This Diploma Supplement follows the model developed by the European Commission, Council of Europe and UNESCO/CEPES. The purpose of the Supplement is to provide sufficient independent data to improve the international "transparency" and fair academic and professional recognition of qualifications (diplomas, degrees, certificates, etc.). It provides a description of the nature, level, context, content and status of the studies that were pursued and successfully completed by the individual named on the original qualification to which this supplement is appended.

1 INFORMATION IDENTIFYING THE HOLDER OF THE QUALIFICATION

1.1 Family name(s) Venkata Rama
1.2 Given name(s) Kameswara Sharma Yadavilli

1.3 Date of Birth 20 Jul 1982
1.4 Student ID 4263241
HESA Reference 1511554632410

2 INFORMATION IDENTIFYING THE QUALIFICATION

2.1 Qualification Master of Research
2.2 Programme of Study Advanced Genomic and Proteomic Sciences

2.3 Awarding Institution(s) The University of Nottingham
2.4 Administering Institution(s) The University of Nottingham
2.5 Language of Instruction English

3 INFORMATION ON THE LEVEL OF THE QUALIFICATION

3.1 Level of Qualification 7
3.3 Access Requirements Please see overleaf

3.2 Length of Programme 12 month PG (Session start)

4 INFORMATION ON THE CONTENTS AND RESULTS GAINED

4.1 Mode of Study Full time

4.2 Programme Requirements Please see overleaf

4.3 Programme Details

2015 - 2016

Mark	1st Resit Mark	2nd Resit Mark	Credit	ECTS
D24007	Basic Introduction to Omic Technologies (Level 4)	69	10	5.0

Date: 6th March, 2019**Dr. Ashita Raveendran**
Programme Coordinator**Subject:** Video Recording for the online course on *Instructional Strategies for Mathematics & Statistics in Economics-reg.*

Dear Dr. Krishna Kumar,

As you are aware, the Planning and Monitoring Division (PMD) of NCERT is in the process of developing an online course on *Instructional Strategies for Mathematics & Statistics in Economics* for the post graduate teachers of Economics. This course intends to provide an introduction to the basic tools of mathematics and statistics essential for a proper understanding of economics course at the higher (senior) secondary stage.

In connection with the above said programme, you are requested to help us in video recording scheduled for **11 – 13, March 2019** in CIET, NCERT, New Delhi.

To facilitate your participation in this workshop, the NCERT will cover your TA/DA expenditure and provide honorarium as per its rules.

A line of confirmation will be highly appreciated.

With regards,

Yours Sincerely,

(Ashita Raveendran)

and Understanding

**INTERNATIONAL
COUNCIL
FOR SCIENCE**

Dear participant,

We are pleased to confirm your participation at the Faculty Development Program cum Workshop of the [TROP ICSU](https://tropicsu.org) project on **13th and 14th October 2018** at **Sri Venkateswara College (University of Delhi)**. The workshop, “**Climate Across The Curriculum: Resources For Integrating Climate Topics In Discipline-Specific Teaching**”, is part of a Climate Education Project of the [International Science Council](https://tropicsu.org).

This workshop will introduce the participants to digital teaching resources to teach topics in the Sciences, Mathematics, Social Sciences, and the Humanities using climate-related examples, case studies and activities. Educators can use these new educational tools and innovative teaching practices in their classroom to enhance the conceptual understanding of topics in different disciplines while increasing awareness of climate change.

In this interactive workshop, participants will carry out hands-on activities through the use of different types of digital teaching tools. Participants will also develop their own lesson plans.

During this workshop, we invite you to review the educational resources of the TROP ICSU project. Your feedback on the appropriateness and ease of use of the teaching tools and lesson plans will help us enhance the quality and effectiveness of the content.

With your help and active participation, we are confident that the TROP ICSU teaching resources will be ready for use by teachers across the globe for years to come.

As a pre-workshop activity, we request you to fill the TROP ICSU Educators Survey at <https://tropicsu.org/educators-survey/>

Sincerely,

Team TROP ICSU in collaboration with Sri Venkateswara College (University of Delhi)

<https://tropicsu.org>

Swarn Singh
Department of Mathematics
Sri Venkateswara College, University of Delhi
New Delhi INDIA

Hello Swarn,

Congratulations! We have now published your very fine work, "Numerical Methods Comparisons" in SIMIODE. The piece can be found at <https://www.simiode.org/resources/5034> and a full citation is given by

Swarn Singh (2018), "2-001-Text-S-NumericalMethodsComparisons," <https://www.simiode.org/resources/5034>. There is also a Teacher Version of the same work available exclusively to our teacher colleagues in SIMIODE with this full citation:

Swarn Singh (2018), "2-001-Text-T-NumericalMethodsComparisons," <https://www.simiode.org/resources/5033>.

This is an example of a Technique Narrative through which we discuss traditional techniques for solution, but with reference to a modeling situation, in your case skin burn. We are pleased to have your work in SIMIODE.

SIMIODE uses a peer-review, double-blind review system and is an excellent contribution for teachers and students who use SIMIODE for teaching and learning differential equations in a modeling first approach. In your case we recognize the fine contribution you render for teaching differential equations from this fresh perspective and we have expedited publication.

Thank you very much for your effort on behalf of our community and on behalf of the broader mathematics community. Your exposition and your helpful comments to fellow teachers and to students who might elect to use this material in their classes is a great contribution as well.

Take care.

Sincerely,

Brian Winkel, Director SIMIODE

Ref No. SVC/Cert./Teaching/KS/2019/3

Dt. 20th August, 2019

CERTIFICATE

This is to certify that Dr. Kameswara Sharma YVR, Assistant Professor, Department of Biochemistry has been involved in the Curriculum Revision, Design and Development for UG Course B. Sc. (Hons.) Biological Science as per CBCS guidelines ensuring the Learning Outcome Based Curriculum Framework (LOCF) in the capacity of Course Coordinator during January, 2019 to May, 2019. This is issued with the approval of the competent authority of University of Delhi.

