and microcontrollers |

| | | | | |
|--|------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|------------------------------------------------------------------------------------------------------------------------------------|
| | Practical | <p>Sem V: Serial communication between microcontroller and PC</p> <p>Sem V : Program to implement Gauss-Seidel Iteration</p> <p>Sem III : Phase shift Oscillator</p> | B.Sc. (H) | <p>Core Course-XI Microprocessor and microcontrollers</p> <p>DSE-2 Lab : Numerical Techniques</p> <p>Core Course V</p> |
|--|------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|------------------------------------------------------------------------------------------------------------------------------------|

Core Course II : Electronic Circuits

| | | |
|----------------------------|------------------|------------------------------------------|
| Name of the Faculty | : | Mr. Hari Singh |
| Department | : | Electronics |
| Semester: | Theory | : |
| | | B.Sc(H) Electronics, Semester I |
| | | B.Sc(H) Electronics, Semester III |
| | Practical | : |
| | | B.Sc(H) Electronics, Semester I |
| | | B.Sc(H) Electronics, Semester III |

| Month | | Topics | Course | Paper Code/ Name |
|-------|-----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------|-----------------------------------------------------------------|
| JULY | Theory | Basic Circuit Concepts: Voltage and Current Sources, Resistors: Fixed and Variable resistors, Construction and Characteristics, Color coding of Resistors, Resistors in Series and Parallel. Basic Circuit Concepts: Inductors: Fixed and Variable inductors, Self and mutual inductance, Faraday's law and Lenz's law of electromagnetic induction, Energy stored in an inductor, Inductance in series and parallel, Testing of resistance and inductance using Multimeter. | B.Sc.(Hons) Electronics, Semester I | Core-Course-I/ Basic Circuit Theory and Network Analysis |
| | | PCB Fundamentals: PCB Advantages, components of PCB | B.Sc.(Hons) Electronics, Semester III | SEC-I/ Design and Fabrication of Printed Circuit Boards |
| | Practical | Familiarization with a) Resistance in series, parallel and series – Parallel. b) Capacitors & Inductors in series & Parallel. c) Multimeter – Checking of components. d) Voltage sources in series, parallel and series – Parallel e) Voltage and Current dividers | B.Sc.(Hons) Electronics, Semester I | Core-Course-I/ Basic Circuit Theory and Network Analysis Lab |
| | | Introduction to PCB designing and various CAD software. | B.Sc.(Hons) Electronics, Semester III | SEC-I/ Design and Fabrication of Printed Circuit Boards Lab |
| | | Introductory Lab | B.Sc.(Hons) Electronics, Semester V | DSE-II/ Numerical Techniques Lab |
| | | | | |

| | | | | |
|-----------|------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------|--------------------------------------------------------------|
| AUGUST | Theory | Capacitors: Principles of capacitance, Parallel plate capacitor, Permittivity, Definition of Dielectric Constant, Dielectric strength, Energy stored in a capacitor, Air, Paper, Mica, Teflon, Ceramic, Plastic and Electrolytic capacitor, Construction and application, capacitors in series and parallel, factors governing the value of capacitors, testing of capacitors using multimeter. Dielectric Constant, Dielectric strength, Energy stored in a capacitor, Air, Paper, Mica, Teflon, Ceramic, Plastic and Electrolytic capacitor, Construction and application, capacitors in series and parallel, factors governing the value of capacitors, testing of capacitors using multimeter. | B.Sc.(Hons) Electronics, Semester I | Core-Course-I/ Basic Circuit Theory and Network Analysis |
| | | Circuit Analysis: Kirchhoff's Current Law (KCL), Kirchhoff's Voltage Law (KVL), Node Analysis | | |
| | | Electronic components, Microprocessors and Microcontrollers, IC's, Surface Mount Devices (SMD). Classification of PCB - single, double, multilayer and flexible boards, Manufacturing of PCB, PCB standards. Schematic & Layout Design: Schematic diagram | B.Sc.(Hons) Electronics, Semester III | SEC-I/ Design and Fabrication of Printed Circuit Boards |
| | Practical | Verification of Kirchhoff's Law. Verification of Norton's theorem. Verification of Thevenin's Theorem. | B.Sc.(Hons) Electronics, Semester I | Core-Course-I/ Basic Circuit Theory and Network Analysis Lab |
| | | Installation and introduction to EAGLE. Designing of the PCB layout of Blinky Box using IC 555 Timer. Designing of the PCB layout of Low Pass Filter using IC 741. Designing of the PCB layout of High Pass Filter using IC 741. | B.Sc.(Hons) Electronics, Semester III | SEC-I/ Design and Fabrication of Printed Circuit Boards Lab |
| | | Programs to implement Bisection Method, Secant Method and Regula Falsi Method. | B.Sc.(Hons) Electronics, Semester V | DSE-II/ Numerical Techniques Lab |
| SEPTEMBER | Theory | Mesh Analysis, Star-Delta Conversion Network Theorems: Principal of Duality, Superposition Theorem, Thevenin's Theorem, Norton's Theorem, Reciprocity Theorem, Millman's Theorem, Maximum Power Transfer Theorem. AC circuit analysis using Network theorems | B.Sc.(Hons) Electronics, Semester I | Core-Course-I/ Basic Circuit Theory and Network Analysis |
| | | General Mechanical and Electrical design considerations, Placing and Mounting of components, Conductor spacing, routing guidelines, heat sinks and package density, Net list, creating components for library, Tracks, Pads, Vias, power plane, grounding. Technology OF PCB: Design automation, | B.Sc.(Hons) Electronics, Semester III | SEC-I/ Design and Fabrication of Printed Circuit Boards |

| | | | | |
|---------|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | | Design Rule Checking | | |
| | Practical | <p>Verification of Superposition Theorem. Verification of the Maximum Power Transfer Theorem. Measurement of Amplitude, Frequency & Phase difference using CRO.</p> <p>Designing of the PCB layout of Band Pass Filter using IC 741 Designing of the PCB layout of Differentiator. Designing of the PCB layout of Integrator.</p> <p>Programs to implement Newton Raphson Method, Trapezoidal Rule, Simpson's Rule and Runge Kutta Method.</p> | <p>B.Sc.(Hons) Electronics, Semester I</p> <p>B.Sc.(Hons) Electronics, Semester III</p> <p>B.Sc.(Hons) Electronics, Semester V</p> | <p>Core-Course-I/ Basic Circuit Theory and Network Analysis Lab</p> <p>SEC-I/ Design and Fabrication of Printed Circuit Boards Lab</p> <p>DSE-II/ Numerical Techniques Lab</p> |
| | Assignment | As per the syllabus covered | | |
| | Theory | <p>Two Port Networks: Impedance (Z) Parameters, Admittance (Y) Parameters, Transmission (ABCD) Parameters.</p> <p>AC Circuit Analysis: Sinusoidal Voltage and Current, Definition of Instantaneous, Peak, Peak to Peak, Root Mean Square and Average Values. Voltage-Current relationship in Resistor, Inductor and Capacitor, Phasor, Complex Impedance, Power in AC Circuits: Instantaneous Power, Average Power, Reactive Power, Power Factor. Sinusoidal Circuit Analysis for RL, RC and RLC Circuits. Resonance in Series and Parallel RLC Circuits, Frequency Response of Series and Parallel RLC Circuits, Quality (Q) Factor and Bandwidth. Passive Filters: Low Pass, High Pass, Band Pass and Band Stop.</p> <p>Exporting Drill and Gerber Files; Drills; Footprints and Libraries Adding and Editing Pins, copper clad laminates materials of copper clad laminates, properties of laminates (electrical & physical), types of laminates, soldering techniques. Film master preparation, Image transfer, photo printing, Screen Printing, Plating techniques etching techniques, Mechanical Machining operations, Lead cutting and Soldering Techniques, Testing and quality controls</p> | <p>B.Sc.(Hons) Electronics, Semester I</p> <p>B.Sc.(Hons) Electronics, Semester III</p> | <p>Core-Course-I/ Basic Circuit Theory and Network Analysis</p> <p>SEC-I/ Design and Fabrication of Printed Circuit Boards</p> |
| OCTOBER | | | | |

| | | | | |
|----------|----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------|-----------------------------------------------------------------|
| | Practical | RC Circuits: Time Constant, Differentiator, Integrator. Designing of a Low Pass RC Filter and study of its Frequency Response. Designing of a High Pass RC Filter and study of its Frequency Response. | B.Sc.(Hons) Electronics, Semester I | Core-Course-I/ Basic Circuit Theory and Network Analysis Lab |
| | | Designing of the PCB layout of Full Wave Bridge Rectifier. Designing of the PCB layout of Half and Full Adder. Designing of the PCB layout of Half and Full Subtractor. | B.Sc.(Hons) Electronics, Semester III | SEC-I/ Design and Fabrication of Printed Circuit Boards Lab |
| | | Programs to implement Euler-Cauchy Method and Gauss-Jordon Method. | B.Sc.(Hons) Electronics, Semester V | DSE-II/ Numerical Techniques Lab |
| | Tutorials | NA | NA | NA |
| | Mid Term Test | As per the syllabus covered | | |
| NOVEMBER | Theory | DC Transient Analysis: RC Circuit- Charging and discharging with initial charge, RL Circuit with Initial Current, Time Constant, RL and RC Circuits With Sources, DC Response of Series RLC Circuits. | B.Sc.(Hons) Electronics, Semester I | Core-Course-I/ Basic Circuit Theory and Network Analysis |
| | | PCB Technology: Trends, Environmental concerns in PCB industry | B.Sc.(Hons) Electronics, Semester III | SEC-I/ Design and Fabrication of Printed Circuit Boards |
| | Practical | Study of the Frequency Response of a Series LCR Circuit and determination of its (a) Resonant Frequency (b) Impedance at Resonance (c) Quality Factor Q (d) Band Width. | B.Sc.(Hons) Electronics, Semester I | Core-Course-I/ Basic Circuit Theory and Network Analysis Lab |
| | | Designing of the PCB layout of 4×1 Multiplexer. | B.Sc.(Hons) Electronics, Semester III | SEC-I/ Design and Fabrication of Printed Circuit Boards Lab |
| | | Program to implement Gauss-Seidel Iteration. | B.Sc.(Hons) Electronics, Semester V | DSE-II/ Numerical Techniques Lab |

SEMESTER WISE TEACHING PLAN SRI VENKATESWARA COLLEGE

Name of the Faculty: Ms. Shubhra Gupta

Department Electronics

Semester : I/III/V

| Month | | Topics | Course | Paper Code/Name |
|--------|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|------------------------------------------------------------------------------------------------------------------------------------------|
| JULY | Theory | SEM V : Unit 1: Numerical Methods: Floating point, Round-off error, Error propagation, Stability, Programming errors. | Bsc (Hons) Electronics | DSE-2 : Numerical Techniques |
| | Practicals | SEM V : Introductory Lab SEM V : Program for addition and subtraction using 8085 microprocessors SEM V : Understanding and Plotting Vectors | Bsc (Hons) Electronics | DSE-2 Lab : Numerical Techniques CC-XI Lab : Microprocessor and Microcontroller CC-XII Lab : Electromagnetics |
| | Tutorials | | | |
| AUGUST | Theory: | SEM V : Unit 1 contd. Solution of Transcendental and Polynomial Equations $f(x)=0$: Bisection method, Secant and Regula Falsi Methods, Newton Raphson method, Rate of convergence, General Iteration Methods, Newton's Method for Systems, Method for Complex Roots , Roots of Polynomial Equations. Unit 2 : Interpolation and Polynomial Approximations: Taylor Series and Calculation of Functions, Langrange Interpolation | Bsc (Hons) Electronics | DSE-2 : Numerical Techniques |

| | | | | |
|-----------|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| | Practicals: | SEM V : Program to implement Bisection Method , Secant Method and Regula falsi method. SEM V : Program for multibyte addition and subtraction, Program for block movement of data, Program for ascending and descending order SEM V : 1. Transformation of vectors into various coordinate systems. 2. 2D and 3D Graphical plotting with change of view and rotation. | Bsc (Hons) Electronics | DSE-2 Lab : Numerical Techniques CC-XI Lab : Microprocessor and Microcontroller CC-XII Lab : Electromagnetics |
| | Tutorials: | | | |
| SEPTEMBER | Theory: | SEM V : Unit 2 contd. Newton Divided Difference Interpolation (forward and backward difference formulae), Truncation errors. Curve Fitting: Least square fitting, Curve fitting, Interpolation by Spline functions. Unit 3 : Numerical Integration: Trapezoidal Rule, Error bounds and estimate for the Trapezoidal rule, Simpson's Rule, Error of Simpson's rule. Numerical Differentiation | Bsc (Hons) Electronics | DSE-2 : Numerical Techniques |
| | | | | |
| | Practicals: | SEM V : Program to implement Newton Raphson Method , Trapezoidal rule , Simpson's rule and Runge Kutta Method. SEM V : Program for GCD, Program for truth table of logic gates, Fibonacci series, Program to find minimum and maximum among N numbers, Division of 16-bit number SEM V 1. Representation of the Gradient of a scalar field, Divergence and Curl of Vector Fields. 2. Plots of Electric field and Electric Potential due to charge distributions. 3. Plots of Magnetic Flux Density due to current carrying wire. | Bsc (Hons) Electronics | DSE-2 Lab : Numerical Techniques CC-XI Lab : Microprocessor and Microcontroller CC-XII Lab : Electromagnetics |

| | | | | |
|----------|----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| OCTOBER | Tutorials: | | | |
| | <u>Assignment :</u> | Based on Unit 1 and Unit 2 | | |
| | Theory: | SEM V : Unit 3 contd. Finite difference method and applications to electrostatic boundary value problems. Numerical methods for first order differential equations: Euler-Cauchy Method, Heun's Method, Classical Runge Kutta method of fourth order. Methods for system and higher order equations. Unit 4: Numerical Methods in Linear Algebra: Linear systems $Ax=B$, Gauss Elimination, Partial Pivoting, LU factorization, Doolittle's | Bsc (Hons) Electronics | DSE-2 : Numerical Techniques |
| | Practicals: | SEM V : Program to implement Euler-Cauchy Method and Gauss-Jordon Method SEM V : Interfacing of PIC microcontroller with LEDs, Stepper motor, Generation of different waveforms, A/D converter SEM V 1. Programs and Contour Plots to illustrate Method of Images 2. Solutions of Poisson and Laplace Equations –contour plots of charge and potential distributions | Bsc (Hons) Electronics | DSE-2 Lab : Numerical Techniques CC-XI Lab : Microprocessor and Microcontroller CC-XII Lab : Electromagnetics |
| | Tutorials: | | | |
| | <u>Test</u> | Based on Unit 1 , Unit 2 and part of Unit 3. | | |
| NOVEMBER | Theory: | SEM V : Unit 4 contd. Crout's and Cholesky's method. Matrix Inversion, Gauss-Jordon, Iterative Methods: Gauss-Seidel Iteration, Jacobian Iteration. Matrix Eigenvalue: Power Method | Bsc (Hons) Electronics | DSE-2 : Numerical Techniques |

| | | | | |
|--|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|------------------------------------------------------------------------------------------------------------------------------------------|
| | Practicals: | SEM V : Program to implement Gauss-Seidel Iteration SEM V : Serial communication between microcontroller and PC SEM V: Introduction to Computational Electromagnetics: Simple Boundary Value Problems by Finite Difference/Finite Element Methods | Bsc (Hons) Electronics | DSE-2 Lab : Numerical Techniques CC-XI Lab : Microprocessor and Microcontroller CC-XII Lab : Electromagnetics |
| | Tutorials: | | | |

SEMESTER WISE TEACHING PLAN
SRI VENKATESWARA COLLEGE
Jul-Nov 2019

Name of the Faculty: Dr. Rakhi Narang

Department: Electronics

Semester : I/III/V

| Month | | Topics | Course | Paper Code/Name |
|--------|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------|-----------------------------------------------------------------------------------------------|
| JULY | Theory | Sem V: Discrete sequences Sem I: Concept of Data Science, Traits of Big data | B. Sc. Electronics B. Sc. Electronics | DSE- Digital Signal Processing GE I: Data Sciences |
| | Practicals | Sem V: Generation of unit sample sequence, unit step, ramp function, discrete time sequence, real sinusoidal sequence. Sem I : Starting with MATLAB, arithmetic operations with scalars, order of precedence, display formats, elementary built in functions, defining scalar variables, example questions | B. Sc. Electronics B. Sc Electronics | DSE- Digital Signal Processing Lab CC – II/ Mathematics Foundation for Electronics Lab |
| | Tutorials | | | |
| AUGUST | Theory: | Sem V: linear coefficient difference equation, Representation of DTS, LSI Systems. Stability and causality, frequency domain representations and Fourier transform of DT sequences, Z transform and its properties, Inverse Z transform Sem I: Linear Algebra: Vectors, Matrices; Statistics: Describing a Single Set of Data, Correlation, Simpson's Paradox, Correlation and Causation; Probability: Dependence and Independence, Conditional Probability, Bayes's Theorem, Random Variables, Continuous Distributions | B. Sc. Electronics B. Sc. Electronics | DSE- Digital Signal Processing GE I: Data Sciences |
| | Practicals: | Sem V: Generate and plot sequences over an interval. Convolution, deconvolution Linear Constant Coefficient Difference equations Z-transform: Given $x[n]$, write program to find $X[z]$. Sem I: Creating arrays: Creating a 1D array(vector), 2D array(matrix), array addressing, built in functions for handling arrays, mathematical operations with arrays, script files. Programs on arrays and matrices Solution of First Order Differential Equations. Solution of Second Order homogeneous Differential Equations. | BSc Electronics BSc Electronics | DSE- Digital Signal Processing Lab CC – II/ Mathematics Foundation for Electronics Lab |

| | | | | |
|-----------|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------|-----------------------------------------------------------------------------------------------|
| | Tutorials: | | | |
| SEPTEMBER | Theory: | <p>Sem V: System Function: signal flow graph, its use in representation and analysis of Discrete Time Systems. Techniques of representations. Matrix generation and solution for DTS evaluations. DFT assumptions and Inverse DFT. Matrix relations, relationship with FT and its inverse, circular convolution, DFT theorems, DCT. Computation of DFT.</p> <p>Sem I: The Normal Distribution, The Central Limit Theorem ; Hypothesis and Inference: Statistical Hypothesis Testing, Confidence Intervals, Phacking, Bayesian Inference, Overview of Machine learning concepts – Over fitting and train/test splits, Types of Machine learning – Supervised, Unsupervised, Reinforced learning</p> | BSc Electronics BSc Electronics | DSE- Digital Signal Processing GE I: Data Sciences |
| | Practicals: | <p>Sem V: Fourier Transform, Discrete Fourier Transform and Fast Fourier Transform</p> <p>Sem I: Functions and function files, programming in matlab: conditional statements(if-end, if-else-end, if-elseif-else-end), switch case, loops(for-end and while-end), break and continue commands. Programs on Loops, creating user defined Function files. Solution of Second Order non-homogeneous Differential Equations Convergence of a given series. Divergence of a given series.</p> | BSc Electronics BSc Electronics | DSE- Digital Signal Processing Lab CC – II/ Mathematics Foundation for Electronics Lab |
| | Tutorials: | | | |
| | Assignment | <p>Sem V: Assignment based on Unit-I and II along with an application implementation on MATLAB</p> <p>Sem I: Assignment based on Unit II</p> | | |
| OCTOBER | Theory: | <p>Sem V: FFT Algorithms and processing gain, Discrimination, interpolation and extrapolation. Gibbs phenomena. FFT of real functions interleaving and resolution improvement. Word length effects. Digital Filters: Analog filter review. System function for IIR and FIR filters, network representation. Canonical and decomposition networks.</p> <p>Sem I: Introduction to Bayes Theorem, Linear Regression- model assumptions, regularization (lasso, ridge, elastic net), Classification and Regression algorithms- Naïve Bayes, K-Nearest Neighbors, logistic regression, decision trees, and random forest</p> | BSc Electronics B.Sc. Electronics | DSE- Digital Signal Processing GE I: Data Sciences |

