CRITERIA 7

SUPPORTING DOCUMENT

7.2.1 Describe two best practices successfully implemented by the Institution as per NAAC format provided in the Manual

II. Fostering Environmental Consciousness: Campus and Beyond

Best practice Proofs: Fostering Environmental Consciousness: Campus and Beyond

At Sri Venkateswara College we have a lot of green spaces, which has a lot of urban biodiversity as it's close to the Central Ridge Forest and it also generates a lot of green waste. The greenery of the campus is a boon for students as it helps them understand and participate in monitoring the biodiversity of the campus. The green waste generated is also utilized for vermicomposting and organic fertilizer generated is utilized for fertilizing lawns and gardens of the college campus. Various other eco friendly activities are also initiated in the campus such as waste segregation, use of solar energy, e-waste collection drives.

Sri Venkateswara College is also known for its off campus awareness initiatives with its flagship program the "Green School Initiative" where faculties and students of the college have been visiting various schools of Delhi- NCR for spreading environmental awareness among young school students. The college also organizes field visits for all the students enrolled in the college to practically understand and become aware about the environmental issues.

The Practice

On campus Environmental Initiatives:

(i) In-house Vermicomposting facility:

Vermicomposting Unit: In order to make college a green space and reduce the amount of waste produced an initiative was taken to establish vermicomposting in college by Eco-Club SVC. A well-established vermicompost pit is fully functional in college. The pit is maintained by staff and student volunteers of Eco-club. A hands-on training was given to 20 students for the same. A team of 30 volunteers presently are working efficiently by ensuring proper moisture content in the litter, managing the pit and taking care of the worms. Till now about 120kgs of compost has been prepared and we are hopeful of increasing it further.

- (ii) **Campus Bird Monitoring:** The college students/faculty have been actively involved in monitoring the avian diversity of the campus:

Booklet

http://svc.ac.in/SVC_MAIN/Societies/EcoClub/Birds/RS_Bird%20booklet%20Venky_2021_47%20species_v2019.pdf

Activity Sheet

http://svc.ac.in/SVC_MAIN/Societies/EcoClub/2020-21/SVC%202020%2021%20EVS%20RS%202.pdf

- (iii) **Survey and Conservation of Butterfly and Dragonfly of college campus:**

The survey is regularly conducted by Eco-Club in association with experts from Asola Bhatti Wildlife Sanctuary. Butterflies and Dragonflies are indicator species, and are also provide several ecosystem services. In order to create awareness among students about the rich biodiversity in the campus, and to sensitize them towards the relevance of its conservation, campus survey was conducted to record the numerical strength and diversity of Butterfly and Dragonfly populations in the campus. Also, whenever needed the animals such as snakes are rescued in the campus.

Leaf composter in the campus:

Ban on single use plastics

- (ix) **Rain Water Harvesting:** The college is the process of installing the rain water harvesting system.

DELHI JAL BOARD: GOVT. OF NCT OF DELHI
OFFICE OF THE EXECUTIVE ENGINEER (RWH/GWC)-I
ROOM NO. 208, VARUNALAYA PHASE-I
KAROL BAGH, NEW DELHI - 110005
23558264

No./DJB/EE (RWH/GWC)-I/2021/ 1209

DATED: 04/8/2021

To,
Principal,
Prof. C. Sheela Reddy,
Sri Venkateswara College,
Benito Juarez Road,
Dhaura Kuan, New Delhi-110021

Subject: Design of rain water harvesting structure at Sri Venkateswara College, Benito Juarez Road, Dhaura Kuan, New Delhi-110021.

Sir,

Please refer to your application on the above subject. A drawing of rain water harvesting structure for the premises including conditions and layout drawing showing location of RWH structure are enclosed. It is to mention that design of rain water harvesting structure is based on the inputs provided by yourself/your representative.

The enclosed design is in form of technical assistance only. Proposed Eight Nos. RWH structure **without bore** of sizes mentioned in the sheet of RWH structure drawing attached herewith. Rain water conveyance system (storm water drain) should be provided and connected with RWH Structure in the above premises.

This is subject to the condition that in case of any restrictions on construction activities in the said premises by any other government authorities and court orders, then this design/approval deemed to stand cancelled. The storm water conveyance system shall be provided in place and made fully operational for efficiency of proposed RWH Structure.