Dr. P. Hemalatha Reddy
PRINCIPAL

Copy to:

1. Personnel file, Dr. Kameswara Sharma YVR

Sri Venkateswara College
B. Sc. (Hons) Biological Science

Minutes of the meeting of Committee of Courses for B.Sc. (Hons) Biological Science, Sri Venkateswara College, University of Delhi held on 21st May 2019 at 10.00 A.M. in the Conference Hall, Department of Environmental Studies, University of Delhi

A meeting of the Committee of Courses was held on the above date and time in the Department of Environmental Studies, University of Delhi. The meeting was attended by the following members:

- | | | | |
|----|--------------------------|---|--|
| 1. | Professor S. D. Biju | - | Dean, Faculty of Sciences |
| 2. | Professor K. S. Rao | - | Head, Department of Botany |
| 3. | Professor Yogendra Singh | - | Professor, Department of Zoology |
| 4. | Professor Daman Saluja | - | Director, ACBR |
| 5. | Dr. Hemalatha Reddy | - | Principal, Sri Venkateswara College |
| 6. | Dr. Meenakshi Kuhar | - | Associate Professor (Senior Faculty)
Sri Venkateswara College |
| 7. | Dr. Kameshwar Sharma | - | Coordinator, Biological Sciences,
Sri Venkateswara College |

Professor M. M. Chaturvedi was not able to attend the meeting and requested Professor Yogendra Singh to attend the meeting on his behalf.

The committee discussed the revision of the syllabus developed for B.Sc. (Hons) Biological Science which was initiated in February 2019 by University of Delhi under the CBCS - LOCF system. The inputs for the same were taken from the teachers involved in teaching of the B.Sc. (Hons) Biological Science programme (Paper Coordinators and Working Committee Members) as well as from the experts on the subject. The first draft of the syllabus was formulated by compiling these inputs and was presented before the committee.

The committee members after thoroughly going through the first draft suggested the following;

1. The titles of some of the courses to be simplified/modified; "Biodiversity" to "Biodiversity and Taxonomy"; "Concepts in Cell Biology" to "Cell Biology"; "Functional Ecology" to "Ecology"; "Concepts of Molecular Biology" to "Molecular Biology"; "Concepts of Evolutionary Biology" to "Evolutionary Biology"; "Hormone Biochemistry" to "Endocrinology"; "Wild life Conservation" to "Wildlife Biology and Conservation", "Defense Mechanisms" to 'Immunobiology', "Fundamentals of Genetics" to "Genetics" and "Biofertilizers" to "Organic Farming".
2. It was suggested, if possible to include Biostatistics and Veterinary Science as a SEC course.
3. Prof S. D. Biju suggested that the Practicals in Biodiversity paper are much more intensive as compared to other core courses and are mostly related to Unit 1. It will be good to cover all the units in some ways.
4. In Functional Ecology course it was suggested that the course objectives need to be redefined in order to include some basic concepts in Ecology.

5. It was suggested by Prof S. D. Biju that if possible, to include some practical component on "Molecular Phylogenetics" in the paper on "Evolutionary Biology".
6. It was also suggested that references must be formatted properly and one must assure that current, updated and appropriate references are included in the revised version. The references should be in APA format.
7. There are inconsistencies about the number key words. It was suggested to keep 6-10 keywords for each course.
8. Prof. Biju, Dean Faculty of Sciences confirmed whether we can edit the titles of the core papers.
9. CoC members suggested that if possible, a course on "Bioinformatics and Biostatistics" can be introduced as a DSE paper.
10. Committee expressed their views in merging of "Medical Diagnostics" and "Public Health Management". However, Principal Dr P. Hemalatha Reddy clarified on this point.
11. Prof. Yogendra Singh appreciated the course and the contents of Organic Farming.
12. Basic understanding of Biodiversity may be enhanced viz., Biodiversity laws, Rules, Classical concepts etc., and Prof. Biju agreed to do changes in this regard.
13. Prof. S. D. Biju advised the students be taken to visit Biodiversity centres across India to give them an exposure and evoke an interest towards the field.
14. Prof. S D Biju agreed to do corrections and proof reading of the papers "Wildlife Conservation", "Biodiversity", "Molecular Biology", and "Evolutionary Biology".
15. Prof. Daman Saluja agreed to revise: Biophysics", "Chemistry", "Proteins and Enzymes", "Genetics", "Microbiology" and "Biochemical Techniques".
16. Prof Y. Singh agreed to do revision for Zoology courses along with "Proteins and Enzymes" and "Metabolism and Integration".
17. Principal, Dr P Hemalatha Reddy suggested that a bridge course may be planned in Mathematics for the Biological Sciences students.
18. CoC members advised to upload the contents of the Draft 1 on the day of 21st May, 2019 for the feedback and comments by the stakeholders, as per the directions from the University.

GAD - TLC/2020-21/OFDP2/2002

ONE WEEK FACULTY DEVELOPMENT PROGRAM

Machine Learning and Pedagogy

This is to certify that

Dr. Lalita Josyula of Sri Venkateswara College University of Delhi

has successfully completed One Week Faculty Development Program jointly organized by Guru Angad Dev Teaching Learning Centre SGTB Khalsa College, University of Delhi under the Pandit Madan Mohan Malaviya National Mission on Teachers and Teaching (PMMNMTT) of MHRD and Deen Dayal Upadhyaya College, University of Delhi. This was conducted from 11th March to 12th March in offline mode and remaining sessions online mode till 18th May 2020 and with full one week's total commitment through face to face as well as online live sessions, quizzes, project and Assessment.

This is equivalent to one week face to face FDP.

The participant has obtained GRADE "B" as required for promotion under CAS of UGC and AICTE.

Dr. H.C. Jain

CERTIFICATE

To whom it might concern,

With the present letter, I do certificate that Mr

Prof. Dr. Rakhi Narang
Department of Electronics, Sri Venkateswara College
University of Delhi

Has registered at the edition 2020 of the PhD course

MICRO-614: Electrochemical Nano-Bio-Sensing and BioCMOS interfaces

The course has been provided by live-lectures on Zoom Video Communications, including interactions by polls and discussions, during the period from June 15th to June 19th, 2020, every day, from 14h to 17h. The participant have been then required to solve several exercises as well as to write an article as personal and critical elaborate on a scientific publication by considering the content of the course.

The content of the course is about introducing main concepts in designing of modern wearable and implantable devices. In particular, the course is based on the key new concept of co-design of the three main system layers: BIO-layer for specificity, NANO-layer for sensitivity, and CMOS-layer for autonomy. Examples of modern devices realised for m-Health are presented and deeply discussed during the course.

The course is part of the program of the EPFL Doctoral School in Microsystem and Microelectronics (EDM6). The program of the school covers a wide range of research topics ranging from MEMS to digital circuit design, Interdisciplinarity and technology innovation constitute core priorities of the doctoral program.