| | | | | |
|----------|----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|-----------------------------------------------------------------------------------------------|
| | Practicals: | Sem V: Design of a Butterworth analog filter for low pass and high pass. Sem I: Solution of linear system of equations using Gauss – Seidel method. Solution of linear system of equations using L-U decomposition method. | B.Sc. Electronics B.Sc. Electronics | DSE- Digital Signal Processing Lab CC – II/ Mathematics Foundation for Electronics Lab |
| | Mid term Test | Test based on Unit I and II for DSE Test based on Unit I and II for GE-I | | |
| NOVEMBER | Theory: | Sem V: IIR filter realization methods and their limitations. FIR filter realization techniques. Discrete correlation and convolution; Properties and limitations Sem I: Support vector machines (SVM), Overview of Deep Learning | B. Sc. Electronics B.Sc. Electronics | DSE- Digital Signal Processing Lab GE I: Data Sciences |
| | Practicals: | Sem V: Design of digital filters Sem I : Solution of linear system of equations using Gauss Elimination method | B.Sc. Electronics B.Sc. Electronics | DSE- Digital Signal Processing Lab CC – II/ Mathematics Foundation for Electronics Lab |
| | Tutorials: | | | |

|-----------------|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | | | Electronics, Sem V | Signal Processing Lab |
| | Assignment | Assignment: Questions based on topics covered. | B.Sc.(Hons) Electronics, Sem I | Core-Course-II/ Mathematics Foundation for Electronics |
| OCTOBER | Theory | Cauchy's Integral Test, D'Alembert's Ratio Test, Cauchy's nth Root Test, Alternating Series, Leibnitz's Theorem, Absolute Convergence and Conditional Convergence, Power Series. Unit4: Complex Variables and Functions: Complex Variable, Complex Function, Continuity, Differentiability, Analyticity. | B.Sc.(Hons) Electronics, Sem I | Core-Course-II/ Mathematics Foundation for Electronics |
| | Practicals | Solution of linear system of equations using Gauss – Seidel method. Solution of linear system of equations using L-U decomposition method. Power Amplifiers: Class A, B and C, Study of the Colpitt's Oscillator Study of the Hartley's Oscillator Design of a Butterworth analog filter for low pass and high pass. | B.Sc.(Hons) Electronics, Sem III B.Sc.(Hons) Electronics, Sem III B.Sc.(Hons) Electronics, Sem V | SEC/ Design and Fabrication of Printed Circuit Boards Core-Course-V/ Electronics Circuits Lab DSE/ Digital Signal Processing Lab |
| | Tutorials | NA | NA | NA |
| | Mid Term Test | Test: As per the covered topics. | | |
| NOVEMBER | Theory | Unit4: Cauchy-Riemann (C- R) Equations, Harmonic and Conjugate Harmonic Functions, Exponential Function, Trigonometric Functions, Hyperbolic Functions. Line Integral in Complex Plane, Cauchy's Integral Theorem, Cauchy's Integral Formula, Derivative of Analytic Functions. Sequences, Series and Power Series, Taylor's Series, Laurent Series, Zeroes and Poles. Residue integration method, Residue integration of real Integrals. | B.Sc.(Hons) Electronics, Sem I | Core-Course-II/ Mathematics Foundation for Electronics |
| | Practicals | Solution of linear system of equations using Gauss Elimination method. Study of the Phase Shift Oscillator. Design of digital filters | B.Sc.(Hons) Electronics, Sem I B.Sc.(Hons) Electronics, Sem III | Core-Course-II/ Mathematics Foundation for Electronics Lab Core-Course-V/ Electronics Circuits Lab |

| | | | | |

**SEMERSTER WISE TEACHING PLAN
SRI VENKATESWARA COLLEGE**

**Semester I/III/V
(July-Nov 2019)**

Name of the Faculty: Dr Meenakshi Kuhar

Department: Biochemistry

| Month | | Topics | Course | Paper Code/Name |
|-------------|-----------|----------------------------------------------------------------------------------------------------------|-----------------------------------------------------------|----------------------------------------------|
| | | Unit 1: Biosynthesis of RNA in prokaryotes | B Sc (H) Biochemistry III Year Semester V | C 12 Gene Expression and Regulation |
| July | Theory | Unit 6: Introduction to Bioenergetics: Laws of thermodynamics, ATP cycle, free energy, coupled reactions | B Sc (H) Biochemistry II Year Semester III | C-6 Membrane Biology and Bioenergetics |
| | | Unit 2: Proteins: Amino acid building blocks, structure and classification | B. Sc (H) Biological Sciences, II Year Semester III | C-5 Proteins and Enzymes |
| | Practical | Exercise1: Estimation of RNA by orcinol method | B. Sc (H) Biochemistry III Year Semester V | C 12 Gene Expression and Regulation |
| | | Exercise1: Determination of pKa value for acetic acid | B. Sc (H) Biological Sciences, II Year Semester III | BS C-5 Proteins and Enzymes |

SEMERSTER WISE TEACHING PLAN
SRI VENKATESWARA COLLEGE
Semester I/III/V

Name of the Faculty: Dr Meenakshi Kuhar

Department: Biochemistry

| Month | | Topics | Course | Paper Code/Name |
|---------------|-----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------|----------------------------------------------|
| August | | Unit 1: Biosynthesis of RNA in prokaryotes | B Sc (H) Biochemistry III Year Semester V | C 12 Gene Expression and Regulation |
| | Theory | Unit 6: Introduction to Bioenergetics: Redox reactions, standard redox potentials Unit 7: Oxidative Phosphorylation: Electron carriers, mitochondrial electron transport chain. Inhibitors and uncouplers | B Sc (H) Biochemistry II Year Semester III | C-6 Membrane Biology and Bioenergetics |
| | | Unit 2: Proteins: Amino acid building blocks, physical properties | B. Sc (H) Biological Sciences, II Year Semester III | BS C-5 Proteins and Enzymes |
| | Practical | Exercise 2: Extraction of total nucleic acid from plant tissue Exercise 3: Isolation of total RNA from bacteria/yeast | B Sc (H) Biochemistry III Year Semester V | C 12 Gene Expression and Regulation |
| | | Exercise 2: Preparation of buffers Exercise 3: Protein estimation by Biuret method | B. Sc (H) Biological Sciences, II Year Semester III | BS C-5 Proteins and Enzymes |

SEMERSTER WISE TEACHING PLAN

Name of the Faculty: Dr Meenakshi Kuhar

Department: Biochemistry

| Month | | Topics | Course | Paper Code/Name |
|------------------|------------------|------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------|----------------------------------------------|
| September | Theory | Unit 2: Biosynthesis of RNA in eukaryotes | B Sc (H) Biochemistry III Year Semester V | C 12 Gene Expression and Regulation |
| | | Unit 7: Oxidative Phosphorylation: Chemi-osmotic theory, proton motive force, Structure and mechanism of ATP synthase, ROS production, thermogenesis | B Sc (H) Biochemistry II Year Semester III | C-6 Membrane Biology and Bioenergetics |
| | | Unit 3: Enzymes: Classification and nomenclature, ribozymes, coenzymes, cofactors, kinetics of enzyme catalyzed reactions | B. Sc (H) Biological Sciences, II Year Semester III | BS C-5 Proteins and Enzymes |
| | Practical | Exercise 4A: Growth curve of E coli Exercise 4B: Diauxic growth curve effect | B Sc (H) Biochemistry III Year Semester V | C 12 Gene Expression and Regulation |
| | | Exercise 4: Estimation of proteins by Lowry's method Exercise 5: Separation of sugars by TLC | B. Sc (H) Biological Sciences, II Year Semester III | BS C-5 Proteins and Enzymes |

| Month | | Topics | Course | Paper Code/Name |
|-----------------|------------------|------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------|----------------------------------------------|
| November | Theory | Unit 8: Regulation of gene expression in eukaryotes | B Sc (H) Biochemistry III Year Semester V | C 12 Gene Expression and Regulation |
| | | Unit8:Photophosphorylation:Photosynthesis in plants, photosystem I and II, Z-scheme, cyclic photophosphorylation | B Sc (H) Biochemistry II Year Semester III | C-6 Membrane Biology and Bioenergetics |
| | | Unit 4: Isolation and purification of enzymes: Techniques of enzyme purification, enzyme immobilization methods | B.Sc (H)Biological Sciences, II Year Semester III | BS C-5 Proteins and Enzymes |
| | Practical | Mock practicals | B Sc (H) Biochemistry III Year Semester V | C 12 Gene Expression and Regulation |
| | | Exercise 8: Progress curve of an enzyme | B. Sc (H)Biological Sciences, II Year Semester III | BS C-5 Proteins and Enzymes |

SEMESTER WISE TEACHING PLAN
SRI VENKATESWARA COLLEGE

Name of the Faculty: Dr.N.Latha

Department: BIOCHEMISTRY

Semester : I/III/V (ODD SEMESTER)

| Month | | Topics | Course | Paper Code/Name |
|--------|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------|-----------------------------------------------|
| JULY | Theory | Biomolecules: Diversity and Distribution | B.Sc. BIOLOGICAL SCIENCES (Hons.) II Year, Semester III | BSC5 : PROTEINS AND ENZYMES |
| | | Introduction to Fatty acid Metabolism | B.Sc. BIOCHEMISTRY (Hons.) II Year, Semester III | CBCS C5: Metabolism OF Carbohydrates & Lipids |
| | | Biomolecules-Cellular and Chemical Foundations of Life | B.Sc. BIOCHEMISTRY (Hons.) I Year, Semester I | CBCS C1: Molecules of Life |
| | Practicals | Protein Purification Basics & Applications | B.Sc. BIOCHEMISTRY (Hons.) II Year, Semester III | SEC : PROTEIN PURIFICATION |
| | | Introduction to Metabolism of carbohydrates & Lipids | B.Sc. BIOCHEMISTRY (Hons.) II Year, Semester III | METABOLISM OF CARBOHYDRATES & LIPIDS |
| AUGUST | Theory | Lipids: Role of lipids in cellular architecture and functions. Definition and classification of lipids. Structure and function of fatty acids, triacylglycerols, phospholipids and sterols. Nucleic acids: Role of nucleic acids in living system. Composition of nucleic acids-the purine and pyrimidine bases | B.Sc. BIOLOGICAL SCIENCES (Hons.) II Year, Semester III | BSC5 : PROTEINS AND ENZYMES |
| | | Digestion, mobilisation and transport of cholesterol and triacyl glycerols, fatty acid transport to mitochondria, β oxidation of saturated, unsaturated, odd and even numbered and branched chain fatty acids, regulation of fatty acid oxidation, peroxisomal oxidation, ω oxidation, ketone bodies metabolism, | B.Sc. BIOCHEMISTRY (Hons.) II Year, Semester III | CBCS C5: Metabolism OF Carbohydrates & Lipids |
| | | Lipids : Building blocks of lipids - fatty acids, glycerol, ceramide. Storage lipids - triacyl glycerol, Structural lipids in membranes – glycerophospholipids, galactolipids and sulpholipids, | B.Sc. BIOCHEMISTRY (Hons.) I Year, Semester I | CBCS C1: Molecules of Life |
| | Practicals: | Assay acid phosphatase Partial purification of enzyme by salting out Dialysis | B.Sc. BIOCHEMISTRY (Hons.) II Year, Semester III | SEC: Protein Purification |

| | | | | |
|-----------|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------|-----------------------------------------------------|
| | | Estimation of Cholesterol by Zaks method Estimation of Inorganic phosphorous Estimation of Choline | B.Sc. BIOCHEMISTRY (Hons.) II Year, Semester III | CBCS C5: Metabolism OF Carbohydrates & Lipids |
| SEPTEMBER | Theory | Classification of proteins on the basis of composition, conformation and function-functional diversity of proteins. The amino acid building blocks-classification, structure and physical properties of the standard amino acids. | B.Sc. BIOLOGICAL SCIENCES (Hons.) II Year, Semester III | BSC5 : PROTEINS AND ENZYMES |
| | | Fatty acid Biosynthesis, Fatty acid synthase complex. Synthesis of saturated, unsaturated, odd and even chain fattyacids and regulation, Synthesis of membrane phospholipids in prokaryotes and eukaryotes, respiratory distress 16syndrome, biosynthesis of triacylglycerol, biosynthesis of | B.Sc. BIOCHEMISTRY (Hons.) II Year, Semester III | CBCS C5: Metabolism OF Carbohydrates & Lipids |
| | | Waxes, Terpenes, Steroids, Eicosanoids, Lipids as signals, cofactors and pigments | B.Sc. BIOCHEMISTRY (Hons.) I Year, Semester I | CBCS C1: Molecules of Life |
| | Practicals | Ion Exchange Chromatography Gel Filtration | B.Sc. BIOCHEMISTRY (Hons.) II Year, Semester III | SEC: Protein Purification |
| | | <ul style="list-style-type: none"> Assay of salivary amylase. Isolation of cholesterol from egg yolk and its estimation | B.Sc. BIOCHEMISTRY (Hons.) II Year, Semester III | CBCS C5: Metabolism OF Carbohydrates & Lipids |
| | <u>Test</u> | Lipids: Role of lipids in cellular architecture and functions. Definition and classification of lipids. Structure and function of fatty acids, triacylglycerols, phospholipids and sterols. Nucleic acids: Role of nucleic acids in living system. Composition of nucleic acids-the purine and pyrimidine bases. Classification of proteins on the basis of composition, conformation and function-functional diversity of proteins. Classification of proteins on the basis of composition, conformation and function-functional diversity of proteins. The amino acid building blocks-classification, structure and | B.Sc. BIOLOGICAL SCIENCES (Hons.) II Year, Semester III | BSC5 : PROTEINS AND ENZYMES |

| | | | | |
|---------|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------|-----------------------------------------------|
| OCTOBER | | physical properties of the standard amino acids. | | |
| | | Fatty acid Metabolism- β oxidation of saturated, unsaturated, odd and even numbered and branched chain fatty acids, regulation of fatty acid oxidation, peroxisomal oxidation, ω oxidation, ketone bodies metabolism, | B.Sc. BIOCHEMISTRY (Hons.) II Year, Semester III | CBCS C5: Metabolism OF Carbohydrates & Lipids |
| | | Lipids –Structure, fatty acids, glycerol, ceramide. Storage lipids - triacylglycerol, Structural lipids in membranes – glycerophospholipids, galactolipids and sulpholipids, Steroids, Waxes | B.Sc. BIOCHEMISTRY (Hons.) I Year, Semester I | CBCS C1: Molecules of Life |
| | Theory | Proteinaceous and non-proteinaceous, essential and non-essential amino acids. Primary, secondary, tertiary and quaternary structure of proteins. Structure of myoglobin and hemoglobin. Molecular physiology of myoglobin and hemoglobin, Bohr effect, Hill's coefficient. Concerted and sequential models for allosteric proteins | B.Sc. BIOLOGICAL SCIENCES (Hons.) II Year, Semester III | BSC5 : PROTEINS AND ENZYMES |
| | | Synthesis of prostaglandins, leukotrienes and thromboxanes. Synthesis of cholesterol, regulation of cholesterol synthesis. Synthesis of steroids and isoprenoids | B.Sc. BIOCHEMISTRY (Hons.) II Year, Semester III | CBCS C5: Metabolism OF Carbohydrates & Lipids |
| | | Amino acids :Structure and classification, physical, chemical and optical properties of amino acids | B.Sc. BIOCHEMISTRY (Hons.) I Year, Semester I | CBCS C1: Molecules of Life |
| | Practicals: | Electrophoresis | B.Sc. BIOCHEMISTRY (Hons.) II Year, Semester III | SEC: Protein Purification |
| | | <ul style="list-style-type: none"> Isolation of lecithin, identification by TLC, and its estimation. | B.Sc. BIOCHEMISTRY (Hons.) II Year, Semester III | CBCS C5: Metabolism OF Carbohydrates & Lipids |
| | Assignment | Biomolecules: Diversity and Distribution, Lipids: Role of lipids in cellular architecture and functions. Definition and classification of lipids. Structure and function of fatty acids, triacylglycerols, phospholipids and sterols. Nucleic acids: Role of nucleic acids in living system. Composition of nucleic acids-the purine and pyrimidine bases | B.Sc. BIOLOGICAL SCIENCES (Hons.) II Year, Semester III | BSC5 : PROTEINS AND ENZYMES |
| | | | | |

| | | | | |
|----------|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------|-----------------------------------------------|
| NOVEMBER | | Fatty acid Biosynthesis, Fatty acid synthase complex. Synthesis of saturated, unsaturated, odd and even chain fatty acids and regulation, Synthesis of membrane phospholipids in prokaryotes and eukaryotes, respiratory distress 16 syndrome, biosynthesis of triacylglycerol, biosynthesis of plasmalogens, sphingolipids and | B.Sc. BIOCHEMISTRY (Hons.) II Year, Semester III | CBCS C5: Metabolism OF Carbohydrates & Lipids |
| | | Amino acids :Structure and classification, physical, chemical and optical properties of amino acids, Unusual Amino acids, Titration Curves | B.Sc. BIOCHEMISTRY (Hons.) I Year, Semester I | CBCS C1: Molecules of Life |
| | Theory: | Role of Metal ions in Biology: Metalloprotein, Metalloenzymes, metal base drug interaction and inhibition; metallo porphyrins, Redox. Carriers in mitochondrial electron transport chain. Carbohydrates: Biological roles of carbohydrates. Structure of monosacharides- Hexoses and pentoses. Disacharides-Sucrose, lactose, maltose. Storage and structural polysacharidesGlycogen, starch and cellulose | B.Sc. BIOLOGICAL SCIENCES (Hons.) II Year, Semester III | BSC5 : PROTEINS AND ENZYMES |
| | | Integration of metabolism, Class presentations. | B.Sc. BIOCHEMISTRY (Hons.) II Year, Semester III | CBCS C5: Metabolism OF Carbohydrates & Lipids |
| | | Vitamins-Water Soluble & Fat soluble Vitamins, Structure and active forms of water soluble and fat soluble vitamins, deficiency diseases and symptoms, hypervitaminosis | B.Sc. BIOCHEMISTRY (Hons.) I Year, Semester I | CBCS C1: Molecules of Life |
| | Practicals: | Revision of practicals, Mock Practical Examination | B.Sc. BIOCHEMISTRY (Hons.) II Year, Semester III | SEC : PROTEIN PURIFICATION |
| | | Revision of practicals, Mock Practical Examination | B.Sc. BIOCHEMISTRY (Hons.) II Year, Semester III | METABOLISM OF CARBOHYDRATES & LIPIDS |

SEMESTER WISE TEACHING PLAN SRI VENKATESWARA COLLEGE

Name of the Faculty: Dr. Anju Kaicker

Department: Biochemistry

Semester : I/III/IV

| Month | | Topics | Course | Paper Code/Name |
|--------|--------------------|------------------------------------------------------------------------------------------------------------|-----------------------|-----------------|
| JULY | Theory | Receptor study, Scatchard Plot, Binding ,affinity studies, GPCR, Structure and signaling mechanism | B Sc. H, Biochemistry | BCH C7 |
| | Practicals | | | |
| | Tutorials | | | |
| AUGUST | Theory: | Phosphoinositide pathway, phosphatases, diesterases, PKA, PKB, PKC, PKG, NO, MAP Kinase, JAK STAT pathways | B Sc. H, Biochemistry | BCH C7 |
| | | Gel Filtration, principle and applications, Vo & Ve & Vs | PGDMB | PGDMB 101 |
| | | Historical Background, Antigen & immunogen, Antibody structure and function , Precipitation, | PGDMB | PGDMB103 |
| | Practicals: | Separation of Hb and dichromate Separation of DB and BPB, Determination of Kd, Vo & Vs | PGDMB | PGDMBL 101 |
| | | DID, SRID, IEP, CIE, Counter electrophoresis | PGDMB 103 | PGDMB 103 |

| | | | | |
|-----------|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------|------------------------------------------------|
| | Tutorials: | | | |
| SEPTEMBER | Theory: | <p>Steroid and thyroid hormone receptors and signalling, , Anthrax, pertussis toxin and action Hypothalamic –Pituitary axis ; pituitary hormones , growth factors</p> <p>Affinity chromatography, principle Elution methods, Ligand, Matrix activation ,TLC, GC ELISA, Fluorescent Assays, RIA Application of the tests</p> | <p>B Sc. H, Biochemistry</p> <p>PGDMB</p> <p>PGDMB</p> | <p>BCH C7</p> <p>PGDMB 101</p> <p>PGDMB103</p> |
| | | | | |

| | | | | |
|--|----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|------------------------------------|
| | | | | |
| | Practicals: | <p>Separation of serum proteins by ion exchange chromatography, Separation of BSA&lysozyme</p> <p>Agglutination Tests : Direct and Indirect</p> | <p>PGDMB</p> <p>PGDMB</p> | <p>PGDMB 101</p> <p>PGDMBL 103</p> |
| | Tutorials: | | | |
| | <u>Assignment :</u> | | | |

| | | | | |
|----------|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------|--------------------------------------|
| OCTOBER | Theory: | Reproductive hormones, interplay of hormones during reproduction, parturition, lactation Plant tissue culture ,:Hoods,Callus induction Monoclonal Antibodies, production, Uses, Antigen processing | B Sc H Biochemistry PGDMB PGDMB | BCH C7 PGDMB 101 PGDMB 103 |
| | Practicals: | IgG purification by affinity column, TLC separations Isolation of PBMC Isolation of macrophages from spleen | PGDMB PGDMB | PGDMB 101 PGDMDL 103 |
| | Tutorials: | | | |
| | <u>Test</u> | Class tests for each paper | | |
| | | | | |
| NOVEMBER | Theory: | PI 3 Kinase, Insulin receptor family, Desensitization Animal tissue culture, primary Secondary culture, cell lines MHC and its significance Revision Assignments | B Sc H Biochemistry PGDMB PGDMB | BCH C7 PGDMB 101 PGDMB 103 |
| | Practicals: | REVISION EXERCISES and FINAL PRACTICAL EXAM | PGDMB PGDMB | PGDMB 101 PGDMBL 103 |
| | Tutorials: | | | |
| | | | | |