EE (RWH/GWC)-I
EE (RWH/GWC)
DELHI JAL BOARD
VARUNALAYA BHAWAN
JHANDEWALAN, N.D.-5

**Conditions for Construction at Sri Venkateswara College, Benito Juarez
Road, Dhaula Kuan, New Delhi-110021.**

1	Total area of the Plot	60700.50 sqm.
2.	Total Roof Top area considered for RWH Systems	8631.09 sqm.
3	off available -Average Yearly Rain Water Run for recharge	650 mm
4	Maximum average hourly rainfall intensity considered for designing rain water harvesting structures	25 mm
5	Proposed Recharge Structures (drawing enclosed)	Eight nos. recharge pit without recharge bore well.

1. This office should be intimated immediately after completion of the recharge system for inspection by officials of RWH cell of DJB.
2. Structural design for chamber walls & top slab is to be got done from a qualified structural engineer. No claims shall be tenable on account of this.
3. Depth of the recharge trenches/chambers is below the Invert Levels of inlet pipes and up to the first layer of filter media. Sizes in respect of lengths and breadths given in design are the inner dimensions of recharge trenches/ chambers. Foot rests in filtration chamber are to be provided to facilitate entry of maintenance person in this chamber. In case of any doubt, the office of EE (RWH) Cell, DJB may be contacted.
4. Waste water/contaminated water shall not be allowed to enter into the storm water drains (rain water conveyance system) and recharge structures to avoid contamination of ground water. Proper care & precaution shall be taken for maintaining the rain water harvesting system on regular basis.
 - a. Check and clean catchments on weekly basis.
 - b. Check and clean rain water conveyance system on monthly basis.
 - c. Check and clean filtration chamber prior to and after monsoon every year. Take out filter media, wash it and reuse with additional quantities for the deficient portions.

These are to be checked on fortnightly basis during monsoon and are to be cleaned.

5. It is advised to provide a mesh on the mouth of the inlet (in the last chamber of the rain water conveyance system prior to recharge structures) to prevent entry of debris and floating material into the recharge trenches. Sluice valves/ Shutters may be provided to ensure that no water other than rain water is diverted to the recharge structures and to divert first rain water run-off into municipal drain. Rain water recharge structures are to be in operation during the monsoon season only so as to avoid any contamination.

**EE (RWH) GWC)
DELHI JAL BOARD
VARUNALAYA BHAWAN
JHANDEWALAN, N.D.-5**

[Signature]