Yours sincerely

Acknowledgements

The Centre for Policy Research in Higher Education (CPRHE) of the National Institute of Educational Planning and Administration (NIEPA), New Delhi, and the British Council, India, jointly organised an “International Seminar on Governance and Autonomy in Higher Education” on 20-21 February 2020, at the India Habitat Centre, New Delhi. The seminar brought together more than 100 participants, including around 20 international participants, from seven countries. The seminar could not have been organised without the generous support received from various sources and agencies.

We express our gratitude to the Ministry of Human Resource Development (MHRD) and the Ministry of External Affairs for helping in facilitating visas for the participants. We are also grateful to our Vice Chancellor, Professor N. V. Varghese, for his guidance and support at every stage of the International Seminar.

We thank Mr. Tom Birtwistle, Director, North India; Dr. Manjula Rao, Director, Internationalising Higher Education; and Ms. Vishu Sharma, and other colleagues from the British Council for their collaboration and support.

Grateful acknowledgements are due to the NIEPA administration headed by Professor Kumar Suresh, the Registrar (I/C), and his team consisting of Dr. Naresh Kumar, Administrative Officer, Ms. Puja Singh, Finance Officer, Mr. Jai Prakash Dhami (Training Cell), Mr. P. P. Saxena and Mr. Chander Prakash (General Administration), Mr. Chandra Prakash, (Accounts & Finance) and their colleagues for their logistical support in organising the seminar. We thank Mr. Pramod Rawat and the Publication Unit for their support in bringing out this report and other documents related to the seminar.

We are also grateful to all the session rapporteurs – Dr. Nidhi Sabharwal, Mr. Eldho Mathews, Dr. Jinusha Panigrahi, Dr. Malish C.M., Dr. Sangeeta Angom, Dr. Anamika, Dr. Anupam Pachauri and Dr. Binay Prasad. We are also thankful to all our colleagues at CPRHE for their consistent support.

Last but not the least, we would like to thank Ms. Anjali Arora, Ms. Monica Joshi, Mr. Mayank Rajput and our research scholars for their invaluable help at every stage in the preparation and organisation of the seminar.

International Seminar on Governance and Autonomy in Higher Education

20-21 February, 2020

1. Introduction

Governance refers to the structure and processes of decision making. Governance becomes effective and improves institutional performance when decisions are translated into operational practices accompanied by accountability measures at the institutional level. Good governance in public institutions implies how public institutions conduct their affairs and manage public resources. Good governance is identified with the government's responsibility in serving the masses through a process of decision making and efficient implementation of laws. Governance of higher education institutions is essential to fulfilling the Sustainable Development Goal (SDG) of quality education.

The governance and management of higher education institutions is becoming increasingly complex against the backdrop of the expansion and diversification taking place globally. The diversification of the higher education system has occurred through the process of expansion from a unitary structure (universities) towards a system that is flexible and can accommodate the varying demands emerging from different groups and regions within a country. The relationship between the State, market and higher education institutions has changed over the years. The role of the State in this new and changed scenario globally has changed from direct control to 'steering from a distance', with the focus being on performance and outcome-based measures instead of being determined by inputs. This new form of 'managerialism' has implications for autonomy and accountability.

The established trends in higher education governance, including institutional autonomy and public accountability, have started having a long-term impact on the relationship between the State and the institution. Governments have centralized their powers in their relationships with the universities through performance-based accountability; research funding mechanisms; quality assurance; and various administrative mechanisms. These control mechanisms have assumed different forms from previous legal regulations, and exert a more intensive and stronger influence on the university than legal regulations. Although states deregulated universities under neo-liberalism, they continue to exercise control over the universities through indirect mechanisms.

The new public management theory was developed at the end of the 1970s due to increasing discontent with the public sector. The reforms undertaken by the OECD countries have been theoretically classified under the concept of New Public Management (NPM), emphasizing the accountability of the public sector with a focus on results. The New Public Management concept is centred around the proposition that management can be applied to the public sector in the same way that it has been applied to the corporate sector. New Public Management has its origin in managerialism, which can be defined as a mode of governance aligned with neo-liberalism.

In India the external quality assurance agencies, internal quality assurance mechanisms and the ranking of higher education institutions are examples of increasing accountability measures. The new reform measures such as graded autonomy and funding mechanisms pose further challenges to guide and direct institutions of higher education. A growing consensus seems to be emerging towards granting of more autonomy, increasing accountability measures, decentralization of power and participation of faculty and students in institutional decision making process. However it is found, at times, that even when higher level of autonomy is granted from the government, decision making is getting increasingly centralized at the institutional level. It seems that an atmosphere of command and control permeates down from offices of Vice Chancellors down to teachers and students.

The performance of higher education institutions in India as measured on quality parameters, will in future determine the extent of autonomy and the level of regulatory scrutiny they will face. The government has also decided that top-ranking institutions will be exempt from the UGC's review mechanism. The draft University Grants Commission (Grant of Graded Autonomy to Institutions of Higher Education) Regulations 2017 is critical in this regard. These regulations aim to divide all UGC-recognised public, private and deemed universities into three categories, each of which will bestow different degrees of autonomy on the educational institutions.

The Centre for Policy Research in Higher Education (CPRHE) of the National Institute of Educational Planning and Administration (NIEPA) initiated a large scale empirical study involving multi-state research teams on “Governance and Management of Higher Education in India”. The purpose was to understand the issue in a holistic fashion from the viewpoint of its major stakeholders- administrators, faculty and students of higher education institutions. The study was launched in four states of the country, viz. Uttar Pradesh, Rajasthan, Maharashtra and Tamil Nadu in order to understand the governance of higher education at three levels: state-university, within-university and university-college relations. The structure of governance in state and central universities was found to vary substantially. Further state universities have two layers of control, both by central government and state level agencies. Paucity of funds impacts recruitment and promotions of teachers and student admissions. As compared to central universities where research gets a major push, affiliated colleges focus largely on teaching. The findings from this study and other similar studies form the basis and context for organising this seminar. The seminar was held by the CPRHE, NIEPA in collaboration with the British Council, India with following objectives.