SEMESTER WISE TEACHING PLAN SRI VENKATESWARA COLLEGE

Name of the Faculty: Dr.Nandita Narayanasamy **Department:** BIOCHEMISTRY

Semester : I/III/V

| Month | | Topics | Course | Paper Code/Name |
|--------|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------|---------------------------------------------------|
| JULY | Theory | Introduction to Genetics and understanding complementation test. | B.Sc. BIOCHEMISTRY (Hons.) III Year, Semester V | BCH C-11: Concepts In Genetics |
| | | Introduction to Nutritional Biochemistry | B.Sc. BIOCHEMISTRY (Hons.) III Year, Semester V | BCH DSE -1: Nutritional Biochemistry |
| | Practicals | Functions of hormones and their regulation. Chemical signaling - endocrine, paracrine, autocrine, intracrine and neuroendocrine mechanisms. Chemical classification of | B.Sc. BIOCHEMISTRY Hons.) II Year, Semester III | BCH C7: Hormone biochemistry and function |
| | | Orientation for Practicals in Nutritional Biochemistry | B.Sc. BIOCHEMISTRY (Hons.) III Year, Semester V | BCH DSE -1: Nutritional Biochemistry |
| | | Orientation for Practicals in Membrane Biology and Bioenergegit | B.Sc. BIOCHEMISTRY Hons.) II Year, Semester III | BCH C-6 Membrane biology and Bioenergetics |
| AUGUST | Theory | Extentions to Mendalian Genetics; Incomplete dominance, Co dominance, Lethal alleles , Multiple alleles. Concept of monogenic and polygenic traits, phenocopy, Peneterance and Variable expressivity. Chromosomal theory of inheritance. Pedigree analysis | B.Sc. BIOCHEMISTRY (Hons.) III Year, Semester V | BCH C-11: Concepts In Genetics |
| | | Review functions of carbohydrates. Digestion, absorption ,utilization and storage, hormonal regulation of blood glucose. Dietary requirements and source of carbohydrates, Dietary fiber, role of fibre in lipid metabolism, colon function, blood glucose level and GI tract functions. | B.Sc. BIOCHEMISTRY (Hons.) III Year, Semester V | BCH DSE -1: Nutritional Biochemistry |
| | | Thyroid gland. Biosynthesis of thyroid hormone and its regulation; its physiological and biochemical action. Pathophysiology - Goiter, Graves disease, cretinism, myxedema, Hashimato's disease. | B.Sc. BIOCHEMISTRY Hons.) II Year, Semester III | BCH C 7: Hormone Biochemistry and Function. |
| | Practicals: | Anthropometric measurements. Anthropometric identifications for Kwashiorkor, Marasmus and Obesity. . | B.Sc. BIOCHEMISTRY (Hons.) III Year, Semester V | BCH DSE -1: Nutritional Biochemistry |

| | | | | |
|-----------|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------|---------------------------------------------------|
| | | Effect of lipid composition on the permeability of a lipid monolayer. 2. Determination of CMC of detergents. 3. RBC ghost cell preparation and to study the effect of detergents on membranes. | B.Sc. BIOCHEMISTRY (Hons.) II Year, Semester III | BCH C-6 Membrane biology and Bioenergetics |
| SEPTEMBER | Theory | Gene interactions: additive gene effect, recessive and dominant epistasis, duplicate dominant and recessive epistasis, suppressor and modifier gene. Sex determination: heteromorphous chromosomes, genetic sex determination, temp dependent sex determination. Sex determination in C.elegans, Drosophila and humans. Sex linked, sex influenced inheritance, Drosophila development, maternal effect genes, morphogens and zygotic gene activity in development. Dosage compensation, Genetic imprinting. | B.Sc. BIOCHEMISTRY (Hons.) III Year, Semester V | BCH C-11: Concepts In Genetics |
| | | Review of classification, sources, functions, digestion, absorption, utilization and storage. Essential Fatty Acids; Functions of EFA, RDA, – excess and deficiency of EFA. Lipotropic factors, role of saturated fat, cholesterol, lipoprotein and triglycerides. Importance of the following: a) Omega – fatty acids. Omega 3/ omega 6 ratio b) Phospholipids c) Cholesterol in the body d) Mono, Polyunsaturated and Saturated Fatty Acids. | B.Sc. BIOCHEMISTRY (Hons.) III Year, Semester V | BCH DSE -1: Nutritional Biochemistry |
| | | PTH, Vitamin D and calcitonin. Mechanism of Ca ²⁺ regulation and pathways involving bone, skin, liver, gut and kidneys. Pathophysiology - rickets, osteomalacia, osteoporosis. Regulation of release of insulin, glucagon, gastrin, secretin, CCK, GIP, adipoleptin, leptin and ghrelin. Summary of hormone metabolite control of GI function. Physiological and biochemical action. Pathophysiology - diabetes type I and type II. | B.Sc. BIOCHEMISTRY (Hons.) II Year, Semester III | BCH C7 : Hormone Biochemistry and function. |
| | Practicals | Biochemical assessment. ROS assessment. Determination of oxidative stress: TBARS, antioxidant enzymes in hemolysate Biochemical assessment. Nutritional status, Vitamin E | B.Sc. BIOCHEMISTRY (Hons.) III Year, Semester V | BCH DSE-1 Nutritional biochemistry |
| | | Separation of photosynthetic pigments by TLC. 5. Isolation of mitochondria from liver and assay of marker enzyme SDH. 6. Study photosynthetic O ₂ evolution in hydrilla plant. 7 | B.Sc. BIOCHEMISTRY (Hons.) II Year, Semester III | BCH C 6: Membrane biology and Bioenergetics |
| | | | | |
| | Test | Mendelian genetics, extensions to Mendelian genetics, pedigree analysis | B.Sc. BIOCHEMISTRY (Hons.) III Year, Semester V | BCH C-11: Concepts In Genetics |

| | | | | |
|----------|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------|---------------------------------------------------------------------------------|
| | <u>Assignment</u> | Pedigree analysis | B.Sc. BIOCHEMISTRY (Hons.) III Year, Semester V | GGHT 501: Genetics and Genomics I |
| | | Case studies in Endocrinology | B.Sc. BIOCHEMISTRY (Hons.) II Year, Semester III | BCH C 7: hormone Biochemistry and function |
| OCTOBER | Theory | Dosage compensation, Genetic imprinting, Quantitative genetics, | B.Sc. BIOCHEMISTRY (Hons.) III Year, Semester V | BCH C-11: Concepts In Genetics |
| | | Calcium, Phosphorus and Iron - Distribution in the body digestion, Absorption, Utilization , Transport, Excretion, Balance, Deficiency, Toxicity, Sources, RDA | B.Sc. BIOCHEMISTRY (Hons.) III Year, Semester V | BCH DSE -1: Nutritional Biochemistry |
| | | Adipose tissue hormones and regulation of food intake. | B.Sc. BIOCHEMISTRY (Hons.) II Year, Semester III | BCH C 7: Hormone Biochemistry and function. |
| | Practicals: | Clinical assessment of Nutritional status, Case studies. Maintaining a dietary record to assess nutritional status. | B.Sc. BIOCHEMISTRY (Hons.) III Year, Semester V | BCH DSE -1: Nutritional Biochemistry |
| | | Isolation of chloroplast from spinach leaves, estimation of chlorophyll and photosynthetic activity. Assessment. | B.Sc (Hons) BIOCHEMISTRY ,II Year, Semester III | BCH C 6: Membrane biology and bioenergetics.. |
| | <u>Test</u> | Test on Unit 2 and 3 of Nutritional Biochemistry. Test in Extension to Mendelian genetics, Pedigree and sex determination. | B.Sc. BIOCHEMISTRY (Hons.) III Year, Semester V | BCH DSE -1: Nutritional Biochemistry BCH C-11: Concepts In Genetics |
| | | Test on Thyroid, Parathyroid and Pancreatic hormones. Assessment –Case studies. | B.Sc. BIOCHEMISTRY (Hons.) II Year, Semester III | BCH C7: Hormone Biochemistry and function. |
| NOVEMBER | Theory: | Extra nuclear inheritance, tests for organelle heredity and maternal effect, epigenetic mechanisms of transcriptional regulation & genomic imprinting. Inheritance of complex trait, analysis of quantitative traits, narrow and broad sense heritability, quantitative trait loci (QTL) and their identification. Hardy-Weinberg law, predicting allele and genotype frequencies and exceptions to Hardy-Weinberg principle. Molecular evolution - analysis of nucleotide and amino acid sequences, molecular phylogenies, homologous sequences, phenotypic evolution and speciation | B.Sc. BIOCHEMISTRY (Hons.) III Year, Semester V | BCH C-11: Concepts In Genetics |

| | | | | |
|--|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------|---------------------------------------------------|
| | | Iodine, Fluoride, Mg, Cu, Zn, Se, Manganese, Chromium, Molybdenum Distribution in the human body, Physiology, Function, deficiency, Toxicity and Sources Appetite changes with drug intakes and malnutrition. Food as medicine. | B.Sc. BIOCHEMISTRY (Hons.) III Year, Semester V | BCH DSE -1: Nutritional Biochemistry |
| | | Anatomy of the adrenal gland. Adrenal medullary hormones. Glucocorticoids and mineralocorticoids. Aldosterone, renin angiotensin system, cortisol, epinephrine and norepinephrine. Fight or flight response, stress response. Pathophysiology – Addison's disease, Conn's syndrome, Cushing syndrome. | B.Sc. BIOCHEMISTRY Hons.) II Year, Semester III | BCH C7: Hormone Biochemistry and Function |
| | Practicals: | Revision exercises, value added experiments, Mock Practical Examination and final practical examination | B.Sc. BIOCHEMISTRY (Hons.) III Year, Semester V | BCH DSE 1: Nutritional biochemistry |
| | | Revision exercises, value added experiments Mock Practical Examination and final practical examination | B.Sc (Hons) BIOCHEMISTRY, II Year, Semester III | BCH C 6: Membrane biology and bioenergetics |

SEMESTER WISE TEACHING PLAN
SRI VENKATESWARA COLLEGE

Name of the Faculty: Dr. Shalini Sen

Department: Biochemistry

B.Sc.(H) Biological Sciences, Semester V; P.G. Diploma-Semester I

| Month | | Topics | Course | Paper Code/Name |
|-------|---------------------|------------------------------|----------------------------------------------------------------|-----------------------------------------|
| July | Theory | Unit 1 Epistasis, Pleiotropy | BSc.(H) Biological Sciences Semester V | BS C12 Fundamentals of Genetics |
| | | Entrance and Admissions | P.G.Diploma in Molecular and Biochemical Technology Semester I | PGDMB 101 Biophysical Techniques 1 |
| | | Entrance and Admissions | P.G.Diploma in Molecular and Biochemical Technology Semester I | PGDMB 102 Recombinant DNA Technology I |
| | Practicals | NA | P.G.Diploma in Molecular and Biochemical Technology Semester I | PGDMB L104 Biophysical Techniques I |
| | | NA | P.G.Diploma in Molecular and Biochemical Technology Semester I | PGDMB L105 Recombinant DNA Technology I |
| | Internal assessment | Class Discussions | | |

| | | | | |
|--------|--------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------|-------------------------------------|
| August | Theory | Unit 3 Mutations Chromosomal mutations, Deletion, Duplication, Inversion, Translocation, Aneuploidy and Polyploidy; Gene mutations: Induced v/s Spontaneous, Back v/s Suppressor mutations. Molecular basis of mutations in relation to UV light and chemical mutagens, Detection of mutations: CIB method, Attached X-method, DNA repair mechanisms | BSc.(H) Biological Sciences Semester V | BS C12 Fundamentals of Genetics |
| | | Unit 1. Principles of Spectrophotometry: ultraviolet-visible absorption spectrophotometry, visible recording of spectra for proteins and nucleic acids and calculation of concentration of protein and nucleic acids from spectrum. Fluorescence spectroscopy. | P.G.Diploma in Molecular and Biochemical Technology Semester I | PGDMB 101 Biophysical Techniques 1 |
| | | Unit 1. Restriction enzymes: various types, their properties, nomenclature, creating new restriction sites by DNA manipulation. DNA methylation systems in <i>E.coli</i> (dam, dcm, M <i>Eco</i> KI). Various DNA modifying enzymes used in cloning (DNA polymerases :DNA Polymerase I, Klenow fragment, T4DNA Polymerase, T7 DNA Polymerase), RNA Polymerases(T3, T7, SP6), Reverse Transcriptase (AMV, MoMLV), Ligases (T4 DNA ligase, E.coli DNA ligase), Taq polymerase. | P.G. Diploma In Molecular and Biochemical Technology Semester I | PGDMB 102 RDT I |
| | Practicals : | 1. Spectrophotometric analysis of nucleic acids. 2. Protein estimation at λ_{280} . 3. Effect of solvent perturbation on absorption by a chromophore | P.G. Diploma In Molecular and Biochemical Technology Semester I | PGDMB L104 Biophysical Techniques I |

| | | | | |
|-----------|----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------|--------------------------------------------|
| | | <p>1. Preparation and sterilization of LB medium.</p> <p>2. Obtaining isolated colonies of <i>E.coli</i> by streak plate and spread plate method.</p> <p>3. To study the growth curve of <i>E.coli</i> DH5α</p> | P.G. Diploma In Molecular and Biochemical Technology Semester I | PGDMB L105 Recombinant DNA Technology I |
| | Internal Assessment | Class Discussions | | |
| September | Theory | <p>Unit 4 Extra chromosomal Inheritance No. of Hours: 6 Chloroplast mutation/Variation in four 'o clock plant and <i>Chlamydomonas</i>, Mitochondrial mutations in <i>Neurospora</i> and yeast, Maternal effects, Infective heredity-Kappa particles in <i>Paramecium</i>.</p> | BSc.(H) Biological Sciences Semester V | BS C12 Fundamentals of Genetics |
| | | <p>Theory of polyacrylamide gel electrophoresis: native and SDS PAGE, reducing and non reducing gels, detection of protein bands in gels- Coomassie blue staining, silver staining, fluorescence staining, molecular weight determination by SDS PAGE recovery of proteins from the gel, affinity staining, isoelectric focusing of proteins, Two dimensional gel electrophoresis, gradient gel electrophoresis, Differential gel electrophoresis(DIGE).</p> <p>Theory of agarose gel electrophoresis, Pulsed Field Gel Electrophoresis.</p> | P.G. Diploma In Molecular and Biochemical Technology Semester I | PGDMB 101 Biophysical Techniques 1 |
| | | <p>Unit 3. Covalent linkage of DNA fragments to vector molecules: linkers, adapters, conversion adaptors, homopolymer tailing (recovery of DNA insert after homopolymer tailing).</p> <p>Generation of genomic and cDNA libraries: (mRNA source,</p> | P.G. Diploma In Molecular and Biochemical Technology Semester I | PGDMB 102 RDT I |

| | | | | |
|----------------|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------|--------------------------------------------|
| | | integrity, enrichment techniques, different methods of first strand and second strand of cDNA synthesis. | | |
| | Practicals | 1. Agarose gel electrophoresis: 2. Determination of molecular weight of unknown DNA sample | P.G. Diploma In Molecular and Biochemical Technology Semester I | PGDMB L104 Biophysical Techniques I |
| | | 1. Isolation of chromosomal DNA of <i>E.coli</i> 2. Isolation of plasmid DNA by the alkaline lysis method (mini-prep) | P.G. Diploma In Molecular and Biochemical Technology Semester I | PGDMB L105 Recombinant DNA Technology I |
| | | Class Tests | | |
| October | Theory | Unit 7 Population and Evolutionary Genetics Allele frequencies, Genotype frequencies, Hardy-Weinberg Law | BSc.(H) Biological Sciences Semester V | BS C12 Fundamentals of Genetics |
| | | Plant Tissue Culture: concept of totipotency, callus, plant tissue culture laboratory set up, tissue culture media, phytohormones, cybrids, cell, tissue and organ culture, somatic embryogenesis, organogenesis, applications (somatic hybridization, embryo rescue, virus-free plants, somaclonal variations). | P.G. Diploma In Molecular and Biochemical Technology Semester I | PGDMB 101 Biophysical Techniques 1 |
| | | Limitations of cDNA synthesis (5' end RACE, 3' end RACE). Solid phase synthesis of DNA: (phosphoramidite based). | P.G. Diploma Biochemical Technology and Biotechnology Semester I | PGDMB 102 RDT I |

| | | | | |
|-----------------|----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------|-----------------------------------------|
| | Practicals | 1. Aseptic culture of explants on MS medium. (Plant Tissue Culture). | P.G. Diploma Biochemical Technology and Biotechnology Semester I | PGDMB L104 Biophysical Techniques I |
| | | 1. Plasmid DNA isolation by maxi-preparation. 2. Digestion of plasmid DNA with restriction enzymes | P.G. Diploma Biochemical Technology and Biotechnology Semester I | PGDMB L105 Recombinant DNA Technology I |
| | Internal Assessment | Mid Term Tests | | |
| November | Theory | Unit 7(contd). Role of natural selection, Genetic drift. Speciation | BSc.(H) Biological Sciences Semester V | BS C12 Fundamentals of Genetics |
| | | . Animal tissue culture: primary culture, cell lines, continuous cell lines (transformation, anchorage independence, contact inhibition etc) applications. | P.G. Diploma In Molecular and Biochemical Technology Semester I | PGDMB 101 Biophysical Techniques 1 |
| | | Sequence dependent and independent screening: PCR based, colony and plaque hybridization, functional screening, immunological screening, gain of function screening. HRT, HART | P.G. Diploma Biochemical Technology and Biotechnology Semester I | PGDMB 102 RDT I |
| | Practical | Repetition of any practical, as required. | P.G. Diploma In Molecular and Biochemical Technology Semester I | PGDMB L 104 BPT I |
| | | Recovery of DNA from low-melting temperature agarose gel: using gel – extraction kit. Repetition of any practical, as required. | P.G. Diploma In Molecular and Biochemical Technology Semester I | PGDMB L105 RDT I |