Objectives of the Seminar

The international seminar had the following objectives:

1. To discuss international trends in governance of higher education
2. To share country experiences in institutional autonomy

3. To provide a platform to share strategies for improving institutional performance

The seminar brought together educationists, key experts, policymakers and policy analysts from seven countries, viz the United Kingdom, the United States of America, France, Afghanistan, Ethiopia, South Africa, Uganda and India. Around 100 plus delegates from these countries, along with representatives from NGOs and global organisations like the World Bank, UNESCO and Brookings, participated in the seminar.

Overall, the seminar provided to the academics, researchers, experts, policymakers and members of various institutions engaged in research and policy an occasion to network with each other and share a common platform for discussing several issues related to the governance and autonomy of higher education institutions.

2. Inaugural Session

The international seminar commenced with the welcome address by Professor N.V. Varghese, Vice Chancellor of NIEPA. He informed the audience that this seminar was the sixth in the seminar series being organized by NIEPA in collaboration with the British Council. While introducing the theme of the seminar he classified the global evolution of the governance systems in higher education in three stages. The first stage was the reconstruction stage in Europe and the post-colonial stage in many developing countries, especially of Africa and Asia when higher education was provided by the public authorities and the governance structure in higher education was characterized by state funding and control. The governance process was seen as one of the elements of the public sector dominated, state sponsored, state funded and state managed strategy of development. The higher education sector was mostly government funded and managed, and mostly public higher education institutions were relied on for expansion of the sector.

The second stage was in the 1970s when fiscal capacity of the state weakened and the ability of the state to lead the development process was doubted

and questioned. This stage is marked by a move towards reliance on market rather than the state in development. The initiatives have been to introduce market friendly reforms and redefine the relationship between state and market in higher education development. The institutional autonomy and the authority enjoyed by the public institutions to mobilize resources and move away from state dependence were issues of public debate. In terms of governance processes these changes implied that while institutional autonomy was accompanied by full state funding in the first stage, autonomy became a substitute for public funding in the context of market led reforms.

The third stage in the development is of opportunities for the young to engage with national development and public governance. Contrary to the decades of the past century, many countries are now being led by young leaders. Countries such as New Zealand, France, Austria and Finland are examples of this trend. This is the period where millennials are becoming heads of state. They have a different attitude towards the state, public funding and market processes. The difference is that millennials have witnessed the damage done by unchecked expansion of market to all spheres of economic and social activity. The global economic crisis of 2007 is a living example of the crisis created by the market failure. This generation of leaders believe in liberal values and public action for social development. This stage brings back the state in a transformed form in decision making in all spheres of development including education.

In his opening remarks Mr. Tom Birtwistle, Director, North India, British Council highlighted that governance and autonomy of higher education have been continuing themes in the negotiations for autonomy of institutions across education systems all around the world. In the public realm the concepts of governance are fundamentally equated with the manner in which power is exercised in management of resources. This largely remains true when applied to the higher education sector.

Given the varying funding models of higher education across countries the state funded and privately financed models are common and they exist side by side. It becomes difficult to de-couple governance from the question of

autonomy in decision making. Universities fundamentally know the areas where they feel the exercise of autonomy will most impact the heart of the institution – that is the selection of students, recruitment of teachers, the design of the courses that are offered in the university, the assessment of the courses and the research management. He added that the draft of the national education policy 2019 strongly signals to the significant changes that India intends to implement. The draft policy aims to combine autonomy with good governance as a driver for India to establish more universities that are recognized as world class.

Inaugural address by Professor Daniel A. Wagner at the International Seminar on 'Governance and Autonomy in Higher Education'

In his keynote address, Professor Daniel A. Wagner, UNESCO Chair in Learning and Literacy, University of Pennsylvania, U.S.A, focused on the global learning crisis. In the context of the Sustainable Development Goal 4 to “Ensure inclusive and equitable quality education and promote life-long learning opportunities for all”, while access to schools have grown tremendously in India and in the world it was pointed out that the gap in learning and skills have grown across levels of education including in higher education. The factors influencing low learning levels are poorly equipped schools, rural communities, inadequately trained teachers, less literate or illiterate parents and ethno-linguistic minorities.

The speaker also highlighted the problem of cumulative learning deficits and language difficulties in the context of growing diversity in student population. There is a broad agreement on educational achievements in past two decades, but serious problems remain, especially in low-income countries: the dropout rates at the bottom of the pyramid are more than double that among students belonging to middle and upper economic classes; the difficulties of obtaining a good high school grade without which its almost impossible to get access to higher education institutions; the growing gap for the poor in learning skills (reading and maths) even among those entering tertiary education (some far less prepared than others); mega-trends of urbanization, internal and external migration, civil conflict and climate change affect the people in particularly at the bottom of the pyramid. Most research on learning is carried out on educational institutions where only a fraction of learning takes place. A large part of the learning that takes place in situations of less structured informal in-school learning and out-of-school learning is ignored in the research studies. It was further presented that participation rates vary greatly between children belonging to the top and bottom half of population income groups. The children from the poorest social background and at the bottom of the pyramid rarely gain access to higher education in some countries.

The most commonly used measure of excellence at the university level is the number of publications. The world universities ranking are often biased in favour of the number of publications and research citations. Based on the empirical evidence it was shown that India had minimal scientific citations, while Singapore despite its small population was considered excellent as it had a high share of publications. The remaining part of the presentation focused on the questions related to different forms of equity in education:

- a) Access equity: Access in equity meant improved access to higher education by gender, by wealth and by language.
- b) Knowledge equity focused on how research is organized and influenced. For example in Africa, the North-South collaboration and funding is biased towards the interests of the Global North. Only 10 percent of publications are collaborations within African countries or multiple African countries.

- c) Funding equity: Who is funding research, by institution? Western donors and foundations play most prominent role and this shapes the research undertaken.

It was pointed out that in the present context of governance of institutions of higher education there is a need to probe into the following questions: a) what is the nature of equity within universities; b) can universities attract more diverse students and faculty; c) can a university be truly excellent without attending to issues of equity.

The inaugural session ended with the Vote of Thanks by Dr. Garima Malik, Assistant Professor, CPRHE/NIEPA.

3. Resume of Discussions

The following sections delineate the primary issues that constituted the discussion and discourse at the seminar.

3.1 State, Market and Governance of Higher Education

The continuing influence of market principles in higher education has been producing conflicts between allocation of resources by the State and the actual needs of the sector. As a result, due to competitive pressures, institutions are compelled to generate additional resources. The increasing global competitiveness through 'rankings', 'quality upgradation', etc. is more focused on bringing quantifiable parameters into the higher education sector. Academic autonomy has not been getting adequate attention at par with other quantifiable parameters related to graduate outcomes.