SEMESTER WISE TEACHING PLAN
SRI VENKATESWARA COLLEGE

Name of the Faculty: Dr. Vandana Malhotra

Department: BIOCHEMISTRY

Semester: I, III, V, B.Sc (H) Biological Sc. (Sem V)

| Month | | Topics | Course | Paper Code/Name |
|-------|------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------|------------------------------------------------|
| July | Theory | Unit 1. Foundations of Biochemistry No. of HOURS: 6 Cellular and chemical foundations of life, Water: unique properties, weak interactions in aqueous systems, ionization of water, buffering action in biological system, water as a reactant and fitness of the aqueous environment. | B.Sc. (H) BIOCHEMISTRY I Year, Semester I | BCH C-1: Molecules of Life |
| | | UNIT 5: Genetics of bacteria and viruses No. of hours: 6 Mechanism of genetic exchange - conjugation, transformation and transduction. Gene mapping in bacteria. | B.Sc. (H) BIOCHEMISTRY III Year, Semester V | BCH-C11 Concepts in Genetics |
| | | Unit 4: The genetic code No. of hours: 4 Degeneracy of the genetic code, wobble in the anticodon, features of the genetic code, nearly universal code. | B.Sc. (H) BIOCHEMISTRY III Year, Semester V | BCH-C12 Gene Expression and Regulation |
| | | Unit 5: Genome Dynamics-Transposable Genetic Elements No. of hours: 8 Prokaryotic transposable elements-IS elements, Composite transposons, Tn-3 elements; Eukaryotic transposable elements- Ac-Ds system in maize and P-elements in drosophila; Uses of transposons | B.Sc. (H) BIOLOGICAL SCIENCE III Year, Semester V | BS-C12 Fundamentals of Genetics |
| | Practicals | <ul style="list-style-type: none"> To determine CMC of SDS using a conductivity meter | B.Sc. BIOCHEMISTRY (Hons) II Year, Semester III | BCH C-6: Membrane Biology and Bioenergetics |
| | | <ul style="list-style-type: none"> To determine RNA concentration in given sample using Orcinol test (Bials Test) | B.Sc. BIOCHEMISTRY (Hons) III Year, Semester V | BCH-C12 Gene Expression and Regulation |
| | | Isolation of plasmid DNA from <i>E.coli</i> | B.Sc Biological Science III yr Semester V | BS-C12 Fundamentals of Genetics |

| | | | | |
|--------|--------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------|------------------------------------------------|
| AUGUST | Theory | Unit 1. Foundations of Biochemistry No. of HOURS: 6 Contd. UNIT III: Carbohydrates and Glycobiology No. of hours : 16 Monosaccharides - structure of aldoses and ketoses; Ring structure of sugars, conformations of sugars, mutarotation, anomers, epimers and enantiomers; Structure of biologically important 20 sugar derivatives, oxidation and reduction of sugars; Formation of disaccharides, reducing and non-reducing disaccharides; Polysaccharides – homo- and heteropolysaccharides, structural and storage polysaccharides; Structure and role of glycoconjugates - proteoglycans, glycoproteins and glycolipids (gangliosides and lipopolysaccharides); Carbohydrates as informational molecules. | B.Sc. (H) BIOCHEMISTRY I Year, Semester I | BCH C-1: Molecules of Life |
| | | UNIT V: Genetics of bacteria and viruses No. of hours: 6 Contd. | B.Sc. (H) BIOCHEMISTRY III Year, Semester V | BCH-C11 Concepts in Genetics |
| | | Unit 4 The genetic code No. of hours: 4 Contd. Unit 5 Biosynthesis of proteins No. of hours : 10 Messenger RNA, transfer RNA, attachment of amino acids to tRNA, the ribosome - initiation, elongation and termination of translation, regulation of translation. Comparison of prokaryotic and eukaryotic protein synthesis. Use of antibiotics in understanding protein synthesis and applications in medicine. | B.Sc. (H) BIOCHEMISTRY III Year, Semester V | BCH-C12 Gene Expression and Regulation |
| | | Unit 5: Genome Dynamics-Transposable Genetic Elements No. of hours: 8 Contd. | B.Sc. (H) BIOLOGICAL SCIENCE III Year, Semester V | BS-C12 Fundamentals of Genetics |
| | Practicals : | <ul style="list-style-type: none"> To determine CMC of SDS using a conductivity meter To determine CMC of TritonX100 using a conductivity meter To determine CMC of SDS and SDS using PAN dye To study permeability of membrane to various oils | B.Sc. BIOCHEMISTRY (Hons) II Year, Semester III | BCH C-6: Membrane Biology and Bioenergetics |

| | | | | |
|------------------|----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------|----------------------------------------------|
| | | <ul style="list-style-type: none"> To determine RNA concentration in given sample using Orcinol test (Bials Test) REPEAT To isolate Total nucleic acid from plant tissues To isolate total RNA from plant tissue | B.Sc. BIOCHEMISTRY (Hons) III Year, Semester V | BCH-C12 Gene Expression and Regulation |
| | | <ul style="list-style-type: none"> Restriction enzyme digestion plasmid DNA. Estimation of size of a DNA fragment after electrophoresis using DNA markers. Construction of Restriction digestion maps from data provided. | B.Sc. (H) BIOLOGICAL SCIENCE III Year, Semester V | BS-C12 Fundamentals of Genetics |
| | Internal Assessment | Class Test -1, for all courses will be conducted pertaining to the syllabus done so far. | | |
| SEPTEMBER | Theory | UNIT III: Carbohydrates and Glycobiology CONTD | B.Sc. (H) BIOCHEMISTRY I Year, Semester I | BCH C-1: Molecules of Life |
| | | UNIT IV: Genetic definition of a gene No. of hours – 4 Complementation test, limitations of cis-trans test, intragenic complementation, rII locus of phage T4 and concept of cistron | B.Sc. (H) BIOCHEMISTRY III Year, Semester V | BCH-C11 Concepts in Genetics |
| | | Unit 5 Biosynthesis of proteins No. of hours : 10 Contd. Unit 7 Regulation of gene expression in prokaryotes No. of hours: 8 Principles of gene regulation, negative and positive regulation, concept of operons, regulatory proteins, activators, repressors, DNA binding domains, regulation of lac operon and trp operon, induction of SOS response, synthesis of ribosomal proteins, regulation by genetic recombination, transcriptional regulation in λ bacteriophage. | B.Sc. (H) BIOCHEMISTRY III Year, Semester V | BCH-C12 Gene Expression and Regulation |

| | | | | |
|----------------|---------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------|------------------------------------------------|
| | | Unit 5: Genome Dynamics-Transposable Genetic Elements No. of hours: 8 Contd. Unit 6 Genomics, Bioinformatics and Proteomics No. of Hours: 10 Genomes of bacteria, Drosophila and Humans; Human genome project; Introduction to Bioinformatics, sequence similarity and alignment, Gene feature Identification, Gene Annotation and analysis of transcription and translation | B.Sc. (H) BIOLOGICAL SCIENCE III Year, Semester V | BS-C12 Fundamentals of Genetics |
| | Practicals | <ul style="list-style-type: none"> To study the effect of detergent on RBC cell lysis Preparation of RBC ghost cells and SDS PAGE analysis of RBC membrane proteins Continuous Evaluation | B.Sc. BIOCHEMISTRY (Hons) II Year, Semester III | BCH C-6: Membrane Biology and Bioenergetics |
| | | <ul style="list-style-type: none"> Growth curve of <i>E. coli</i> and calculation of generation time To assess the effect of inhibitor on protein synthesis inhibition Continuous Evaluation | B.Sc. BIOCHEMISTRY (Hons) III Year, Semester V | BCH-C12 Gene Expression and Regulation |
| | | <ul style="list-style-type: none"> Study of abnormal human karyotype Study of pedigrees (dry lab) Demonstration of DNA Fingerprinting | B.Sc. (H) BIOLOGICAL SCIENCE III Year, Semester V | BS-C12 Fundamentals of Genetics |
| | Internal Assessment | Assignments and Class Tests for all courses will be given to revise the syllabus done so far. Students who did not clear first test will be given a chance to appear for a retest. | | |
| OCTOBER | Theory | UNIT V: Nucleic Acids No. of hours : 10 Nucleotides - structure and properties of bases, pentoses, nucleosides; Nucleic acid structure – Watson-Crick model of DNA, forms of DNA; Structure of major species of RNA - mRNA, tRNA and rRNA; Nucleic acid chemistry - UV absorption, effect of acid and alkali on DNA; Other functions of nucleotides - source of energy, component of coenzymes and second messengers. | B.Sc. (H) BIOCHEMISTRY I Year, Semester I | BCH C-1: Molecules of Life |

| | | | | |
|-----------------|------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------|------------------------------------------------|
| | | Unit 10: Chromosomal aberrations No. of hours: 4 Variations in chromosome number- monosomy and trisomy of sex chromosome and autosomes. Variations in chromosome structure - inversions, deletions, duplications and translocations. | B.Sc. (H) BIOCHEMISTRY III Year, Semester V | BCH-C11 Concepts in Genetics |
| | | Unit 7 Regulation of gene expression in prokaryotes No. of hours: 8 Contd. Unit 6 Protein targeting and degradation No. of hours: 6 Post translational modifications, glycosylation, signal sequences for nuclear transport, bacterial signal sequences, import of proteins by receptor mediated endocytosis, specialized systems for protein degradation. | B.Sc. (H) BIOCHEMISTRY III Year, Semester V | BCH-C12 Gene Expression and Regulation |
| | | Unit 6 Genomics, Bioinformatics and Proteomics No. of Hours: 10 Contd. | B.Sc. (H) BIOLOGICAL SCIENCE III Year, Semester V | BS-C12 Fundamentals of Genetics |
| | Practical | <ul style="list-style-type: none"> • Separation of photosynthetic pigments by TLC. • Isolation of mitochondria from liver and assay of marker enzyme SDH. • Study photosynthetic O₂ evolution in hydrilla plant. | B.Sc. BIOCHEMISTRY (Hons) II Year, Semester III | BCH C-6: Membrane Biology and Bioenergetics |
| | | <ul style="list-style-type: none"> • Diauxic Growth Curve • Continuous Evaluation II | B.Sc. (H) BIOCHEMISTRY III Year, Semester V | BCH-C12 Gene Expression and Regulation |
| | | <ul style="list-style-type: none"> • Study of Linkage, recombination, gene mapping using marker based data from Drosophila. • Allium/phlox karyotype | B.Sc. (H) BIOLOGICAL SCIENCE III Year, Semester V | BS-C12 Fundamentals of Genetics |
| NOVEMBER | Theory | UNIT V: Nucleic Acids No. of hours : 10 Contd. | B.Sc. (H) BIOCHEMISTRY I Year, Semester I | BCH C-1: Molecules of Life |

| | | | | |
|--|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------|---------------------------------------------------|
| | | Unit 10: Chromosomal aberrations No. of hours: 4 Contd. | B.Sc. (H) BIOCHEMISTRY III Year, Semester V | BCH-C11 Concepts in Genetics |
| | | Unit 6 Protein targeting and degradation No. of hours: 6 Contd. | B.Sc. (H) BIOCHEMISTRY III Year, Semester V | BCH-C12 Gene Expression and Regulation |
| | Practicals | <ul style="list-style-type: none"> Isolation of chloroplast from spinach leaves, estimation of chlorophyll and photosynthetic activity. Revision and Mock Exam | B.Sc. BIOCHEMISTRY (Hons) II Year, Semester III | BCH C-6: Membrane Biology and Bioenergetics |
| | | <ul style="list-style-type: none"> Revision and Mock Exam | B.Sc. (H) BIOCHEMISTRY III Year, Semester V | BCH-C12 Gene Expression and Regulation |
| | | <ul style="list-style-type: none"> Revision and Mock Exam | B.Sc. (H) BIOLOGICAL SCIENCE III Year, Semester V | BS-C12 Fundamentals of Genetics |

SEMESTER WISE TEACHING PLAN
SRI VENKATESWARA COLLEGE

Name of the Faculty: Dr. NITIKA KAUSHAL

Department: BIOCHEMISTRY

Semester: I/III/V (2018-19)

| Month | | Topics | Course | Paper Code/Name |
|---------------|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|---------------------------------|
| July | Theory | Unit 1: Prokaryotic (archaea and eubacteria) and eukaryotic cell (animal and plant cells), Cells as experimental models | B.Sc. Biochemistry (H) I Yr, Sem I | BCH C-2: Cell Biology |
| | | Overview of the immune system: Introduction | PGDMB | PGDMB-103/ Immunology I |
| | | Unit 5: Overview of The Cell Cycle; Eukaryotic Cell Cycle; Events of Mitotic Phase; Cytokinesis | B.Sc. Biochemistry (H) III Yr, Sem V | BCH DSE-6 Advanced Cell Biology |
| | Practical | Introduction to microscope | B.Sc. Biochemistry (H) I Yr, Sem I | BCH C-2: Cell Biology |
| | | 1. Preparation of buffers 2. Determination of PKa value for acetic acid | B. Sc (H) Biological Sciences II Yr Sem IV | BS C5: Proteins and Enzymes |
| | | Isolation of organelles by sub cellular fractionation | B.Sc. Biochemistry (H) III Yr, Sem V | BCH DSE-6 Advanced Cell Biology |
| August | Theory | Unit 3: Structure of nuclear envelope, nuclear pore complex. Nuclear protein import and export, Structure and functions of mitochondria | B.Sc. Biochemistry (H) I Yr, Sem I | BCH C-2: Cell Biology |
| | | Overview of the immune system: Innate immunity and Toll like receptors Organization of the immune system: cells of the immune system | PGDMB | PGDMB-103/ Immunology I |
| | | Unit 5: Events of Meiosis and Fertilization, Regulation of Cell Division and Cell Growth; Apoptosis and Necrosis | B.Sc. Biochemistry (H) III Yr, Sem V | BCH DSE-6 Advanced Cell Biology |
| | | Visualization of animal and plant cell by methylene blue. Visualization of animal and plant cell by safranin. Continuous evaluation I | B.Sc. Biochemistry (H) I Yr, Sem I | BCH C-2: Cell Biology |
| | Practical | 1. Estimation of proteins by Biuret method 2. Estimation of proteins by Lowry's method 3. Separation of sugars by Thin Layer chromatography Evaluation | B. Sc (H) Biological Sciences II Yr Sem IV | BS C5: Proteins and Enzymes |
| | | Identification of subcellular fractions by doing enzyme assays: Acid phosphatase, Succinate dehydrogenase Continuous evaluation I | B.Sc. Biochemistry (H) III Yr, Sem V | BCH DSE-6 Advanced Cell Biology |
| | | | | |

| | | | | |
|------------------|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|---------------------------------|
| September | Theory | Unit 3: Chloroplasts and peroxisomes. Unit 5: Prokaryotic and eukaryotic cell wall, cell matrix proteins. Cell-matrix interactions and cell-cell interactions. Adherence junctions, desmosomes, hemidesmosomes, focal adhesions | B.Sc. Biochemistry (H) I Yr, Sem I | BCH C-2: Cell Biology |
| | | Organization of the immune system: Organs of the immune system | PGDMB | PGDMB-103/ Immunology I |
| | | Unit 5: Stem Cells and Maintenance of Adult Tissues, Hematopoiesis, Embryonic Stem Cells and Therapeutic Cloning Unit 3: Assembly and Dynamics of Microtubules and Intermediate Filaments; Assembly and organization of Cilia and Flagella, Muscle Contractility; Cell Polarization And migration | B.Sc. Biochemistry (H) III Yr, Sem V | BCH DSE-6 Advanced Cell Biology |
| | Practical | Study of cell organelles using electron - micrographs Sub cellular fractionation Continuous evaluation II | B.Sc. Biochemistry (H) I Yr, Sem I | BCH C-2: Cell Biology |
| | | Assay of the enzyme acid phosphatase from germinated mung dal or β -amylase from Sweet potato beams Evaluation | B. Sc (H) Biological Sciences II Yr Sem IV | BS C5: Proteins and Enzymes |
| | | Study of cell viability /death assay by use of trypan blue and MTT assay Identification and study of cancerous cells using permanent slides and photomicrographs. Continuous evaluation II | B.Sc. Biochemistry (H) III Yr, Sem V | BCH DSE-6 Advanced Cell Biology |
| October | Theory | Unit 5 Cell wall and extracellular matrix: Tight junctions, gap junctions and plasmodesmata Unit 6 Cell cycle, cell death and cell renewal: Eukaryotic cell cycle, restriction point, and checkpoints. Cell division | B.Sc. Biochemistry (H) I Yr, Sem I | BCH C-2: Cell Biology |
| | | Generation of antibody diversity: multi gene organization of immunoglobulin genes, mechanism of gene rearrangement The response of B cells to antigen: B cell maturation, activation and proliferation | PGDMB | PGDMB-103/ Immunology I |
| | | Unit 4: Cell-Cell Interactions and Cell-Matrix Interactions; Components of Extracellular Matrix: Collagen and Non-Collagen Components | B.Sc. Biochemistry (H) III Yr, Sem V | BCH DSE-6 Advanced Cell Biology |

| | | | | |
|-----------------|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------|---------------------------------|
| | Practicals | Acetocarmine staining of nuclear fraction Janus Green B staining of mitochondrial fraction Meiosis in onion flower bud Continuous evaluation III | B.Sc. Biochemistry (H) I Yr, Sem I | BCH C-2: Cell Biology |
| | | 1. Effect of pH on the activity of an enzyme 2. Progress curve of an enzyme Evaluation | B. Sc (H) Biological Sciences II Yr Sem IV | BS C5: Proteins and Enzymes |
| | | Study of apoptosis through analysis of DNA fragmentation patterns Continuous evaluation III | B.Sc. Biochemistry (H) III Yr, Sem V | BCH DSE-6 Advanced Cell Biology |
| November | Theory | Revision | B.Sc. Biochemistry (H) I Yr, Sem I | BCH C-2: Cell Biology |
| | | The response of B cells to antigen: Signaling pathways leading to B cell activation, germinal centers and formation of plasma cells, memory cells, class switching | PGDMB | PGDMB-103/ Immunology I |
| | | Unit 4: Role of Cell Interaction in Development | B.Sc. Biochemistry (H) III Yr, Sem V | BCH DSE-6 Advanced Cell Biology |
| | Practical | Mock practical and Practical Examination | B.Sc. Biochemistry (H) I Yr, Sem I | BCH C-2: Cell Biology |
| | | Mock practical and Practical Examination | B. Sc (H) Biological Sciences II Yr Sem IV | BS C5: Proteins and Enzymes |
| | | Mock practical and Practical Examination | B.Sc. Biochemistry (H) III Yr, Sem V | BCH DSE-6 Advanced Cell Biology |

SEMESTER WISE TEACHING PLAN SRI VENKATESWARA COLLEGE

Name of the Faculty: Dr. NIMISHA SINHA

Department: BIOCHEMISTRY

Semester: I/III/V (2019-20)

| Month | | Topics | Course | Paper Code/Name |
|--------|-----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------|-----------------------------------------------|
| JULY | Theory | Unit 1 Introduction to Nutrition and Energy Metabolism No. of HOURS: 8 Defining Nutrition, role of nutrients. Unit of energy, Biological oxidation of foodstuff. Physiological energy value of foods, SDA. | B.Sc. (Hons) BIOCHEMISTRY III Year, Semester V | CBCS DSE 1 Nutritional Biochemistry |
| | | Unit 1 Basic design of metabolism No. of Hours: 4 Autotrophs, heterotrophs, metabolic pathways, catabolism, anabolism, ATP as energy currency, reducing power of the cell. | B.Sc. (Hons). BIOCHEMISTRY II Year, Semester III | C-5: METABOLISM OF CARBOHYDRATES AND LIPIDS |
| | | Unit 3: Respiration: Overview of glycolysis, Alternative reactions of glycolysis. | B.Sc. (Hons) BIOLOGICAL SCIENCE Hons) III Year Semester VI | CBCS DSE 9: Plant Biochemistry |
| | Practical | 1. Verification of Beer's Law 2. | B.Sc. (Hons) BIOCHEMISTRY I Year, Semester I | CBCS GE: Tools and techniques in Biochemistry |
| | | 1. Glucose tolerance test. 2. Estimation of serum Ca ²⁺ . 3. Case studies | B.Sc. (Hons) BIOCHEMISTRY II Year, Semester III | CBCS C Hormone Biochemistry |
| | | 1. Drosophila for studying sex linked inheritance | B.Sc (Hons) BIOCHEMISTRY, III Year, Semester V | CBCS C11 Concepts of Genetics |
| AUGUST | Theory | Unit 1 contd. .Measurement of energy expenditure. Basal and Resting metabolism, physical activity, factors affecting energy input - hunger, appetite, energy balance. Recommended Nutrient Intakes (RNI) and Recommended Dietary Allowances for different age groups. | B.Sc. (Hons) BIOCHEMISTRY III Year, Semester V | CBCS DSE Nutritional Biochemistry |
| | | Unit 4 Dietary Proteins and health No. of HOURS: 8 Review of functions of proteins in the body, Digestion and absorption. Essential and Nonessential amino acids. Amino Acid Availability Antagonism, Toxicity and Imbalance, Amino acid Supplementation. | | |
| | | Unit 2 Glycolysis No. of Hours: 4 Glycolysis - a universal pathway, reactions of glycolysis, fermentation, fates of pyruvate, feeder pathways for glycolysis, galactosemia | B.Sc. (Hons). BIOCHEMISTRY II Year, Semester III | C-5: METABOLISM OF CARBOHYDRATES AND LIPIDS |

| | | | | |
|-----------|------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------|-----------------------------------------------|
| | | Unit 3 Gluconeogenesis and pentose phosphate pathway No. of Hours: 4 Synthesis of glucose from non-carbohydrate sources, reciprocal regulation of glycolysis and gluconeogenesis, pentose phosphate pathway and its importance | | |
| | | Unit 3: Respiration: Regulation of plant glycolysis, Translocation of metabolites across mitochondrial membrane, TCA cycle, Alternative NAD(P)H oxidative pathways; Cyanide resistant respiration. Unit 3: Biological Nitrogen fixation by free living and in symbiotic association, structure and function of enzyme Nitrogenase. Nitrate assimilation: Nitrate and Nitrite reductase. | B.Sc. (Hons) BIOLOGICAL SCIENCE Hons) III Year Semester VI | CBCS DSE 9: Plant Biochemistry |
| | Practical | 1. Estimation of proteins by Biuret/Lowry method 2. Separation of amino acid acids by TLC/paper chromatography | B.Sc. (Hons) BIOCHEMISTRY I Year, Semester I | CBCS GE: Tools and techniques in Biochemistry |
| | | 1. Estimation of serum T4, T3 and TSH 2. Estimation of serum electrolytes. 3. Case studies | B.Sc. (Hons) BIOCHEMISTRY II Year, Semester III | CBCS C Hormone Biochemistry |
| | | 1. Drosophila maintenance, media preparation and Monohybrid crosses in Drosophila for studying sex linked inheritance | B.Sc (Hons) BIOCHEMISTRY, III Year, Semester V | CBCS C11 Concepts of Genetics |
| | Theory | Unit 4 contd... Effects of deficiency. Food source and Recommended Dietary Allowances for different age group. Amino acid pool. NPU, Biological Value, Nitrogen balance. PEM and Kwashiorkor. | B.Sc. (Hons) BIOCHEMISTRY III Year, Semester V | CBCS DSE Nutritional Biochemistry |
| | | Unit 5 Fat and water soluble Vitamins No. of HOURS: 8 Vitamin A, D, E, K Dietary sources, RDA, Adsorption, Distribution, Metabolism and excretion(ADME), Deficiency. Role of Vitamin A as an antioxidant, in Visual cycle, dermatology and immunity. Role of Vitamin K in Gamma carboxylation. Role of Vitamin E as an antioxidant. Extra-skeletal role of Vitamin D and its effect on bone physiology. Hypervitaminosis.. | | |
| | | Unit 4 Glycogen metabolism No. of Hours: 4 Glycogenesis and glycogenolysis, regulation of glycogen metabolism, glycogen storage diseases Unit 5 Citric acid cycle No. of Hours: 6 Production of acetyl CoA, reactions of citric acid cycle, anaplerotic reactions, amphibolic role, regulation of citric acid cycle, glyoxalate pathway, coordinated regulation of glyoxalate and citric acid pathways. | B.Sc. (Hons). BIOCHEMISTRY II Year, Semester III | C-5: METABOLISM OF CARBOHYDRATES AND LIPIDS |
| SEPTEMBER | | Primary and secondary ammonia assimilation in plants; ammonia assimilation by Glutamine synthetase-glutamine oxoglutarate amino transferase (GS-GOGAT) pathway. Seed storage proteins in legumes and cereals Unit 3: Cell and tissue culture techniques, types of cultures: organ and explants culture, callus culture, cell suspension culture and protoplast culture. | B.Sc. (Hons) BIOLOGICAL SCIENCE Hons) III Year Semester VI | CBCS DSE 9: Plant Biochemistry |

| | | | | |
|----------------|---------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------|-----------------------------------------------|
| | Practical | 1. To perform agarose gel electrophoresis 2. To isolate mitochondria by differential centrifugation 3. Continuous evaluation | B.Sc. (Hons) BIOCHEMISTRY I Year, Semester I | CBCS GE: Tools and techniques in Biochemistry |
| | | 1. Sub-cellular fractionation. 2. Visualization of nuclear fraction by acetocarmine stain. 3. Staining and visualization of mitochondria by Janus green stain 4. Continuous evaluation | B.Sc. (Hons) BIOCHEMISTRY II Year, Semester III | CBCS C Hormone Biochemistry |
| | | 1. Squash preparation of salivary glands of Dipteran larva to observe polytene chromosomes. 2. Smear technique to demonstrate sex chromatin in buccal epithelial cells. 3. Study of abnormal human karyotype and pedigrees (dry lab) 4. Continuous evaluation | B.Sc (Hons) BIOCHEMISTRY, III Year, Semester V | CBCS C11 Concepts of Genetics |
| | <u>Test</u> | Combined test conducted by teachers teaching this course. | B.Sc. BIOCHEMISTRY Hons.) I Year, Semester I | CBCS C2: Cell Biology |
| | | Combined test conducted by teachers teaching this course. | B.Sc. BIOLOGICAL SCIENCE Hons.) III Year, Semester I | CBCS DSE8: Plant Biochemistry |
| | | Combined test conducted by teachers teaching this course. | B.Sc. BIOCHEMISTRY Hons) II Year, Semester III | C-5: METABOLISM OF CARBOHYDRATES AND LIPIDS |
| | ASSIGNMENTS AND MID TERM EXAMS | | | |
| OCTOBER | Theory | Unit 5 contd....Vitamin C role as cofactor in amino acid modifications. Niacin- Metabolic interrelation between tryptophan, Niacin and NAD/ NADP. Vitamin B6-Dietary source, RDA, conversion to Pyridoxal Phosphate. Role in metabolism, Biochemical basis for deficiency symptoms. Vitamin B12 and folate; Dietary source, RDA, absorption, metabolic role Biochemical basis for deficiency symptoms | B.Sc. (Hons) BIOCHEMISTRY III Year, Semester V | CBCS DSE Nutritional Biochemistry |
| | | Unit 6 Synthesis of carbohydrates No. of Hours: 8 Calvin cycle, regulation of calvin cycle, regulated synthesis of starch and sucrose, photorespiration. C4 and CAM pathways, synthesis of cell wall polysaccharides, integration of carbohydrate metabolism in plant cell. | B.Sc. (Hons). BIOCHEMISTRY II Year, Semester III | C-5: METABOLISM OF CARBOHYDRATES AND LIPIDS |
| | | Unit 6: Plant regeneration pathways: organogenesis and somatic embryogenesis. Applications of cell and tissue culture and somoclonal variation. | B.Sc. (Hons) BIOLOGICAL SCIENCE Hons) III Year Semester VI | CBCS DSE 9: Plant Biochemistry |
| | Practical | 1. Visualization of cells by methylene blue. 2. Revision of practicals, Mock Practical Examination | B.Sc. (Hons) BIOCHEMISTRY I Year, Semester I | CBCS GE: Tools and techniques in Biochemistry |

| | | | | |
|----------|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------|------------------------------------------------------|
| | | 1. HCG based pregnancy test. 2. Case Studies 3. Continuous evaluation 4. Revision of practicals, Mock Practical Examination | B.Sc. (Hons) BIOCHEMISTRY II Year, Semester III | CBCS C Hormone Biochemistry |
| | | 1. PTC testing in a population and calculation of allele and genotype frequencies. 2. Continuous evaluation 3. Revision of practicals, Mock Practical Examination | B.Sc (Hons) BIOCHEMISTRY, III Year, Semester V | CBCS C11 Concepts of Genetics |
| | | | | |
| NOVEMBER | Theory | Unit 8 Food and drug interactions and Nutraceuticals No. of HOURS: 4 Nutrient interactions affecting ADME of drugs, Alcohol and nutrient deficiency, Antidepressants, psychoactive drugs and nutrient interactions, Unit 11 Integration of carbohydrate metabolism | B.Sc. (Hons) BIOCHEMISTRY III Year, Semester V | CBCS DSE 1 Nutritional Biochemistry |
| | | | B.Sc. (Hons). BIOCHEMISTRY II Year, Semester III | C-5: METABOLISM OF CARBOHYDRATES AND LIPIDS |
| | | Revision | B.Sc. (Hons) BIOLOGICAL SCIENCE Hons) III Year Semester VI | CBCS DSE 9: Plant Biochemistry |
| | Practical | Revision of practicals | B.Sc. (Hons) BIOCHEMISTRY I Year, Semester I | CBCS GE: Tools and techniques in Biochemistry |
| | | Revision of practicals | B.Sc. (Hons) BIOCHEMISTRY II Year, Semester III | CBCS C Hormone Biochemistry |
| | | Revision of practicals | B.Sc (Hons) BIOCHEMISTRY, III Year, Semester V | CBCS C11 Concepts of Genetics |
| | | | | |

SEMESTER WISE TEACHING PLAN – 2019 **SRI VENKATESWARA COLLEGE**

Name of the Faculty: Dr.Ravindra Varma Polisetty
Department: Biochemistry

Semester : I/III/V

| Month | | Topics | Cours e | Paper Code/Name |
|-----------|-------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|---------------------------------------|
| JULY | Theory | | | |
| | Practicals | | | |
| | Tutorials | | | |
| AUGUST | Theory: | Electromagnetic radiation, interaction of radiation with biomolecules, principle of UV-visible absorption spectrophotometry, Lambert's Law, Beer's Law, working of a spectrophotometer. Applications of UV-visible absorption spectrophotometry in biochemistry. | GE | Techniques in Biochemistry (BCH GE-2) |
| | | Preparation of the sample, Ion-exchange chromatography | SBCH | BCH SEC-2 PROTEIN PURIFICATION |
| | | Model organisms: Escherichia coli, Saccharomyces cerevisiae, Drosophila melanogaster, Caenorhabditis elegans, Danio rerio and Arabidopsis thaliana, Basic principles of heredity. | TBCH | BCH C-11: CONCEPTS IN GENETICS |
| | | Mendel's work on transmission of traits, Genetic Variation, Molecular basis of Genetic Information. Principles of Inheritance, Chromosome theory of inheritance, Laws of probability, Pedigree analysis, Incomplete dominance and co-dominance, Multiple alleles, Lethal alleles | TBS | BS-C12: FUNDAMENTALS OF GENETICS |
| | Practicals: | 1.Safety measures in laboratories. 2. Preparation of normal and molar solutions. 3. Preparation of buffers. | FBCH | BCH C-1: MOLECULES OF LIFE |
| | | 1.Glucose tolerance test. 2.Estimation of serum Calcium | SBCH | BCH C-7: HORMONE: BIOCHEMISTRY |
| | | 1.Induction of hydrolytic enzymes proteinases /amylases/lipase during germination, 2. Extraction and assay of Urease from Jack bean | TBS | DSE-9: PLANT BIOCHEMISTRY |
| | Tutorials: | | | |
| SEPTEMBER | Theory: | Fluorescence spectrophotometry: Phenomena of fluorescence, intrinsic and extrinsic fluorescence, applications of fluorescence in biochemistry. Principle of centrifugation, basic rules of sedimentation, sedimentation coefficient. Various types of centrifuges, low speed centrifuge, high speed centrifuge and ultracentrifuge, types of rotors. Application of centrifugation, differential centrifugation, density gradient centrifugation- zonal and isopycnic. | GE | Techniques in Biochemistry (BCH GE-2) |

| | | | | |
|---------|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | | Gel filtration chromatography. Affinity chromatography. | SBCH | BCH SEC-2 PROTEIN PURIFICATION TECHNIQUES |
| | | Laws of probability & binomial expansion, formulating and testing genetic hypothesis, chromosomal basis of Mendelism -Sutton and Boveri hypothesis with experimental evidences. | TBCH | BCH C-11: CONCEPTS IN GENETICS |
| | | Linkage and Crossing over, cytological basis of crossing over, Molecular mechanism of crossing over. Recombination frequency as a measure of linkage intensity, two factor and three factor crosses, Interference and Coincidence | TBS | BS-C12: FUNDAMENTAL S OF GENETICS |
| | Practicals: | 4. Determination of pKa of acetic acid and glycine. 5. Qualitative tests for carbohydrates, lipids, amino acids, proteins and nucleic acids. 3. Estimation of serum T4. 4.HCG based pregnancy test. 3.Estimation of carotene/ascorbic acid/phenols/tannins in fruits and vegetables, 4. Separation of photosynthetic pigments by TLC | FBCH SBCH TBS | BCH C-1: MOLECULES OF LIFE BCH C-7: HORMONE: BIOCHEMISTRY DSE-9: PLANT BIOCHEMISTRY |
| | Tutorials: | | | |
| | Assignments | | | |
| OCTOBER | Theory: | Types of media, selective and enrichment media, sterilization methods, bacterial culturing, CFU determination, growth curves, Generation/doubling times, cell counting, viable and non- viable. Growth and maintenance of cultures, biosafety cabinets, CO2incubator. Staining procedures, plating and microtony. Electrophoresis, Demonstration of High Performance Liquid Chromatography (HPLC) Linkage and crossing over, genetic mapping in eukaryotes, centromere mapping with ordered tetrads, cytogenetic mapping with deletions and duplications in <i>Drosophila</i> , detection of linked loci by pedigree analysis in humans and somatic cell hybridization for positioning genes on chromosomes. Genomes of bacteria, <i>Drosophila</i> and Humans; Human genome project; Introduction to Bioinformatics, Gene and Protein databases, sequence similarity and alignment, Gene feature identification. Gene Annotation and analysis of transcription and translation; Post-translational analysis-Protein interaction | GE SBCH TBCH TBS | Techniques in Biochemistry (BCH GE-2) BCH SEC-2 PROTEIN PURIFICATION TECHNIQUES BCH C-11: CONCEPTS IN GENETICS BS-C12: FUNDAMENTAL S OF GENETICS |
| | Practicals: | 6. Separation of amino acids/ sugars/ bases by thin layer chromatography. 7. Estimation of vitamin C. | FBCH | BCH C-1: MOLECULES OF LIFE BCH C-7: |

| | | | | |
|----------|-------------|-----------------------------------------------------------------------------------------------------|--|--------------------------------------------------------------|
| | | 5. Estimation of serum electrolytes. 6. Case studies. 5. Culture of plant plants (explants). | | HORMONE: BIOCHEMISTRY DSE-9: PLANT BIOCHEMISTRY |
| | Tutorials: | | | |
| | Test | | | |
| NOVEMBER | Theory: | | | |
| | Practicals: | | | |
| | Tutorials: | | | |

SEMESTER WISE TEACHING PLAN
SRI VENKATESWARA COLLEGE

Name of the Faculty: Dr. Sarika Yadav

Department: BIOCHEMISTRY

Semester: I/III/V (2019-2020)

| Month | | Topics | Course | Paper Code/Name |
|---------------|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------|--------------------------------------------------|
| July | Theory | Introduction to Biomembranes: Composition of Biomembranes - prokaryotic, eukaryotic, neuronal and subcellular membranes. Study of membrane proteins. | B.Sc. Biochemistry (H) II Yr, Sem III | CBCS C-6: Membrane Biology and Bioenergetics |
| | | Preparation of sample, different methods of cell lysis, salting out, dialysis. | GE- Biochemistry I Yr, Sem. II | BCH GE-2 Techniques in Biochemistry |
| | | Overview of The Endomembrane System | B. Sc. (H) Biochemistry III Yr, Sem V | BCH DSE-6: ADVANCED CELL BIOLOGY |
| | Practical | Practicals | | |
| | | Estimation of blood glucose. | B.Sc. Biochemistry (H) II Yr, Sem III | CBCS C-5: METABOLISM OF CARBOHYDRATES AND LIPIDS |
| | | Safety measures in laboratories. Preparation of normal and molar solutions | B.Sc. Biochemistry (H) I Yr, Sem I | BCH C-1 Molecules of Life |
| | | Induction of hydrolytic enzymes proteinases /amylases/lipase during germination | B. Sc (H) Biol Sc, III Yr, Sem V | DSE-9: PLANT BIOCHEMISTRY (PRACTICALS) |
| August | Theory | Fluid mosaic model with experimental proof. Monolayer, planer bilayer and liposomes as model membrane systems. Polymorphic structures of amphiphilic molecules in aqueous solutions - micelles and bilayers. CMC, critical packing parameter. Membrane asymmetry. Macro and micro domains in membranes. Membrane skeleton, lipid rafts, caveolae and tight junctions. | B.Sc. Biochemistry (H) II Yr, Sem III | CBCS C-6: Membrane Biology and Bioenergetics |

| | | | | |
|------------------|-------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------|--------------------------------------------------|
| | | Introduction to chromatography. Different modes of chromatography: paper, thin layer and column. Preparative and analytical applications. Principles and applications of: Paper Chromatography, Thin Layer Chromatography, Ion Exchange Chromatography, Molecular Sieve Chromatography, Affinity Chromatography. | GE- Biochemistry I Yr, Sem. II | BCH GE-2 Techniques in Biochemistry |
| | | Targeting, modification and sorting of Proteins From And Into Endoplasmic Reticulum; Synthesis And Targeting Mitochondrial Protein; Chloroplast Proteins And Peroxisomal Proteins; | B. Sc. (H) Biochemistry III Yr, Sem V | BCH DSE-6: ADVANCED CELL BIOLOGY |
| | Practical: | Isolation of cholesterol from egg yolk and its estimation. | B.Sc. Biochemistry (H) II Yr, Sem III | CBCS C-5: METABOLISM OF CARBOHYDRATES AND LIPIDS |
| | | Preparation of buffers, phosphate and acetate buffers. Determination of pKa of acetic acid and glycine. Qualitative tests for carbohydrates. | B.Sc. Biochemistry (H) I Yr, Sem I | BCH C-1 Molecules of Life |
| | | Extraction and assay of Urease from Jack bean. Estimation of carotene/ascorbic acid/phenols/tannins in fruits and vegetables | B. Sc (H) Biol Sc, III Yr, Sem V | DSE-9: PLANT BIOCHEMISTRY (PRACTICALS) |
| September | Theory | RBC membrane architecture. Membrane dynamics: Lateral, transverse and rotational motion of lipids and proteins. Techniques used to study membrane dynamics - FRAP, TNBS labeling etc. Transition studies of lipid bilayer, transition temperature. Membrane fluidity, factors affecting membrane fluidity. Thermodynamics of transport, Simple diffusion and facilitated diffusion, Passive transport - glucose transporter, anion transporter and porins. Primary active transporters - P type ATPases, V type ATPases, F type ATPases. | B.Sc. Biochemistry (H) II Yr, Sem III | CBCS C-6: Membrane Biology and Bioenergetics |
| | | Basic Principle of electrophoresis, Paper electrophoresis, Gel electrophoresis, discontinuous gel electrophoresis, PAGE, SDS-PAGE, Native gels, denaturing gels, agarose gel 105 electrophoresis, buffer systems in electrophoresis, electrophoresis of proteins and nucleic acids | GE- Biochemistry I Yr, Sem. II | BCH GE-2 Techniques in Biochemistry |

| | | | | |
|----------------|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------|--------------------------------------------------|
| | | Mechanism Of Vesicular Transport; Coat Proteins And Vesicle Budding; Vesicle Fusion; Targeting Of Proteins To Membranes; Receptor Mediated Endocytosis. Function and origin of The Cytoskeleton; Organization and Assembly of Actin Filaments And Myosin; | B. Sc. (H) Biochemistry III Yr, Sem V | BCH DSE-6: ADVANCED CELL BIOLOGY |
| | Practical | Isolation of lecithin, identification by TLC, and its estimation | B.Sc. Biochemistry (H) II Yr, Sem III | CBCS C-5: METABOLISM OF CARBOHYDRATES AND LIPIDS |
| | | Qualitative tests for amino acids, proteins. Qualitative tests for nucleic acids. Separation of amino acids/ sugars by thin layer chromatography/paper chromatography | B.Sc. Biochemistry (H) I Yr, Sem I | BCH C-1 Molecules of Life |
| | | Estimation of carotene/ascorbic acid/phenols/tannins in fruits and vegetables (Repeat). Separation of photosynthetic pigments by TLC | B. Sc (H) Biol Sc., III Yr, Sem V | DSE-9: PLANT BIOCHEMISTRY (PRACTICALS) |
| October | Theory | Secondary active transporters – lactose permease, Na ⁺ -glucose symporter. ABC family of transporters - MDR, CFTR. Group translocation. Ion channels - voltage-gated ion channels (Na ⁺ /K ⁺ voltage-gated channel), ligand-gated ion channels (acetyl choline receptor), aquaporins, bacteriorhodopsin. Ionophores - valinomycin, gramicidin. Types of vesicle transport and their function - clathrin, COP I and COP II coated vesicles. | B.Sc. Biochemistry (H) II Yr, Sem III | CBCS C-6: Membrane Biology and Bioenergetics |
| | | protein and nucleic acid blotting, detection and identification (staining procedures), molecular weight determination, isoelectric focusing of proteins. Principle of light microscopy, phase contrast microscopy | GE- Biochemistry I Yr, Sem. II | BCH GE-2 Techniques in Biochemistry |
| | | Function and origin of The Cytoskeleton; Organization and Assembly of Actin Filaments And Myosin; Assembly and Dynamics of Microtubules. | B. Sc. (H) Biochemistry III Yr, Sem V | BCH DSE-6: ADVANCED CELL BIOLOGY |
| | Practical | Sugar fermentation by microorganisms. Assay of salivary amylase. | B.Sc. Biochemistry (H) II Yr, Sem III | CBCS C-5: METABOLISM OF CARBOHYDRATES AND LIPIDS |
| | | | | |

| | | | | |
|-----------------|------------------|------------------------------------------------------------------------------------------------------------------|---------------------------------------------|------------------------------------------------------------|
| | | Separation of bases by thin layer chromatography/paper chromatography. Estimation of vitamin C. | B.Sc. Biochemistry (H) I Yr, Sem I | BCH C-1 Molecules of Life |
| | | Theory of Culture of plants (explants). | B. Sc (H) Biol Sc, III Yr, Sem V | DSE-9: PLANT BIOCHEMISTRY (PRACTICALS) |
| November | Theory | Molecular mechanism of vesicular transport. Membrane fusion. Receptor mediated endocytosis of transferrin. | B.Sc. Biochemistry (H) II Yr, Sem III | CBCS C-6: Membrane Biology and Bioenergetics |
| | | Fluorescence microscopy. Permanent and temporary slide preparation, histology and staining. | GE- Biochemistry I Yr, Sem. II | BCH GE-2 Techniques in Biochemistry |
| | | Ultracentrifugation, Fluorescence Microscopy- FACS, FRET, Confocal Microscopy, Electron Microscopy, | B. Sc. (H) Biochemistry III Yr, Sem V | BCH DSE-6: ADVANCED CELL BIOLOGY |
| | Practical | Revision of practicals, Mock Practical Examination | B.Sc. Biochemistry (H) II Yr, Sem III | CBCS C-5: METABOLISM OF CARBOHYDRATE S AND LIPIDS |
| | | Revision of practicals, Mock Practical Examination | B.Sc. Biochemistry (H) I Yr, Sem I | BCH C-1 Molecules of Life |
| | | Revision of practicals, Mock Practical Examination | B. Sc (H) Biol Sc, III Yr, Sem V | DSE-9: PLANT BIOCHEMISTRY (PRACTICALS) |