Institutional autonomy and academic freedom should be the key component of the governance structure of higher education institutions. Participation of students in the academic governance of institutions should also be promoted. Higher education sector has been witnessing massive expansion over the years. At the same time there are various limitations for the universities while responding to societal demands. With a population of around 1.2 billion and tertiary enrolment of around 20 million students,

African higher education system faces huge inequality in terms of access and quality.

Although liberalization and globalization process have increased the number of institutions and access, still there are wide variations among countries in Africa. While the Gross Enrolment Ratio (GER) of South Africa is around 20 percent, it is only 4 percent in Niger. Public higher education systems still dominate the African higher education sector, but the role of private sector with 20 percent enrolment has been growing since the liberalization process. Another major issue is the higher unemployment rate among the youth, which indicates that Africa does not produce sufficient jobs for its graduates.

Autonomy granted to most of the African universities are only cosmetic in nature as the government nominees exert influence in the decision-making process of the universities. Most of the universities are facing resource crunch. Many institutions are embroiled in court cases as well.

Many universities face leadership crisis due to trivialization of academic governance. As a result, institutions lack top university officials with necessary leadership qualities and impeccable integrity. In many countries, academic leadership positions are offered to those without any teaching, research and administrative experience. The sudden growth in the number of universities is also a contributing factor for this crisis. Eighty per cent of the dissertations are plagiarized from other sources in many African countries. Currently, most of the African universities do not have any mechanism to check this issue. This points to the importance of promoting a new academic culture in the institutions.

In India the governance structure of higher education institutions across the country has been influenced by global models dominated by new funding mechanisms and quality assurance frameworks. This shift is accompanied by the spread of a new commercial model in higher education and research. A global shift is also happening in the processes of government decision-making process in higher education which could be termed as 'government to governance' whereby institutional policy-making process involves a

plurality of different actors. The influence of 'managerialism' is visible in the policy-making process in higher education as well. It is important to have a clear theoretical understanding about the key factors that influence these changes, especially in the context of the knowledge economy and its influence on the transaction of knowledge. Creating a creamy layer of institutions as 'graded institutions', promoting corporate interests in higher education, top-heavy organizational structure, etc. could be seen as examples in the Indian context. All these reflect greater centralisation of control in the guise of granting more autonomy. The recommendation of the draft National Education Policy to reduce the number of higher education institutions could also be viewed in this changing environment. The recent recommendations of the UGC and NITI Aayog are also in favour of the creation of a layered system: which gives more autonomy to best institutions.

In India, universities are governed by the State through an indirect process through Central and State Acts that govern Central and State universities, respectively. However, the recent moves by the governors of few States in appointing vice-chancellors without consulting the State government signals a new direction in the relationship between universities and the State. The decision to enact a Common University Act for the entire universities in States also affect the academic identity of institutions.

The influence of the State in the running of academic institutions is also reflected in the creation of State Higher Education Councils (SHEC) and its organizational structure. In many SHECs, State ministers hold the position of Chairpersons which would allow them to exert direct control over the institutions. All these are symptoms of trust deficit between the State and academic community. Institutions should be equipped to deal with a diverse student population with regard to gender, nationality, religion, etc. Adequate policies and procedures that support the well-being of students towards fostering an inclusive learning environment need to be promoted.

It is also a fact that many institutions are not able to effectively use even the limited autonomy they are entitled to at the moment, due to various reasons. Therefore, institutions should strive for substantive autonomy, as the key components of autonomy are positively linked to each other.

3.2 Global Trends in University Governance

The discussions in this session focused on the need for balancing governance, retaining quality, accountability and funding. It was realized that the synergy between private and public institutions may be a good step towards good governance in higher education. A reorganization of governance will help students move through a flexible higher education system with the flexible learning pathways which is emphasized by the Education 2030 agenda. Accreditation and recognition are important linkages that exist between formal, non-formal and informal education.

The integration of the modes of education delivery and new learners can be achieved with alternative admission pathways, opportunities, quality assurance, information and counseling. However, the challenges are many such as: weak policy environment, administrative fragmentation, multitude of power centers, decentralization, increase in competition between higher education institutions those discourage collaboration, cultural differences, lack of trust between institutions etc.. In this context, for a successful learning pathway the institutional agreement plays an important role. There is the existence of several obstacles varying across countries such as; National credit schemes not acting properly, half of the countries not supporting at policy level, most of the countries do not evaluate policies e.g. NQF, lifelong learning etc.

It was pointed out in the session that there are several ways to look at governance. Autonomy, accountability, decentralization are integral parts of governance. Governance must follow a top down approach. A phase of minimum regulations and increased funding will improve performance of higher education institutions. The leadership has a lot to do with effective governance. The institutional dynamics and interactions impact governance in several ways. Governance of an institution is influenced by power centers operating in an institution of higher education. There could be legitimate and formal power centers on the one hand and informal but influential power centers on the other. At times the legitimate power centres also may use power illegitimately. There are instances when conflict may arise between two legitimate power centres and between

legitimate illegitimate power centres. These conflicts between power centres influence decisions, causes delays in decision making leading to weakening or a failure of governance. Another aspect of the recent changes in the governance of higher education is the evolution of harmonization efforts in different regions. The European higher education area and the Latin American higher education area are examples of this process. It was pointed out that the harmonization strategies in Europe are influenced by the Bologna Process. Similar processes were adopted in Africa after several rounds of discussions on Frameworks for harmonization of higher education and resulted in Intra-Africa Academic Programme and launching of Pan-Africa Universities.

The relationship between governance and autonomy in the context of regulation was considered as an important area to be explored. Graded Autonomy is one of the initiatives of good governance in Indian context where the higher education institutions are categorized based on their performance. However, performance and quality of higher education institutions vary depending upon the amount of resources available and how optimally the resources are utilized.

In India, Category I and Category II institutions enjoy better financial position and greater autonomy. However, Category III institutions, to which a majority of institutions belong, are subject to several regulations. Governance depends on institutional architecture in higher education. Higher education system is to be integrated into one system (both technical and professional). India is moving towards a higher education system which is multi-disciplinary and autonomy would be given to the institutions and faculty members in terms of curriculum, pedagogy and assessment. Degree awarding function may be given to autonomous colleges. To promote autonomy more financial support needs to be given, institutions should be led by people of integrity and accountability measures should be in place. The intervention would be towards regulation, funding, accreditation, and maintenance of academic standards. NAAC has to become a mentor accreditation agency and the quality assurance and standard setting would be done by NHEQF. There is a move towards all existing Indian higher education institutions to be accredited by the year 2030. If institutions

are not competent to award degrees then they would be mentored by accreditation agencies.