**SEMESTER WISE
TEACHING PLAN

VENKATESWAR
A COLLEGE**

Name of the Faculty: Meeta Bhardwaj Department: Biochemistry

Semester : I/III/V

| Month | | Topics | Course | Paper Code/Name |
|--------|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------|---------------------------------------------------------------------------|
| JULY | Theory | P G Diploma & GE Classes begin in August. | | |
| | Practicals | Isolation of plasmid DNA from E.coli. Anthropometric Measurements | BSc. (H) Biological Sciences Sem V Bsc (H) Biochemistry Sem V | BS-C12 Fundamentals of Genetics BCH DSE I Nutritional Biochemistry |
| AUGUST | Theory: | Biology of plasmids (conjugative, nonconjugative, relaxed and stringent control of copy number , incompatibility) Plasmid based vectors(one step and two-step selection); Biology of Lambda phage (lytic versus lysogenic cycle), λ bacteriophage based vectors (insertional and replacement), in vitro packaging; Biology of M13 bacteriophage, M13 phage based vectors, phagemids | PG Diploma Sem I | PGD MB 102 – Recombinant DNA Technology |
| | | Autoimmune diseases Concepts in immune recognition - self and non self discrimination, organ specific autoimmune diseases – Hashimoto's thyroiditis, Grave's disease, Myasthenia Gravis; | Bsc (H) Biochemistry Sem III | BCH GE - 7 |

| | | | | |
|-----------|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | Practicals: | <p>Preparation and sterilization of LB medium. Obtaining isolated colonies of E.coli by streak plate and spread plate method. To study the growth curve of E.coli DH5α</p> <p>Quantitative precipitation test Immuno diffusion : Single radial immunodiffusion, double immunodiffusion Immuno electrophoresis</p> <p>Restriction enzyme digestion plasmid DNA. Estimation of size of a DNA fragment after electrophoresis using DNA markers. Construction of Restriction digestion maps from data provided.</p> <p>Kwashiorkor, Marasmus – Case studies Nutritional assessment of food items Determination of oxidative stress: TBARS estimation MDA estimation</p> | <p>PG Diploma Sem I</p> <p>PG Diploma Sem I</p> <p>BSc (H) Biological Sciences Sem V</p> <p>BSc (H) Biochemistry Sem V</p> | <p>PGD MBL 105 – Recombinant DNA Technology I</p> <p>PGD MBL 106 – Immunology I</p> <p>BS-C12 Fundamentals of Genetics</p> <p>BCH DSE I Nutritional Biochemistry</p> |
| SEPTEMBER | Theory: | <p>High capacity vectors: cosmids, P1 phage based vectors, PACs, yeast artificial chromosomes, bacterial artificial chromosomes. Advantages of each vector.</p> <p>Radiolabelled probe preparation via nick translation, random priming, 3' end labeling, 5' end labeling</p> <p>Systemic diseases - SLE, rheumatoid arthritis; Diabetes Mellitus-I. Viral infection (polio, measles, mumps, influenza, HIV);</p> | <p>PG Diploma Sem I</p> <p>Bsc (H) Biochemistry Sem III</p> | <p>PGD MB 102 – Recombinant DNA Technology</p> <p>BCH GE 7</p> |

| | | | | |
|---------|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------|
| | | | | |
| | Practicals: | <p>Isolation of chromosomal DNA of E.coli Isolation of plasmid DNA by the alkaline lysis method (maxi-preparation and mini-preparation) and the boiling lysis method.</p> <p>Electroimmunoprecipitation: Counter immunoelectrophoresis, Rocket immunoelectrophoresis, Crossed immunoelectrophoresis Staining of precipitin bands in gel Identification of human blood groups and Rh factor</p> <p>Study of abnormal human karyotype Study of pedigrees (dry lab) Demonstration of DNA Fingerprinting</p> <p>BMR Calculation Glutathione Reductase estimation Catalase estimation</p> | <p>PG Diploma Sem I</p> <p>PG Diploma Sem I</p> <p>BSc (H) Biological Sciences Sem V</p> | <p>PGD MBL 105 - RDT</p> <p>PGD MBL 106 – Immunology I</p> <p>BS-C12 Fundamentals of Genetics</p> |
| OCTOBER | Theory: | <p>Guessmers and degenerate probes, Non radioactive probes preparation using Biotin, Digoxigenin.</p> <p>Bacterial infections (tetanus, diphtheria, tuberculosis, typhoid, cholera); Protozoan (Plasmodium and Trypanosoma) and parasitic infections. Vaccines against diseases. General strategies in the design and development of vaccines.</p> | <p>PG Diploma Sem I</p> <p>Bsc (H) Biochemistry Sem III</p> | <p>PGD MB 102 – Recombinant DNA Technology</p> <p>BCH GE -7</p> |

| | | | | |
|----------|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| | Practicals: | <p>Digestion of plasmid DNA with restriction enzymes</p> <p>Recovery of DNA from low-melting temperature agarose gel: organic extraction etc.</p> <p>Passive agglutination Inhibition of agglutination using latex particles Preparation of lymphocytes from blood</p> <p>Study of Linkage, recombination, gene mapping using marker based data from <i>Drosophila</i>. <i>Allium</i>/phlox karyotype</p> <p>Polyphenol estimation in Plants Vitamin E assay</p> | <p>PG Diploma Sem I</p> <p>PG Diploma Sem I</p> <p>BSc (H) Biological Sciences</p> <p>BSc (H) Biochemistry Sem V</p> | <p>PGD MBL 105 - RDT</p> <p>PGD MBL 106 – Immunology I</p> <p>BS-C12 Fundamentals of Genetics</p> <p>BCH DSE I Nutritional Biochemistry</p> |
| NOVEMBER | Theory: | <p>Revision of syllabus, class assignments</p> <p>Outline of hormone action and imbalances leading to disease - precocious puberty, hyper and hypopituitarism. Hyper and hypothyroidism.</p> | <p>PG Diploma Sem I</p> <p>BSc (H) Biochemistry Sem III</p> | <p>PGD MB 102 – Recombinant DNA Technology</p> <p>BCH GE - 7</p> |
| | Practicals: | <p>Mock Evaluation and Repeat experiments</p> <p>Mock Evaluation and Repeat experiments</p> <p>Mock Evaluation and Repeat experiments</p> <p>Mock Evaluation and Repeat experiments</p> | <p>PG Diploma Sem I</p> <p>PG Diploma Sem I</p> <p>BSc (H) Biological Sciences Sem V</p> <p>BSc (H) Biochemistry Sem V</p> | <p>PGD MBL 105 - RDT</p> <p>PGD MBL 106 – Immunology I</p> <p>BS-C12 Fundamentals of Genetics</p> <p>BCH DSE I Nutritional Biochemistry</p> |

| | Tutorials: | Major features and savings and investment related questions going to work out. | | |

SEMESTER WISE TEACHING PLAN (2019-20)
SRI VENKATESWARA COLLEGE

Name of the Faculty: Meenakshi Sharma

Department: ECONOMICS

Semester: III, B.A. (H) Economics

| Month | | Topics | Course | Paper Code/Name |
|-----------|------------------------|-----------------------------------------------------------------------------------------------------------|-----------------------------------|-------------------------------|
| JULY | Theory | Budget constraint-Taxes, subsidies and Rationing and Preferences: Assumptions about preferences, MRS, ICS | Semester: III, B.A. (H) Economics | Intermediate microeconomics I |
| | Tutorials | Numericals from Varian Workbook and past years' | | Intermediate microeconomics |
| AUGUST | Theory: | Utility; demand; Slutsky equation Hicksian demand : Cardinal, Ordinal, Quasilinear preferences. | Semester: III, B.A. (H) Economics | Intermediate microeconomics I |
| | Tutorials: | Numericals from Varian Workbook and past years' questions, Appendix of Varian | | Intermediate microeconomics I |
| SEPTEMBER | Theory: | Revealed preference. Buying and selling; choice under risk and intertemporal choice; | Semester: III, B.A. (H) Economics | Intermediate microeconomics I |
| | Tutorials: | Numericals from Varian Workbook and past years' questions, questions from B. Douglas Bernheim and M. | | Intermediate microeconomics I |
| | <u>Test 1 :</u> | Utility, preferences, budget constraint, choice, demand, Slutsky equation | | Intermediate microeconomics I |
| OCTOBER | Theory: | Technology, isoquants, production with one and more variable inputs, returns to | Semester: III, B.A. (H) Economics | Intermediate microeconomics I |
| | <u>Test 2:</u> | Buying and selling; choice under risk and intertemporal choice; revealed preference | | |

| | | | | |
|----------|-------------------|------------------------------------------------------------------------------------------------------------|-----------------------------------|-------------------------------|
| | Tutorials: | Back questions from C. Snyder and W. Nicholson (2010): Fundamentals of Microeconomics | | |
| NOVEMBER | Theory: | Cost : short run and long run costs, cost curves in the short and long run; review of perfect competition. | Semester: III, B.A. (H) Economics | Intermediate microeconomics I |
| | Tutorials: | Back questions from C. Snyder and W. Nicholson (2010): Fundamentals of Microeconomics | | |

Semester : I, B.A. Programme

| Month | | Topics | Course | Paper Code/Name |
|-----------|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|--------------------------------|
| JULY | Theory | Scarcity and choice: concepts of scarcity, choice and opportunity cost; production possibility frontier; economic systems. | | Principles of Microeconomics I |
| | Tutorials | Problem of scarcity and choice : Numericals from Case n Fair n past years' questions | | Principles of Microeconomics I |
| AUGUST | Theory: | Demand and supply; applications of demand and supply; elasticity law of demand, determinants of demand, shifts of demand versus movements along a demand curve, market demand, law of supply, determinants of supply, shifts of supply versus movements along a supply curve, market supply, market equilibrium. | | Principles of Microeconomics I |
| | Tutorials: | Applications of demand and supply: price rationing, price floors, consumer surplus, producer surplus. Elasticity: price elasticity of demand, calculating elasticity, determinants of price elasticity, other elasticities | | Principles of Microeconomics I |
| SEPTEMBER | Theory: | Consumer theory: Budget constraint, concept of utility, diminishing marginal utility, Diamond-water paradox, income and substitution effects; consumer choice: indifference curves, derivation of demand curve from | | Principles of Microeconomics I |
| | Tutorials: | Numericals from Case & Fair; and Appendix of Chapter 6 | | Principles of Microeconomics I |

| | | | | |
|----------|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--------------------------------|
| | <u>Test 1 :</u> | Demand and supply and consumer theory | | |
| OCTOBER | Theory: | Production and costs Production: behaviour of profit maximising firms, production process, production functions, law of variable proportions, choice of technology, isoquant and isocost lines, cost minimizing equilibrium condition. | | Principles of Microeconomics I |
| | Tutorials: | Numerical from Case & Fair; past years' question papers, and Appendix of Chapter 7. | | Principles of Microeconomics I |
| | <u>Test 2:</u> | Production and costs. | | |
| NOVEMBER | Theory: | Perfect competition and welfare: Assumptions: theory of a firm under perfect competition, demand and revenue; equilibrium of the firm in the short run and long run; long run industry supply curve: increasing, decreasing and constant cost industries. | | Principles of Microeconomics I |
| | Tutorials: | Perfect competition and welfare | | Principles of Microeconomics I |

July-November, 2020

Name of the Faculty: Dr. M. V. R. Prasada Rao

Department: Statistics

Semester: III, V

| Month | | Topics | Course | Paper Code/Name |
|-----------|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------|-------------------------------------------|
| JULY | Theory: | Introduction and Objective behind building Econometric Models | Bachelor of Statistics (Hons.) | STAT-DSE 2-(B): Econometrics |
| | | Estimation of population mean, confidence intervals for the parameters of a normal population | | STAT-GE-3 Basics of Statistical Inference |
| | Practicals: | | | |
| | Tutorials: | | | |
| AUGUST | Theory: | General linear models, Estimation under linear restrictions, Multicollinearity | Bachelor of Statistics (Hons.) | STAT-DSE 2-(B): Econometrics |
| | | The basic idea of significance test. Null and alternative hypothesis. Type I & Type II errors, level of significance, concept of p-value. Tests of hypotheses for the parameters of a normal distribution (one sample and two sample problems) | | STAT-GE-3 Basics of Statistical Inference |
| | Practicals: | Based on General linear models, Estimation under linear restrictions | | |
| | Tutorials: | | | |
| SEPTEMBER | Theory: | Concepts, Consequences, Tests for detection and Remedies, Generalized least squares, Concepts, Aitken's Estimator, Prediction | Bachelor of Statistics (Hons.) | STAT-DSE 2-(B): Econometrics |
| | | Categorical data: Tests of proportions, tests of association and goodness-of-fit using Chi- | | STAT-GE-3 Basics of Statistical Inference |
| | Practicals: | Based on and Remedies, Generalized least squares, Concepts, Aitken's Estimator | | |

| | | | | |
|----------|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------|-------------------------------------------|
| | Tutorials: | | | |
| | <u>Assignment</u> | Based on restrictions, Multicollinearity | | |
| | | | | |
| OCTOBER | Theory | Autocorrelation, Concepts, Consequences, Tests for detection and Remedies, Heteroscedasticity, Concepts, Consequences, Tests | Bachelor of Statistics (Hons.) | STAT-DSE 2-(B): Econometrics |
| | | Tests for the significance of correlation coefficient. Sign test for median, Sign test for symmetry, Wilcoxon two-sample tes | | STAT-GE-3 Basics of Statistical Inference |
| | | | | |
| | Practicals: | Based on Autocorrelation, Concepts, Consequences, Tests for detection and Remedies, Heteroscedasticity, Concepts, Consequences | | |
| | | | | |
| | <u>Mid Term Test</u> | Unit-I, Unit-II and Unit-III | | |
| NOVEMBER | Theory: | Tests for detection and Remedies, Autoregressive and Lag models, Concepts, Consequences and Remedies | Bachelor of Statistics (Hons.) | STAT-DSE 2-(B): Econometrics |
| | | Analysis of variance, one-way and two-way classification. Brief exposure of three basic principles of design of experiments, treatment, plot and block. Analysis of completely randomized design, randomized complete block design. Bioassay. | | STAT-GE-3 Basics of Statistical Inference |
| | Practicals: | Based on Tests for detection and Remedies, Autoregressive and Lag models, Concepts, Consequences and Remedies | | |
| | Tutorials: | | | |

SEMESTER WISE TEACHING PLAN
SRI VENKATESWARA COLLEGE
Odd Semester 2019-2020

Name of Faculty: Dr. Veena Budh Raja
Semester: I, III, V

Department: Statistics

| Month | | Topics | Course | Paper Code/Name |
|-----------|---------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|----------------------------------------------------|
| JULY | Theory: | Probability Distributions: Generating functions, Bivariate probability generating functions.(Unit-I) | B.Sc. (H) Statistics | STAT-C-501 Stochastic Processes and Queuing Theory |
| | | Real Analysis: Representation of real numbers as points on the line and the set of real numbers as complete ordered field. Bounded and unbounded sets, neighborhoods and limit points | B.Sc. (H) Statistics | STAT-C-303: Mathematical Analysis |
| | Practicals : | To find p_n from probability generating function | B.Sc. (H) Statistics | STAT-C-501 Stochastic Processes and Queuing Theory |
| | Tutorials: | | | |
| AUGUST | Theory: | Stochastic Process: Introduction, Stationary Process, Markov Chains: Definition of Markov Chain with examples, transition probability matrix, order of Markov chain, Markov chain as graphs | B.Sc. (H) Statistics | STAT-C-501 Stochastic Processes and Queuing Theory |
| | | Supremum and infimum, derived sets, open and closed sets, sequences and their convergence, limits of some special sequences such as and Cauchy's general principle of convergence, Cauchy's first theorem on limits, monotonic sequences, limit superior and limit inferior of a bounded sequence. | B.Sc. (H) Statistics | STAT-C-303: Mathematical Analysis |
| | Practicals : | To form transition probability matrix for given problem | B.Sc. (H) Statistics | |
| | Tutorials: | | | |
| SEPTEMBER | Theory: | Higher transition probabilities. Generalization of independent Bernoulli trials, classification of states and chains, Stability of Markov system, Poisson Process: postulates of Poisson process, properties of Poisson process, inter- arrival time, | B.Sc. (H) Statistics | STAT-C-501 Stochastic Processes and Queuing Theory |
| | | Infinite series, positive termed series and their convergence, Comparison test, D'Alembert's ratio test, Cauchy's nth root test, Raabe's test. Gauss test, Cauchy's condensation test and integral test (Statements and Examples only). (Unit-II) | B.Sc. (H) Statistics | STAT-C-303: Mathematical Analysis |
| | Practicals : | To classify the state and to find the stability of Markov system | B.Sc. (H) Statistics | STAT-C-501 Stochastic Processes and Queuing Theory |

| | | | | |
|----------|-----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------|----------------------------------------------------|
| | Tutorials: | | | |
| | | | | |
| | <u>Assignment</u> | Assignment on p.g.f's and Markov chain and Poisson process | B.Sc. (H) Statistics | STAT-C-501 Stochastic Processes and Queuing Theory |
| | | Assignment based on neighborhoods, open set, closed set, sequences, series | | |
| OCTOBER | Theory | Pure birth process, Yule Furry process, birth and death process, pure death process, Queuing System: General concept, steady state distribution, queuing model, M/M/1 with finite and infinite system capacity, waiting time distribution | B.Sc. (H) Statistics | STAT-C-501 Stochastic Processes and Queuing Theory |
| | | Absolute convergence of series, Leibnitz's test for the convergence of alternating series, Conditional convergence. Review of limit, continuity and differentiability, uniform Continuity and boundedness of a function. Rolle's and Lagrange's Mean Value theorems. Taylor's theorem with lagrange's and Cauchy's form of remainder. (Unit-III) | B.Sc. (H) Statistics | STAT-C-303: Mathematical Analysis |
| | Practicals : | To find birth and death process for different values of λ , and to find p_n for M/M/1 model | | |
| | Tutorials: | | | |
| | <u>Mid Term Test</u> | Unit I and Unit II | | |
| | | | | |
| NOVEMBER | Theory: | Gambler's Ruin Problem: Classical ruin problem, expected duration of the game. | B.Sc. (H) Statistics | STAT-C-501 Stochastic Processes and Queuing Theory |
| | | Taylor's and Maclaurin's series expansions of $\sin x$, $\cos x$, $\log(1+x)$, Unit-III | B.Sc. (H) Statistics Semester III | STAT-C-303: Mathematical Analysis |
| | Practicals : | Based on Ruin Problem | | |
| | Tutorials: | | | |
| | | | | |