3.3 Institutional Autonomy and Governance in Higher Education

The higher education sector faces unprecedented governance challenges in the context of massification and diversification of higher education. There is a shift from a collegial model of governance to corporatized model of governance in higher education. A shift from input based to output based funding and notions of performance indicators and accreditation and ranking reflects this transition. In this context, keeping right balance between regulation and autonomy is a major challenge. A multi-state study carried out by CPRHE at NIEPA on the Governance and Management of Higher Education in India demonstrates how governance of higher education can be seen from three vantage points/levels. They are the relationship between the state and the university, relationships between different elements within the university and the relationship between university and its affiliating colleges

The structure of governance in state and central universities varies substantially. State university has two layers of control, both by state and central agencies. Dearth of fund impacts recruitment and promotions of teachers and student admission. Compared to central university where research gets major push, colleges focus on teaching. Central universities are better funded and better performing in the NIRF rankings.

The issue of autonomy cannot be separated from the practice of accountability. It was further elaborated that both university and college follow various measures for ensuring accountability. Student attendance, regularity of teachers, the API scheme and student feedback systems are measures of accountability. However there is no mechanism for checking quality of teaching. IQAC also acts as a measure of accountability.

Whether or not an institution deserves autonomy should be based on the maturity of the institution. Further, the autonomy in the domains of finances and administration can be given only when the institutions develop competencies to self-govern.

3.4 Regulatory Structures in Higher Education

Regulations should be maintained at an arm's length between the institutions and customers (students). Taking into consideration, the new 16 central universities established in 2009, these universities have established with different objective for addressing the issue of equity and access than excellence. These objectives seem to be discounted while measuring performance of the HEIs. Therefore, there is a need to relook at NIRF (ranking) criteria since such institutions are encountering a number of issues in terms of regulations. Though we have diverse institutions, it is interesting to note that we have only one assessment agency to assess the institutions.

The NIRF puts different institutions in a single definition of quality for HEIs in the ranking framework. However, each institution has diverse objectives, uneven resources, and disperses target groups. Relying on a single measure to assess all the institutions becomes a problem. For example, NIRF ranking give high weights to research and publications. The newly established institutions find it difficult to compete with old institutions in this regard. The important questions in the context of regulations are: What is to be regulated? Who should regulate? And how regulation is to be exercised? No doubt, regulation is needed to maintain order; for ethical conformity;

for smooth conduct; to maintain standard and quality; and to promote excellence. The appointment processes, financial procedures student admissions academic administration teaching learning and evaluation processes all need to be internally - regulated. The research can be more easily regulated through an assessment of publications and innovations.

3.5 Leadership and Management of Higher Education Institutions

In the realm of higher education, leadership and management are considered highly contested terms. A vice-chancellor is both an academic leader as well as a CEO of the university who upholds and maintains social responsibility, formal rationality and procedural legitimacy. Leadership and management are the concepts that are grounded in a local context and to better understand these one has to look at how these two function in a given political, social, economic and cultural milieu.

Autonomy is a way of life of an institution, its a continuous negotiation with the outside world. Academic autonomy comes along with accountability toward the academic council, colleagues and mainly students. Academic autonomy also brings the question of academic integrity to the fore. It is through academic autonomy that democratic and civic culture can be brought to higher education. Administration is essentially maintaining

order and ensuring all operations are functioning well. Academic administration emphasizes on collegiality that functions through disruptions. It also finds new directions, revisiting visions and setting new norms for the institution.

The main challenge in front of academic leadership and management is how to ensure quality in higher education. The knowledge and skills are being transferred to under-graduate and graduate students would become obsolete when these students enter employment market. An institution should ensure the relevance of its study programmes and curriculum to equip its graduates for the labour market. The universities have gone through the stages of from being national institutions to being at the mercy of neo-liberal principles to the stage where these are expected to cater to the knowledge society and knowledge economy. This scenario exposes the academic leaders to another challenge i.e. how to contribute to world knowledge society without losing the sight of indigenous knowledge systems. Also, how to enrich the indigenous knowledge systems by bringing the world knowledge system to its threshold.

In the changed scenario, the academic leaders have to envision for the future leaders of academic institutions and that can be done only through offering robust Masters' and Ph.D. programmes that are capable of producing effective and visionary leaders for the higher education institutions as well as for the society at a large. Further, there is a lack of sectoral understanding of the higher education institutions. Academic leaders have to ensure that there is an alignment between home institutions and international processes, access to quality higher education with equity, resource mobilization in light of decrease in public funding, privatization, accreditation, ranking, developing research capacity, and employability are some more challenges. Active politics, i.e. entrenchment of political parties in the educational institutions is another challenge that not only disrupts the academic calendar but politicize the whole academic environment.

The academic leader is a custodian of due processes of an institution and preservation of and fidelity to the core principles of the institution are her/his main role. The academic leaders are now required to come out of their

comfort zone and expand their network. The scarcity of resources is not going to go away and it brings the managerial characteristics to leadership to complement it. The collaboration with the industry is the need of the hour. The university-industry collaboration can ensure research funding, internships for students, consultancy to the faculty members and much more than that.

The academic leadership should be decentralized as decentralized universities perform better than the unitary universities. University campuses have a responsibility to create self-awareness and understanding of the world among students. Today, higher education institutions require more creativity and innovation and that comes with academic freedom, autonomy along with academic integrity and accountability.

3.6 Managing Quality at the Institutional Level

The values of academic freedom and institutional autonomy are the foundation of a sustainable higher education system. The important question in the present day context is how to assert institutional autonomy and promote academic freedom in situations of budgetary pressures, globalisation, technological changes and frequent interventions by the central/state governments. A University needs to negotiate among excessive state intervention, market processes, regulations and autonomy. It has been the experience that strategic leadership and institutional reputation have helped to protect the institution from frequent interventions and lose of autonomy and academic freedom. Institutional reputation can be enhanced and sustained through focus on quality. Quality in Research, teachers and teaching, and in intake of students, help in building and sustaining reputation.