SEMESTER WISE TEACHING PLAN

SRI VENKATESWARA COLLEGE

Odd Semester -2019-20

Name of the Faculty: Dr. M.K. Sukla

Department: Statistics

Semester : I/III/V

| Month | | Topics | Course | Paper Code/Name |
|--------|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------|------------------------------------------------------------|
| JULY | Theory: | Limits of function, continuous functions. Properties of continuous functions. | Bachelor of Statistics (H) Semester I | STAT-C-102: CALCULUS |
| | | Stratified random sampling: Technique, estimates of population mean | Bachelor of Statistics (H) Semester III | STAT-C-302: Survey Sampling and Indian Official Statistics |
| | Practicals: | Graphical representation of data | GE-1 | STAT-GE-1 Statistical Methods |
| | Tutorials: | Practice Questions and Doubt Clearing for above topics | Bachelor of Statistics (H) Semester I | STAT-C-102: CALCULUS |
| AUGUST | Theory: | Partial differentiation and total differentiation. Indeterminate forms: L- Hospital's rule. Leibnitz rule for successive differentiation. Euler's theorem on homogeneous functions. | Bachelor of Statistics (H) Semester I | STAT-C-102: CALCULUS |
| | | Estimates of population total and variances of mean and total, proportional and optimum allocations. | Bachelor of Statistics (H) Semester III | STAT-C-302: Survey Sampling and Indian Official Statistics |
| | Practicals: | Presentation of data by tables and graphs, Measures of central tendency, cumulative frequency distributions | GE-1 | STAT-GE-1 Statistical Methods |
| | | To select SRS with and without replacement, For a population of size 5, estimate population mean, population mean square and population variance. Enumerate all possible samples of size 2 by WR and WOR and establish all properties relative to SRS, For SRSWOR, estimate mean, standard error, the sample size. | Bachelor of Statistics (H) Semester III | STAT-C-302: Survey Sampling and Indian Official Statistics |

| | | | | |
|-----------|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------|-------------------------------------------------------------------|
| | Tutorials: | Practice Questions and Doubt Clearing for above topics | Bachelor of Statistics (H) | STAT-C-102: CALCULUS |
| SEPTEMBER | Theory: | Maxima and minima of functions of one and two variables, constrained optimization techniques (with Lagrange multiplier) along with some problems. Jacobian, concavity and convexity, points of inflexion of function, singular points. Theory of Asymptotes (Only for Cartesian forms). | Bachelor of Statistics (H) Semester I | STAT-C-102: CALCULUS |
| | | Comparison of stratified (Under different allocations) with SRS . | Bachelor of Statistics (H) Semester III | STAT-C-302: Survey Sampling and Indian Official Statistics |
| | Practicals: | Measures of dispersion, Moments Measures of skewness and kurtosis | GE-1 | STAT-GE-1 Statistical Methods |
| | | Stratified Sampling: allocation of sample to strata by proportional and Neyman's methods Compare the efficiencies of above two methods relative to SRS. | Bachelor of Statistics (H) Semester III | STAT-C-302: Survey Sampling and Indian Official Statistics |
| | | Practice Questions and Doubt Clearing for above topics. | Bachelor of Statistics (H) Semester I | STAT-C-102: CALCULUS |
| | Tutorials: | | | |
| | Assignment | Questions based on L'Hospital Rule Questions based on Leibnitz rule for successive differentiation. | Bachelor of Statistics (H) Semester I | STAT-C-102: CALCULUS |
| | | Assignments will be based on unit I and Unit III | Bachelor of Statistics (H) Semester III | STAT-C-302: Survey Sampling and Indian Official Statistics |
| | Theory | Differential Equations: Exact differential equations, Integrating factors, change of variables, Total differential equations, Differential equations of first order and first degree, Differential equations of first order but not of first degree, Equations solvable for x, y, q, Equations of the first degree in x and y, Clairaut's equations. Higher Order Differential Equations: Linear differential equations of order n, | Bachelor of Statistics (H) Semester I | STAT-C-102: CALCULUS |

| | | | | |
|----------|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------|------------------------------------------------------------|
| OCTOBER | | Homogeneous and non-homogeneous linear differential equations of order n with constant coefficients, Different forms of particular integrals | | |
| | | Practical difficulties in allocation, estimation of gain in precision. | Bachelor of Statistics (H) Semester III | STAT-C-302: Survey Sampling and Indian Official Statistics |
| | Practicals: | Bivariate data, scatter diagram, principle of least squares and curve fitting, Pearson's correlation, rank correlation | GE-1 | STAT-GE-1 Statistical Methods |
| | | Estimation of gain in precision in stratified sampling, Comparison of systematic sampling with stratified sampling and SRS in the presence of a linear trend and using end's correction, Ratio and Regression estimation: Calculate the population mean or total of the population. Calculate mean squares. Compare the efficiencies of ratio and regression estimators relative to SRS. | Bachelor of Statistics (H) Semester III | STAT-C-302: Survey Sampling and Indian Official Statistics |
| | Tutorials: | Practice Questions and Doubt Clearing for above topics | Bachelor of Statistics (H) Semester I | STAT-C-102: CALCULUS |
| | Mid Term Test | Maxima minima, Leibnitz theorem, partial differentiation, Beta Gamma Function, Double Integral. | Bachelor of Statistics (H) Semester I | STAT-C-102: CALCULUS |
| | | Course covered up to mid-term break. | Bachelor of Statistics (H) Semester III | STAT-C-302: Survey Sampling and Indian Official Statistics |
| NOVEMBER | Theory: | Linear differential equations with non-constant coefficients, Reduction of order method. The Cauchy-Euler's equation of order n, Legendre's linear equation, Revision | Bachelor of Statistics (H) Semester I | STAT-C-102: CALCULUS |
| | | post stratification and its performance, Collapsed strata. | Bachelor of Statistics (H) Semester III | STAT-C-302: Survey Sampling and Indian Official Statistics |
| | Practicals: | Regression, Multiple and partial correlation, Theory of attributes | GE-1 | STAT-GE-1 Statistical Methods |

| | | | | |
|--|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------|-------------------------------------------------------------------|
| | | Cluster sampling: estimation of mean or total, variance of the estimate, estimate of intra-class correlation coefficient, efficiency as compared to SRS. | Bachelor of Statistics (H) Semester III | STAT-C-302: Survey Sampling and Indian Official Statistics |
| | Tutorials: | Practice Questions and Doubt Clearing for above topics | Bachelor of Statistics (Hons.) Semester I | STAT-C-102: CALCULUS |

SEMESTER WISE TEACHING PLAN **SRI VENKATESWARA COLLEGE**

July-November, 2019

Name of the Faculty: Akash Varshney

Department: Statistics

Semester: I/III/V

| Month | | Topics | Course | Paper Code/Name |
|--------|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|----------------------------------------|
| JULY | Theory: | Introduction to times series data, application of time series from various fields, Components of a times series, Decomposition of time series. | B.Sc.(H) Statistics Sem-V | STAT-DSE – 1 (A): Time Series Analysis |
| | | Integration Revision | B.Sc.(H) Statistics Sem-I | STAT-C-102: CALCULUS |
| | | Numerical Analysis: Factorial, finite differences and interpolation. Operators, and divided difference. | B.Sc.(H) Statistics Sem-III | STAT-C-303: Mathematical Analysis |
| | Practicals: | Estimation of trend by free hand curve method, method of semi averages, fitting mathematical curve and growth curves. | B.Sc.(H) Statistics Sem-V | STAT-DSE – 1 (A): Time Series Analysis |
| | | 1.Fitting and plotting of modified exponential curve by different methods | B.Sc.(H) Statistics Sem-V | STAT-DSE – 1 (A): Time Series Analysis |
| | | Formation of difference table, fitting of polynomial and missing terms for equal interval of differencing | B.Sc.(H) Statistics Sem-III | STAT-C-303: Mathematical Analysis |
| | Tutorials: | Practice Questions and Doubt Clearing for above topics | B.Sc.(H) Statistics Sem-I | STAT-C-102: CALCULUS |
| | | | | |
| AUGUST | Theory: | Estimation of trend by method of moving averages. Detrending: effect of elimination of trend on other components of a time series. | B.Sc.(H) Statistics Sem-V | STAT-DSE – 1 (A): Time Series Analysis |
| | | Integral Calculus: Review of integration and definite integral. Differentiation under integral sign. | B.Sc.(H) Statistics Sem-I | STAT-C-102: CALCULUS |
| | | Newton's forward, backward and divided differences interpolation, | B.Sc.(H) Statistics Sem-III | STAT-C-303: Mathematical Analysis |

| | | | | |
|--|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|----------------------------------------|
| | | Seasonal Component: Estimation of seasonal component by the methods of - simple averages, Ratio to Trend, Ratio to Moving Averages and Link Relative method. Deseasonalization. Practical work. | B.Sc.(H) Statistics Sem-V | STAT-DSE – 1 (A): Time Series Analysis |
| | Practicals: | 2.Fitting and plotting of Gompertz curve by different methods. 3. Fitting and plotting of logistic curve by different methods 4. Fitting of trend by Moving Average Method for given extent and for estimated extent. 5. Fitting of trend by Spencer's 15-point and 21-point formulae 6. Measurement of Seasonal indice | B.Sc.(H) Statistics Sem-V | STAT-DSE – 1 (A): Time Series Analysis |
| | Tutorials: | Based on Newton's Gregory forward difference interpolation formula . Based on Newton's backward difference interpolation formula | B.Sc.(H) Statistics Sem-III | STAT-C-303: Mathematical Analysis |
| | | | | |
| | | | | |
| | | | | |
| | Theory: | Cyclic Component: Harmonic Analysis.Random Component: Variate difference method. | B.Sc.(H) Statistics Sem-V | STAT-DSE – 1 (A): Time Series Analysis |
| | | Double integral, change of order of integration, transformation of variables Beta and Gamma functions: properties and relationship between them. | B.Sc.(H) Statistics Sem-I | STAT-C-102: CALCULUS |
| | | Central differences, Derivation of Gauss and Stirling interpolation formulae. formulae. Lagrange's interpolation formulae. | B.Sc.(H) Statistics Sem-III | STAT-C-303: Mathematical Analysis |
| | | Stationary Time series: Weak stationarity, autocorrelation function and the correlogram. Some Special Processes: Moving-average (MA) process and Autoregressive (AR) processes. Estimation of the | B.Sc.(H) Statistics Sem-V | STAT-DSE – 1 (A): Time Series Analysis |
| | | . Measurement of Seasonal indices • Simple Averages method. • Ratio-to-Trend method • Ratio-to-Moving Average method • Link Relative method | B.Sc.(H) Statistics Sem-V | STAT-DSE – 1 (A): Time Series Analysis |
| | | Practicals Based on Newton's divided difference and Lagrange's interpolation formula Based on Gauss forward, Gauss backward central difference interpolation formula Based on Stirling's central difference interpolation formula Based on Lagrange's Inverse interpolation formula | B.Sc.(H) Statistics Sem-III | STAT-C-303: Mathematical Analysis |

| | | | | |
|---------|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|----------------------------------------|
| | | | | |
| | | | | |
| | Assignment | Q1 Different Methods of fitting of Logistic Curve (i) Yule's Method (ii) Hotelling's Method (iii) Successive approximation Method Q. Periodogram and Harmonic Analysis | B.Sc.(H) Statistics Sem-V | STAT-DSE – 1 (A): Time Series Analysis |
| | | Questions based on Differtiation under Integral sign | B.Sc.(H) Statistics Sem-I | STAT-C-102: CALCULUS |
| | | divided difference. Newton's divided differences interpolation, Central differences, Gauss forward, Gauss Backward formulae | B.Sc.(H) Statistics Sem-III | STAT-C-303: Mathematical Analysis |
| OCTOBER | Theory | Introduction to methods of Forecasting a time series. Forecasting by the methods of Exponential smoothing | B.Sc.(H) Statistics Sem-V | STAT-DSE – 1 (A): Time Series Analysis |
| | | Formation and solution of a partial differential equations. Equations easily integrable. Linear partial differential equations of first order. Non-linear partial differential equation of first order and their different forms. Charpit's method. | B.Sc.(H) Statistics Sem-I | STAT-C-102: CALCULUS |
| | | Numerical integration. Trapezoidal rule, Simpson's one-third rule, three-eighths rule, Weddle's rule with error terms. Stirling's Formulae. Euler-Maclaurin summation formula. | B.Sc.(H) Statistics Sem-III | STAT-C-303: Mathematical Analysis |
| | | Introduction to ARMA and ARIMA models. Short-term forecasting method: Brown's discounted regression. | B.Sc.(H) Statistics Sem-V | STAT-DSE – 1 (A): Time Series Analysis |
| | Practicals: | Estimation of variance of the random component by variate difference method 8. Forecasting by exponential smoothing 9. Plotting of Correlogram of moving average. | B.Sc.(H) Statistics Sem-V | STAT-DSE – 1 (A): Time Series Analysis |
| | | Practical : Based on method of successive approximation or iteration Based on method of reversion of series Based on Trapezoidal Rule, Simpson's one-third rule, Simpson's three-eighth rule, Weddle's rule | B.Sc.(H) Statistics Sem-III | STAT-C-303: Mathematical Analysis |
| | Tutorials: | | | |

| | | | | |
|----------|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|----------------------------------------|
| | | | | |
| | <u>Mid Term Test</u> | Cyclic Component: Harmonic Analysis. Random Component: Variate difference method. Estimation of the parameters of AR (1) and AR (2). Autocorrelation functions of AR(1) and AR(2) processes. | B.Sc.(H) Statistics Sem-V | STAT-DSE – 1 (A): Time Series Analysis |
| | | Beta Gamma Function, Double Integral. | B.Sc.(H) Statistics Sem-I | STAT-C-102: CALCULUS |
| | | Topics based on Central Difference Formulae, Numerical Integration. | B.Sc.(H) Statistics Sem-III | STAT-C-303: Mathematical Analysis |
| NOVEMBER | Theory: | Short-term forecasting method: Box-Jenkins method. Short-term forecasting method: Bayesian forecasting | B.Sc.(H) Statistics Sem-V | STAT-DSE – 1 (A): Time Series Analysis |
| | | Homogeneous linear partial differential equations with constant coefficients. Different cases for complimentary functions and particular integrals. | B.Sc.(H) Statistics Sem-I | STAT-C-102: CALCULUS |
| | | Solution of difference equations of first order. Revision | B.Sc.(H) Statistics Sem-III | STAT-C-303: Mathematical Analysis |
| | Practicals: | Forecasting by exponential smoothing 9. Plotting of Correlogram of moving average. Revision of Practicals. | B.Sc.(H) Statistics Sem-V | STAT-DSE – 1 (A): Time Series Analysis |
| | | To find sum by Euler-Maclaurin summation formula. Revision of Practicals. | B.Sc.(H) Statistics Sem-III | STAT-C-303: Mathematical Analysis |
| | Tutorials: | | | |

SEMESTER WISE TEACHING PLAN
SRI VENKATESWARA COLLEGE

Odd Semester -2019-20

Name of the Faculty: Dr. Dipika

Department: Statistics

Semester: I, III, V

| Month | | Topics | Course | Paper Code/Name |
|---------------|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|------------------------------------------------------------|
| JULY | Theory | Concept of population and sample, complete enumeration versus sampling, sampling and non-sampling errors. Types of sampling: non-probability and probability sampling, basic principle of sample survey, Simple random sampling with and without replacement, definition and procedure of selecting a sample, estimates of: population mean, total and proportion, variances of these estimates, estimates of their variances and sample size determination. | B.Sc.(H) Statistics | STAT-C-302: Survey Sampling and Indian Official Statistics |
| | | Introduction to R, Installation of packages and modules, loading of data, playing with arithmetic expressions. Introduction to data types. | B.Sc.(H) Statistics | STAT-SEC-2: Statistical Data Analysis Using R |
| | | Analysis of variance, One-way and two-way classification. | Generic Elective | STAT-GE-3: Basics of Statistical Inference |
| | Practicals | Estimators of population mean. | Generic Elective | STAT-GE-3: Basics of Statistical Inference |
| | Tutorials | | | |
| AUGUST | Theory | Systematic Sampling: Technique, estimates of population mean and total, k). Comparison of systematic sampling×variances of these estimates ($N = n$ with SRS and stratified sampling in the presence of linear trend and corrections. Circular systematic sampling (only definition), Introduction to ratio and regression methods of estimation, first approximation to the population mean and total (for SRS of large size), variances of these estimates and estimates of these variances, variances in terms of correlation coefficient for regression method of estimation and their comparison with SRS, Concept of sub sampling, Cluster sampling (equal clusters only) estimation of population mean and its variance, comparison (with and without randomly formed clusters). | B.Sc.(H) Statistics | STAT-C-302: Survey Sampling and Indian Official Statistics |
| | | Graphical representation and interpretation viz. bar-plot, pie-chart, and box plot, stem-leaf, histograms (equal class intervals and unequal class intervals), frequency polygon, ogives with graphical summaries of data, Generate automated reports giving detailed descriptive statistics. | B.Sc.(H) Statistics | STAT-SEC-2: Statistical Data Analysis Using R |
| | | Brief exposure of three basic principles of design of experiments, treatment, plot and block. | Generic Elective | STAT-GE-3: Basics of Statistical Inference |
| | Practicals | To select SRS with and without replacement, For a population of size 5, estimate population mean, population mean square and population variance. Enumerate all possible samples of size 2 by WR and WOR and establish all properties relative to SRS, For SRSWOR, estimate mean, standard error, the sample | B.Sc.(H) Statistics | STAT-C-302: Survey Sampling and Indian Official Statistics |

|------------------|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------|------------------------------------------------------------|
| | | size. | | |
| | | Based on Plotting Graphs and Descriptive Statistics using R. | B.Sc.(H) Statistics | STAT-SEC-2: Statistical Data Analysis Using R |
| | | Confidence interval for the parameters of a normal distribution (one sample and two sample problems), Analysis of Variance of a one way classified data. | Generic Elective | STAT-GE-3: Basics of Statistical Inference |
| | Tutorials | | | |
| SEPTEMBER | Theory | Relative efficiency of cluster sampling with SRS in terms of intra class correlation, Stratified random sampling: Technique, estimates of population mean and total, variances of these estimates. | B.Sc.(H) Statistics | STAT-C-302: Survey Sampling and Indian Official Statistics |
| | | Import data, code editing, Scatter plot; correlation and lines of regression, Curvilinear regression, User defined functions, Introduction to flow control: if(), for() and while() loop. | B.Sc.(H) Statistics | STAT-SEC-2: Statistical Data Analysis Using R |
| | | Completely randomized design (CRD) | Generic Elective | STAT-GE-3: Basics of Statistical Inference |
| | Practicals | Stratified Sampling: allocation of sample to strata by proportional and Neyman's methods Compare the efficiencies of above two methods relative to SRS. | B.Sc.(H) Statistics | STAT-C-302: Survey Sampling and Indian Official Statistics |
| | | Based on Random Number generation, fitting curves and simple statistical analysis using R software. | B.Sc. (H) Statistics, Semester III | STAT-SEE-2, Statistical Data Analysis Using R |
| | | Tests of hypotheses for the parameters of a normal distribution (one sample and two sample problems), Analysis of Variance of a two way classified data, Analysis of a CRD. | Generic Elective | STAT-GE-3: Basics of Statistical Inference |
| | Tutorials | | | |
| | <u>Assignment</u> | Assignments will be based on unit I and Unit III | B.Sc.(H) Statistics | STAT-C-302: Survey Sampling and Indian Official Statistics |
| | | | | |
| OCTOBER | Theory | Proportional and optimum allocations and their comparison with SRS. Practical difficulties in allocation, estimation of gain in precision, post stratification and its performance, Collapsed strata. | B.Sc.(H) Statistics | STAT-C-302: Survey Sampling and Indian Official Statistics |
| | | Random number generation and sampling procedures. Application problems based on fitting of suitable distribution, Q-Q plot, Multiple Regression. | B.Sc.(H) Statistics | STAT-C-302: Survey Sampling and Indian Official Statistics |
| | | Randomized complete block design (RCBD). | Generic Elective | STAT-GE-3: Basics of Statistical Inference |
| | Practicals | Estimation of gain in precision in stratified sampling, Comparison of systematic sampling with stratified sampling and SRS in the presence of a linear trend and using end's correction, Ratio and Regression estimation: Calculate the population mean or total of the population. Calculate mean squares. Compare the | B.Sc.(H) Statistics | STAT-C-302: Survey Sampling and Indian Official Statistics |