The UK higher education institutions have global reputation for quality, excellence and innovation as reflected in their rankings, citation index, number of Nobel laureates, and training of many global leaders who have studied in the UK. Shared governance with partnership between members, academics and student voice promote commitments to quality. The UK quality code includes student experience, blended learning, personal tutor

scheme, key transferable and future skills, curriculum internationalization with mobility schemes. Quality promoting exercises include-Teaching Excellence Framework (TEF), Research Excellence Framework (REF), student survey, graduate survey, League tables, Research and staff experience, innovation and academic entrepreneurship. Reaching out to new generation of student population is also important for building quality and reputation. There were discussions on how ICT and e-Governance play an important role in improving the performance and quality management in institutions of higher learning. This involves increasing focus on student, faculty research, academic and learning resources, spaces, tech support, start-ups, scholarship. The IT infrastructure reduces the administrative load on faculty and researchers, enhances efficiency in addressing the issues of administrative delays, purchase and process time for procurement, faculty recruitment process and disseminating information regarding rules and guidelines. Thus each and every activity whether academic (teaching, learning, timetable, examination), research, finance and administrative is linked to specific IT based solutions such as databases, Enterprise Resource Planning (ERP), Public Financial Management System (PFMS), websites, online complaint system for grievances, meeting software, industry ready courses through NPTEL, ICT textbooks, basic curricula through UG/PG E-Pathshala, MOOCs, Swayam Prabha portal, database for equipment management, resource mapping through QR/Barcode/Camcode E-Yantra solution for Robotics and so on. Thus, administrative time is reduced through e-governance and faculty, staff and students can focus on the basic work of teaching, learning and research at the institutions.

The Indian agricultural university system has been a politically contested space with patterns of governance, autonomy and accountability debated since 1948. The Radhakrishnan commission report had the longest chapter on rural universities' governance reflecting the proclaimed vision and the debates on the role of higher education and defining quality. Quality was not just about excellence defined in terms of publications and citation but also about transforming agriculture. The focus was on evolving a non-imitative model of governance.

The first agricultural university set up in India was based on partial land grant model following the model of the land grant model of the US. By 1966 the adopted model reflected the strategy of North-South collaboration. This partnership reflected highly homogenized, centralized model of governance. North engaged in fundamental research whilst South did adaptability research. Consequently, there were contestations because of the hegemony of idea of what productivity is. These notions were derived from factory model to farms required experimentation with local biodiversity, soil, water and temperature conditions. The scientific community and the academic became homogenized and the contestation stopped. The question that comes up is how to govern and measure quality for common public good. Though common public good requires shared action but this shared action should be open to contestation.

Indian society is facing socio economic and political changes since liberalization. Traditionally universities were governed on the simple function basis i.e. planning, organizing, controlling and staffing. Now more skills are required to manage diversity in student body and workforce and to avoid exclusion and discrimination in the management of an institution. The diversity needs to be seen as an opportunity and an asset for the institutions. There is need to increase understanding of differences, perceptions and attitudes.

3.7 Effect of Financing on Institutional Governance

The effect of financing on the autonomy and functioning of the institution is primarily the issues related to the ways in which resources are mobilised to run an institution, and the capacity of institutions and their leaders to mobilise resources. Contrary to the general belief, the state funding declined in period of massification of higher education in the developing countries. The developed countries have relied on public higher education institutions and public funding for the massification of higher education. The developing countries relied on private higher education institutions and the private sector to massify their higher education. Another set of discussions relates to resources and the disparities in access to the knowledge produced in different areas. The United States and India both have robust affirmative action programmes to deal with those social group disparities. Some of the universities in the developed world have a high density of international students and they contribute a good share of resources in some of the institutions of higher education. The pace of massification in the last two decades has been dramatic and it poses questions related to paucity of resources. The massification is also the result of undue prioritization on expansion of the system at times at the cost of quality of the education provided and limited employment of the graduates. The public funding priority too has changed. As the economy grows, a significant shift in the priorities of the State from investing in social sectors to increased spending on infrastructure. In higher education, the state funding declined and the private sector became more active in the sector. The move towards market from the 1990s is reflected in terms of the approach towards globalisation, privatisation and liberalisation of the economic sectors and social sectors. The idea of new managerialism incorporated the elements of neo-institutionalism and neo-liberalism and has put pressure on the public policy and state funding of higher education institutions. The cost of higher education has increased and the per student expenditure has increased considerably. Therefore, there is an argument to fund students rather than institutions. This will be a move away from the present pattern of funding of institutions.

Triple-A framework (3As) denoting financial adequacy, autonomy and accountability is affecting institutional governance.

Alleviating these problems may require making provisions for the needs-based grants and developing a mechanism to deal with the recurring expenses. At the same time, institutions may be allowed to exercise their autonomy in mobilizing resources and a reallocation of resources available at the institutional level. Further, the emphasis is also shifting towards efficient utilization of allocated resources and proper targeting of the institutional funds to prioritized activities and groups of students.

The new initiatives such as of graded autonomy scheme and identification of Institutions of Eminence (IoE) may help these categories of institutions mobilizing adequate funds outside the purview of the public sources of funding.

3.8 Reflections and Observations

The focus of the deliberations in the seminar was on how autonomy and governance are closely linked to public policy and state interventions. The higher education institutions are in constant negotiations with the Ministries and public authorities for more funding and higher allocations. Governance becomes effective when decisions are taken at the institutional level and these decisions are translated into operational practices through the administrative procedures with well established accountability measures. Good governance in the public institutions implies how public institutions conduct their affairs and manage public resources.

Given the dual funding models of higher education in many countries including India where state funding and private financing models co-exist side by side, the issue of governance is really hard to de-couple from the question of institutional autonomy in decision making. Universities fundamentally know the areas where they feel the exercise of autonomy will most impact the core function of the institution, namely, student admissions, recruitment of teachers, design and development of courses that are offered in the university, student assessment, and research activities.

In the context of rapid expansion of higher education system, one of the major considerations institutions and government are looking at during this phase is to look at how universities grow whilst being able to maintain a system of management and governance. The New Education policy 2020 strongly signals to the significant changes that India intends to implement. The new policy aims to combine autonomy with good governance as a driver for India to establish more universities that are recognized as world class. It is really important that the regulatory reform is designed to support this objective. These are challenges that are not exclusive to universities in India.

The continuing influence of market principles in higher education has been producing conflicts between allocation of resources by the State and the actual needs of the sector. As a result, due to competitive pressures, institutions are compelled to generate additional resources. Moreover at the institutional level leadership and management are the concepts that are grounded in a local context and to better understand these one has to look at how these two functions in a given political, social, economic and cultural milieu. The governance structure of higher education institutions across the country has been influenced by global models dominated by new funding mechanisms and quality assurance frameworks. This shift is accompanied by the spread of a new commercial model in higher education and research.

A global shift in decision-making process in higher education is from 'government to governance' at the institutional level involving multiplicity of actors. Further, the influence of 'managerialism' in operation of institutions is becoming more and more evident. Thus it is important to have a clear understanding about the key actors and factors that influence functioning of an institution of higher education in the context of market mediated production in the knowledge economy. At times the reform measures result in greater centralization of control even when the reform is for granting more autonomy. However, the essence of recent reforms in higher education in India is in favour of the creation of a layered higher education system which permits greater autonomy to better performing institutions.

Appendix 1

Detailed Programme

International Seminar on Governance and Autonomy in Higher Education

Day 1: Thursday, 20 February (Venue: Jacaranda Hall)

9:00	Registration
9:30 - 11:15	Inaugural Session Chairperson: Professor N.V. Varghese, <i>Vice Chancellor, NIEPA, India</i> Welcome Address: Professor N.V. Varghese, <i>Vice Chancellor, NIEPA, India</i> Opening Remarks: Mr. Tom Birtwistle, <i>Director, North India British Council, India</i> Keynote address: Professor Dan Wagner, <i>UNESCO Chair in Learning and Literacy, University of Pennsylvania, U.S.A.</i> Programme Highlights and Vote of thanks: Dr. Garima Malik, <i>Assistant Professor, CPRHE/ NIEPA, New Delhi, India</i> Rapporteur: Dr. Nidhi S. Sabharwal, CPRHE/NIEPA, India
11:15 – 11:30	Coffee and Networking (Venue: Pre-function Area)
11:30 - 13:00	Session 1: State, Market and Governance of Higher Education Chairperson: M. Anandakrishnan, <i>Former Chairman, IIT Kanpur, India</i>
11:30 – 11:45	Keynote address: Damtew Teferra, <i>University of Kwazulu-Natal, South Africa</i>

11:45 - 12:30	Speakers 1. Rajan Gurukkal, The Kerala State Higher Education Council, India 2. Mohd. Muzammil, Formerly Vice Chancellor, Dr. B.R. Ambedkar University, India 3. Kumar Suresh, Department of Educational Administration, NIEPA, India 4. G.D. Sharma, Society for Education and Economic Development, India
12:30 - 13:00	Open for Discussion Rapporteur: Eldho Mathews, Unit for International Cooperation, NIEPA, India
13:00 - 14:00	Lunch (Venue: Pre-function Area)
14:00 - 15:30	Session 2: Global Trends in University Governance Chairperson: Kavita Sharma, <i>Former President</i> , South Asian University, India
14:00 - 14:15	Keynote Address: Michaela Martin, UNESCO-IIEP, France
14:15 - 15:00	Speakers 1. Sudhanshu Bhushan, Department of Higher and Professional Education, NIEPA, India 2. Abebaw Yirga Adamu, Addis Ababa University, Ethiopia 3. Saumen Chattopadhyay, Jawaharlal Nehru University, India 4. K. Ramachandran, NIEPA, India Discussant: S. Srinivasa Rao, Jawaharlal Nehru University, India
15:00 - 15:30	Open for Discussion Rapporteur: Jinusha Panigrahi, CPRHE/NIEPA, India

15:30 - 15:45	Coffee and Networking (Venue: Pre-function Area)
15:45 - 17:15	Session 3: Institutional Autonomy and Governance in Higher Education Chairperson: J. Veeraraghavan, <i>Former Secretary, MHRD, India</i>

HANSRAJ COLLEGE, UNIVERSITY OF DELHI 110007

Ref No. : HRC/MHRFDC/2021/9

Date: 24th February, 2021

Dear Dr. Arpita Koul,
Department of Commerce,
Sri Venkateswara College,
University of Delhi

Mahatma Hansraj Faculty Development Centre, Hansraj College would like to thank you for your contribution in One Week (Online) Faculty Development Programme on **"Online Teaching Tools"** during **16th February – 22nd February, 2021** organised in collaboration with PARAMARSH, UGC SCHEME. Your sessions on **"Video Recording/Editing and Channel Maintenance for e-Content and Live Teaching" & "White board teaching Tools"** on **18th February, 2021** were extremely relevant and interesting for the participants. It was an honour for us to have you as a resource person for this programme.

We believe that the knowledge you have shared would immensely help the participants in their academic endeavours.

We know your time is precious and we are grateful that you shared some of it with us.

Looking forward to your contribution in our future programmes.

Thank You.

Ref No. : HRC/MHRFDC/2020/36

Date: 12th October, 2020

Dear Dr. Arpita Kaul,

Mahatma Hansraj Faculty Development Centre, Hansraj College would like to thank you for taking part in a two week online Faculty Development Programme on **“Transformation in Higher Education: Issues and Road Ahead”** during **28th September- 12th October, 2020** organised in collaboration with Government Degree College for Women, Anantnag. Your sessions on **Virtual Classroom using Google**, 7th - 8th October, 2020 were extremely relevant and interesting for the participants. It was an honour for us to have you as a resource person for this programme.

We believe that the knowledge you have shared would immensely help the participants in their academic endeavours.

We know your time is precious and we are grateful that you shared some of it with us.

Looking forward to your participation in our future events.

Thank You.

Regards

NATIONAL APEX CHAMBER

Faculty Development Program (FDP) on Consulting Skills

Saturday, 6th March 2021

Certificate of Participation

This certificate is awarded to

Swarn Singh

**for participating in Faculty Development Program (FDP)
on Consulting Skills on 6th March 2021**

The conference was organized by the Education Committee of PHD Chamber of Commerce and Industry, New Delhi in its endeavour to promote skilful learning experience to the learners from various fields to prepare them for taking on consulting projects with the industry.

PHD Chamber of Commerce and Industry, established in 1905, is a proactive National Apex Chamber working at the grass root level and with strong national and international linkages. PHD Chamber, through its research-based policy advocacy role, positively impacts the economic growth and development of the nation.

It is one of the Premier Chambers in India to have been accredited with "Diamond Grade" by NABET (QCI), at national and international level.