| | | | | |

| | | Problems based on measures of central tendency | GE-1 | STAT-GE-1 Statistical Methods |
| | | | | |
| | | | | |
| SEPTEMBER | Theory: | Decision Making and Looping, Develop programs to do statistical computing, Arrays, Develop programs to do statistical computing related to arrays, matrices etc, Character Arrays, Strings | B.Sc. (Hons) Statistics | STAT-C-502 Statistical Computing Using C/C++ Programming |
| | | Measures of dispersion, Moments Measures of skewness and kurtosis | GE-1 | STAT-GE-1 Statistical Methods |
| | Practicals: | Value of n! using recursion Matrix addition, subtraction, multiplication Transpose and Trace Chi-square contingency table | B.Sc. (Hons) Statistics | STAT-C-502 Statistical Computing Using C/C++ Programming |
| | | Problems based on measures of dispersion Problems based on combined mean and variance and coefficient of variation Problems based on moments, skewness and kurtosis | GE-1 | STAT-GE-1 Statistical Methods |
| | | | | |
| | <u>Assignment</u> | Based on topic covered up to September | | |
| | | | | |
| OCTOBER | Theory | File Management in C, Develop programs to do statistical computing using files input/output files, User- defined Functions, Develop programs to do statistical computing using user defined functions, recursion. | B.Sc. (Hons) Statistics | STAT-C-502 Statistical Computing Using C/C++ Programming |
| | | Bivariate data, scatter diagram, principle of least squares and curve fitting, Pearson's correlation, rank correlation | GE-1 | STAT-GE-1 Statistical Methods |

| | | | | |
|----------|---------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------|---------------------------------------------------------------------------------|
| | Practicals: | t-test for difference of means Paired t-test, F-ratio test | B.Sc. (Hons) Statistics | STAT-C-502 Statistical Computing Using C/C++ Programming |
| | | Fitting of polynomials, exponential curves Karl Pearson correlation coefficient Partial and multiple correlations | GE-1 | STAT-GE-1 Statistical Methods |
| | | | | |
| | <u>Mid Term Test</u> | Based on Unit 1 to Unit 3 | | |
| | | | | |
| | | | | |
| NOVEMBER | Theory: | Structure and Pointers, Develop programs to do statistical computing with the concept of structures and pointers, Dynamic Memory Allocation and the Preprocessor | B.Sc. (Hons) Statistics | STAT-C-502 Statistical Computing Using C/C++ Programming |
| | | Regression, Multiple and partial correlation, Theory of attributes | GE-1 | STAT-GE-1 Statistical Methods |
| | Practicals: | Multiple and Partial correlation. Compute ranks and then calculate rank correlation Fitting of lines of regression | B.Sc. (Hons) Statistics | STAT-C-502 Statistical Computing Using C/C++ Programming |
| | | Spearman rank correlation with and without ties Correlation coefficient for a bivariate frequency distribution Lines of regression, angle between lines and estimated values of variables | GE-1 | STAT-GE-1 Statistical Methods |
| | | | | |
| | | | | |

**SEMESTER WISE TEACHING PLAN
SRI VENKATESWARA COLLEGE**

July-November, 2019

Name of the Faculty: Dr. Ramesh Kumar

Department: Statistics

Semester: III

| Month | | Topics | Course | Paper Code/Name |
|-----------|-------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------|--------------------------------------------------------------------------------------|
| AUGUST | Theory: | Limit laws, different types of convergence and their inter relations, Central Limit Theorem (CLT), applications and examples based on CLT, Order statistics: distribution of rth order, largest and smallest order statistics and joint distribution of two order statistics, | Bachelor of Statistics (Hons.) | STAT-C-301: SAMPLING DISTRIBUTIONS STAT-GE-3: BASICS OF STATISTICAL INFERENCE |
| | | Estimation of population mean, confidence intervals for the parameters of a normal distribution (one sample and two sample problems). The basic ideas of significance test. Null | | |
| | Practicals: | Practical based on different types of convergence and Central Limit Theorem (CLT) | | |
| | Tutorials: | Discuss problems related to theory | | |
| SEPTEMBER | Theory: | Order statistics: Distribution of sample median and range. Examples based on theory Sampling distributions: definition of parameter, statistic, standard error and their concepts, Sampling distribution of various statistics, Introduction to hypothesis testing (classical and p value approach): formulation of null and alternative hypothesis, type I and Type II errors, level of significance and critical region. Examples based on these | Bachelor of Statistics (Hons.) | STAT-C-301: SAMPLING DISTRIBUTIONS STAT-GE-3: BASICS OF STATISTICAL INFERENCE |
| | | Type I & Type II errors, level of significance, Concept of pvalue, Tests of hypotheses for the parameters of a normal distribution (one sample and two sample problems) | | |
| | Practicals: | Practical based on Sampling distributions | | |
| | Tutorials: | | | |

| | | | | |
|----------|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------|--------------------------------------------------------------------------------------|
| | | | | |
| OCTOBER | Theory: | Chi square distribution: Definition and derivation of p.d.f. of χ^2 with n degrees of freedom (d.f.) using m.g.f., nature of p.d.f. curve for different degrees of freedom, mean, variance, m.g.f., cumulant generating function, mode, additive property and limiting form of χ^2 distribution. Tests of significance and confidence intervals based on Chi-Square Distribution. Includes examples and practical work | | STAT-C-301: SAMPLING DISTRIBUTIONS |
| | | Large sample tests: for single mean, single proportion, difference of two means, difference of two proportions, difference of two standard deviations all with examples Examples and practical work based on these tests Categorical data: Tests of proportions, | Bachelor of Statistics (Hons.) | BASICS OF STATISTICAL INFERENCE |
| | Practicals: | Practical based on theory | | |
| | <u>Mid Term Test</u> | Test based on Unit-I and Unit-II | | |
| | <u>Assignment</u> | Assignment related to testing of significance | | |
| NOVEMBER | Theory | Student's and Fishers t-distribution: Derivation of p.d.f., nature of probability curve with different degrees of freedom, mean, variance, moments and limiting form of the distribution, Distribution of sample correlation coefficient when population correlation coefficient is zero. Tests of significance and confidence intervals based on t distribution. Distribution of F statistic: derivation of p.d.f., nature of probability curve with different degrees of freedom, mean, variance, moments, mode and limiting form of the distribution, points of inflexion. Distribution of $1/F(n_1, n_2)$. Relationship between t, F and χ^2 distributions. tests of association and goodness-of-fit using , chi square Test, Yates' correction | Bachelor of Statistics (Hons.) | STAT-C-301: SAMPLING DISTRIBUTIONS STAT-GE-3: BASICS OF STATISTICAL INFERENCE |
| | | | | |
| | Practicals: | Practical based on Sampling distributions Chi square distribution | | |
| | Tutorials: | | | |

SEMESTER WISE TEACHING PLAN
SRI VENKATESWARA COLLEGE
ODD SEMESTER 2019-2020

Name of the Faculty: Dr. Tanuja Sriwastava

Department: Statistics

Semester: III, V

| Month | | Topic | Course | Paper Code/ Name |
|----------|-----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------|----------------------------------------------------|
| October | Theory | Queuing System: General concept, steady state distribution, queuing model, M/M/1 with finite and infinite system capacity, | B.Sc. (H) Statistics, Semester V | STAT-C-501, Stochastic Process and Queueing Theory |
| | | Multicollinearity: Introduction and concepts, detection of multicollinearity, consequences. | B.Sc. (H) Statistics, Semester V | STAT-DSE-2(B), Econometrics |
| | | Learn how to load data, plot a graph viz. histograms (equal class intervals and unequal class intervals), box plot, stem-leaf, frequency polygon, pie chart, ogives with graphical summaries of data, Generate automated reports giving detailed descriptive statistics, correlation and lines of regression. | B.Sc. (H) Statistics, Semester III | STAT-SEE-2, Statistical Data Analysis Using R |
| | Practical | Based on Plotting Graphs and Descriptive Statistics using R | B.Sc. (H) Statistics, Semester III | STAT-SEE-2, Statistical Data Analysis Using R |
| | Tutorials | | | |
| November | Theory | waiting time distribution (without proof). Gambler's Ruin Problem: Classical ruin problem, expected duration of the game. | B.Sc. (H) Statistics, Semester V | STAT-C-501, Stochastic Process and Queueing Theory |
| | | Tests and solutions of multicollinearity, specification error. | B.Sc. (H) Statistics, Semester V | STAT-DSE-2(B), Econometrics |
| | | Random number generation and sampling procedures. Fitting of polynomials and exponential curves. Application Problems based on fitting of suitable distribution, Normal probability plot. Simple analysis and create and manage statistical analysis projects, import data, code editing, Basics of statistical inference in order to understand hypothesis testing and compute p-values and confidence intervals. | B.Sc. (H) Statistics, Semester III | STAT-SEE-2, Statistical Data Analysis Using R |
| | Practical | Based on Random No generation, fitting curves and simple statistical analysis using R software. | B.Sc. (H) Statistics, Semester III | STAT-SEE-2, Statistical Data Analysis Using R |
| | Tutorials | | | |

SRI VENKATESWARA COLLEGE
SEMESTER WISE TEACHING PLAN (2020-2021)

Teacher Name: Dr Chetan

Department: Statistics

Semester: Odd Semester (Semester I, III & V)

Semester III & V

| Month | | Topics | Course | Paper Code/Name |
|--------------|-------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|--------------------------------------------|
| Aug. | Theory | Introduction to Multicollinearity and basic concepts Detection of Multicollinearity, and its consequences. Tests and solutions of Multicollinearity. | B.Sc. (Hons.) Statistics | STAT- DSE 2-(B): Econometrics |
| | Practical | Problems related to consequences of Multicollinearity. Diagnostics of Multicollinearity. | B.Sc. (Hons.) Statistics | STAT- DSE 2-(B): Econometrics |
| | Tutorials | -- | -- | -- |
| | Assignment | Assignment was given on different topics related with curriculum to each student. | B.Sc. (Hons.) Statistics | STAT- DSE 2-(B): Econometrics |
| | Theory | Basics of Statistical Inference & some related definitions. Estimation of population mean Confidence intervals for the parameters of a normal distribution (one sample and two sample problems). | B.Sc. (Hons.) Statistics | STAT-GE-3: Basics of Statistical Inference |
| | Practical | Estimators of population mean. Confidence interval for the parameters of a normal distribution (one sample and two sample problems). | B.Sc. (Hons.) Statistics | STAT-GE-3: Basics of Statistical Inference |
| | Tutorials | -- | -- | -- |
| | Assignment | Assignment was given on different topics related with curriculum to each student. | B.Sc. (Hons.) Statistics | STAT-GE-3: Basics of Statistical Inference |
| Sept. | Theory | Generalized least squares estimation, Aitken estimators. Concept consequences of Autocorrelated disturbances. | B.Sc. (Hons.) Statistics | STAT- DSE 2-(B): Econometrics |
| | Practical | Diagnostics of Multicollinearity. Problems related to consequences of Autocorrelation (AR(I)). | B.Sc. (Hons.) Statistics | STAT- DSE 2-(B): Econometrics |
| | Tutorials | -- | -- | -- |
| | Test | The mock test was conduction on the first two units (some topics) of the curriculum on OBE Pattern. | B.Sc. (Hons.) Statistics | STAT- DSE 2-(B): Econometrics |

| | | | | |
|-------------|------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|--------------------------------------------|
| | Theory | The basic idea of significance test, Null and alternative hypothesis, Type I & Type II errors, level of significance, Concept of p-value, Tests of hypotheses for the parameters of a normal distribution (one sample and two sample problems). | B.Sc. (Hons.) Statistics | STAT-GE-3: Basics of Statistical Inference |
| | Practical | Tests of hypotheses for the parameters of a normal distribution (one sample and two sample problems). | B.Sc. (Hons.) Statistics | STAT-GE-3: Basics of Statistical Inference |
| | Tutorials | -- | -- | -- |
| | Test | The mock test was conducted on the first two units (some topics) of the curriculum on OBE Pattern. | B.Sc. (Hons.) Statistics | STAT-GE-3: Basics of Statistical Inference |
| Oct. | Theory | Detection and solution of autocorrelation. Heteroscedastic disturbances: Concepts and efficiency of Aitken estimator with OLS estimator under Heteroscedasticity. | B.Sc. (Hons.) Statistics | STAT- DSE 2-(B): Econometrics |
| | Practical | Diagnostics of Autocorrelation. Estimation of General linear model under Autocorrelation Problems related to consequences Heteroscedasticity. Diagnostics of Heteroscedasticity. | B.Sc. (Hons.) Statistics | STAT- DSE 2-(B): Econometrics |
| | Tutorials | -- | -- | -- |
| | Theory | Tests of proportions, tests of association and goodness-of-fit using Chi-square Test, Yates' correction. | B.Sc. (Hons.) Statistics | STAT-GE-3: Basics of Statistical Inference |
| | Practical | Chi-square test of proportions. Chi-square tests of association. Chi-square test of goodness-of-fit. Test for correlation coefficient. | B.Sc. (Hons.) Statistics | STAT-GE-3: Basics of Statistical Inference |
| | Tutorials | -- | -- | -- |
| Nov. | Theory | Consequences of Heteroscedasticity. Tests and solutions of Heteroscedasticity. Autoregressive and Lag models. | B.Sc. (Hons.) Statistics | STAT- DSE 2-(B): Econometrics |
| | Practical | Estimation of problems of General linear model under Heteroscedastic disturbance terms. Problems concerning specification errors as a reason for induction of Autocorrelation, Heteroscedasticity and Multicollinearity. Problems related to General linear model under (Aitken Estimation). | B.Sc. (Hons.) Statistics | STAT- DSE 2-(B): Econometrics |

| | | | | |
|--|------------------|--------------------------------------------------------------------------------------------------------------------------------|--------------------------|--------------------------------------------|
| | | Problems on Autoregressive and Lag models. | | |
| | Tutorials | -- | -- | -- |
| | Theory | Tests for the significance of correlation coefficient, Sign test for median, Sign test for symmetry, Wilcoxon two-sample test. | B.Sc. (Hons.) Statistics | STAT-GE-3: Basics of Statistical Inference |
| | Practical | Sign test for median. Sign test for symmetry. Wilcoxon two-sample test. | B.Sc. (Hons.) Statistics | STAT-GE-3: Basics of Statistical Inference |
| | Tutorials | -- | -- | -- |

Semester I

| Month | | Topics | Course | Paper Code/Name |
|-------|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|------------------------------------|
| Nov. | Theory | Statistical Methods: Definition and scope of Statistics, concepts of statistical population and sample. | B.Sc. (Hons.) Statistics | STAT-C-101: Descriptive Statistics |
| | Practical | -- | B.Sc. (Hons.) Statistics | STAT-C-101: Descriptive Statistics |
| | Tutorials | -- | -- | -- |
| | Theory | -- | B.Sc. (Hons.) Statistics | STAT-GE-1: Statistical Methods |
| | Practical | -- | B.Sc. (Hons.) Statistics | STAT-GE-1: Statistical Methods |
| | Tutorials | -- | -- | -- |
| Dec. | Theory | Quantitative and qualitative data, attributes, variables, scales of measurement: nominal, ordinal, interval and ratio. Presentation: tabular and graphical, including histogram and Ogives. | B.Sc. (Hons.) Statistics | STAT-C-101: Descriptive Statistics |
| | Practical | -- | B.Sc. (Hons.) Statistics | STAT-C-101: Descriptive Statistics |
| | Tutorials | -- | -- | -- |
| | Assignment | Assignment was given on different topics related with curriculum to each student. | B.Sc. (Hons.) Statistics | STAT-C-101: Descriptive Statistics |
| | Theory | -- | B.Sc. (Hons.) Statistics | STAT-GE-1: Statistical Methods |

| | | | | |
|-------------|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------|------------------------------------------|
| | Practical | Graphical representation of data. | B.Sc. (Hons.) Statistics | STAT-GE-1: Statistical Methods |
| | Tutorials | -- | -- | -- |
| | Assignment | | B.Sc. (Hons.) Statistics | STAT-GE-1: Statistical Methods |
| Jan. | Theory | Theory of attributes: consistency and independence of data with special reference to attributes. Probability: Introduction, random experiments, sample space, events and algebra of events. | B.Sc. (Hons.) Statistics | STAT-C-101: Descriptive Statistics |
| | Practical | Measures of Dispersion Coefficient of dispersion and variation Combined mean and combined variance and Raw moments | B.Sc. (Hons.) Statistics | STAT-C-101: Descriptive Statistics |
| | Tutorials | -- | -- | -- |
| | Test | -- | B.Sc. (Hons.) Statistics | STAT-C-101: Descriptive Statistics |
| | Theory | Measures of Central Tendency: mathematical and positional. Measures of Dispersion: range, quartile deviation, mean deviation, and standard deviation. | B.Sc. (Hons.) Statistics | STAT-GE-1: Statistical Methods |
| | Practical | Problems based on measures of central tendency. Problems based on measures of dispersion. Problems based on combined mean and variance and coefficient of variation. | B.Sc. (Hons.) Statistics | STAT-GE-1: Statistical Methods |
| | Tutorials | -- | -- | -- |
| | Test | -- | B.Sc. (Hons.) Statistics | STAT-GE-1: Statistical Methods |
| Feb. | Theory | Definitions of Probability-classical, statistical, and axiomatic. Conditional Probability, Addition and multiplication theorem of probability, independent events, Theorem of Total probability, Bayes' theorem and its applications. | B.Sc. (Hons.) Statistics | STAT-C-101: Descriptive Statistics |
| | Practical | Moments about any arbitrary point Central Moments Moments using relation between Raw moments, Moments about any arbitrary point and Central Moments Correct moments involving wrong | B.Sc. (Hons.) Statistics | STAT-C-101: Descriptive Statistics |

| | | | | |
|-------------|------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|------------------------------------|
| | | data | | |
| | Tutorials | -- | -- | -- |
| | Theory | Coefficient of variation and moments. Skewness and Kurtosis. Theory of attributes, consistency of data. | B.Sc. (Hons.) Statistics | STAT-GE-1: Statistical Methods |
| | Practical | Problems based on moments, skewness and kurtosis. Fitting of polynomials, exponential curves. Karl Pearson correlation coefficient. Partial and multiple correlations. Spearman rank correlation with and without ties. | B.Sc. (Hons.) Statistics | STAT-GE-1: Statistical Methods |
| | Tutorials | -- | -- | -- |
| Mar. | Theory | Random variables: discrete and continuous, illustrations and properties of random variables, pmf, pdf and cdf, Two dimensional random variables: Joint, marginal and conditional pmf/ pdf, independence of random variables. Univariate transformation. Mathematical Expectation: Expectation of random variables and its properties. | B.Sc. (Hons.) Statistics | STAT-C-101: Descriptive Statistics |
| | Practical | Skewness based on mean, median, mode and standard deviation Skewness and kurtosis based on moments. Problem based on missing frequencies Theory of attributes | B.Sc. (Hons.) Statistics | STAT-C-101: Descriptive Statistics |
| | Tutorials | -- | -- | -- |
| | Theory | Independence and association of attributes. Measures of association and contingency. | B.Sc. (Hons.) Statistics | STAT-GE-1: Statistical Methods |
| | Practical | Correlation coefficient for a bivariate frequency distribution. Lines of regression, angle between lines and estimated values of variables. Checking consistency of data and finding association among attributes. | B.Sc. (Hons.) Statistics | STAT-GE-1: Statistical Methods |
| | Tutorials | -- | -- | -- |