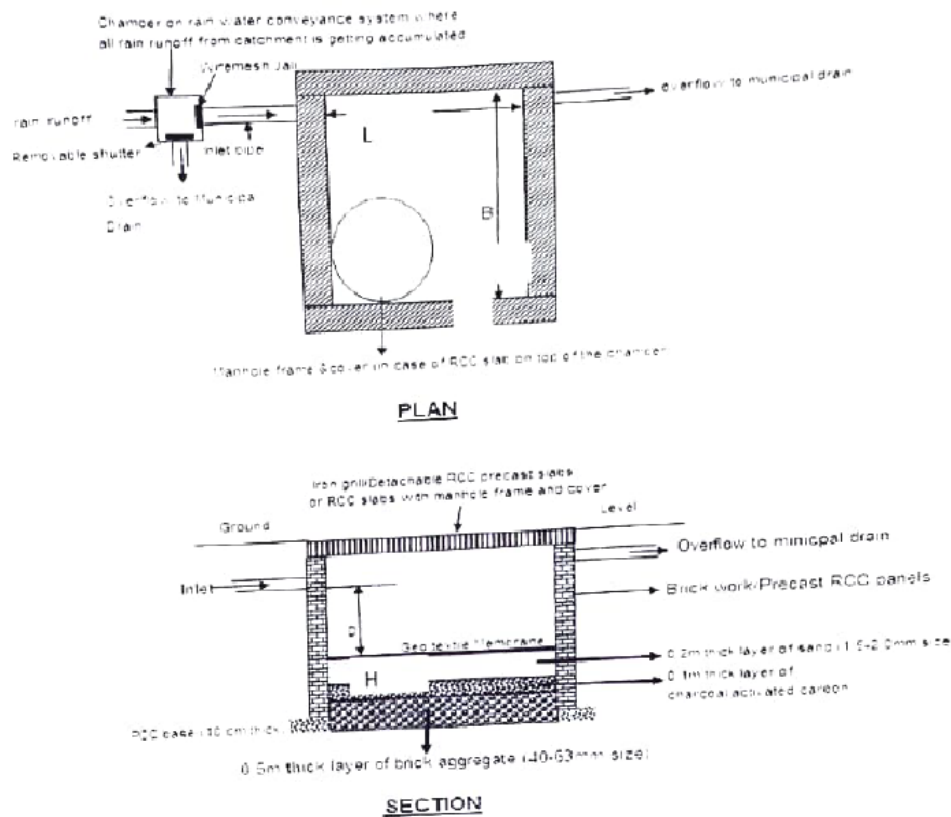

6. The work may be undertaken by the specialized agencies so that the objective of rain water harvesting is implemented in true spirits and due benefits are accrued.
7. It is to be noted that success and effectiveness of rain water harvesting system depend on proper execution and its proper maintenance.
8. Following measures as stipulated by Hon'ble Supreme Court must also be ensured to prevent any accident:
 - a. Erection of signboard & caution board at the time of construction and on the above installations.
 - b. Erection of barbed wire fencing or suitable barriers around the above sites.
 - c. The display Board (in Hindi) with Dos & Don'ts must be erected on each crucial installation.
9. Capacities for recharge structures are based on rain water runoff from roof areas. However citizens are encouraged to make recharge structures of additional capacities that take runoff from other non polluting catchments.
10. Minimum and maximum depths of recharge structures may not be less than 1.0m and may not be more than 4.0m respectively.
11. Recharge structures shall be cleaned before onset of monsoon season every year including removal, washing and relaying with topping of filter media layers, if provided.
12. It is advisable to clean the recharge structures after every 2 rainfalls during the rainy season or more frequently. Recharge structures shall be checked and cleaned at least 7 days interval or more frequently during rainy season.
13. Post monsoon cleaning and maintenance of recharge chambers shall be carried out. It is again to emphasize that proper & timely maintenance is the key factor for the success of Artificial Recharge structures. Citizens are required not just to make the RWH structures but also to maintain them such that they are efficiently able to function during the monsoons. Following annual maintenance activities shall also need to be done in this regard.
 - a. Cleaning of filter media by thoroughly washing it with water/topping/replacement of filter media.
 - b. Repair for structural damages & system efficiency.
 - c. Repair / design modifications / diversions to ensure that no contaminated water enters the structures and not to allow any changes in catchment that may prevent Rain Water runoff from reaching the recharge chambers.

 AE(RWH)-1

RWH Structure at Sri Venkateswara College, Benito Juarez Road, Dhaula Kuan, New Delhi-110021.

Fig. 1 Rectangular Recharge Chamber for RWH

- Size of RWH Structure:-**
- (1) $L = 12.0 \times B = 3.50 \times D = 1.25 \text{ m}$ (Only one No. RWH structure)
 - (2) $L = 14.0 \times B = 4.0 \times D = 1.25 \text{ m}$ (Only one No. RWH structure)
 - (3) $L = 3.0 \times B = 3.0 \times D = 1.25 \text{ m}$ (Only one No. RWH structure)
 - (4) $L = 4.0 \times B = 3.0 \times D = 1.25 \text{ m}$ (Only two Nos. RWH structures)
 - (5) $L = 2.0 \times B = 2.0 \times D = 1.25 \text{ m}$ (Only three Nos. RWH structure)

Note: For working out the storage/retention capacities, depths are to be considered below the invert level of the lowest inlets to the recharge chambers/trenches. Alternative to suggested filter media may be multiple layers of jute mats in recharge chambers / modular filters in rain water pipes from rooftops with the objective to arrest the silt in the rain runoff generated from the catchments before its percolation into the natural soil strata. No waste water is allowed to be entered into Recharge Structures. For more details, please contact to the office of EE (RWH/GWC), Delhi Jal Board, Room No. 11, Varunalaya Phase-I, Karol Bagh, New Delhi-110005, Tel No. 011-23558264.

New Delhi – 110022

Subject: Request for technical expertise for Rain Water Harvesting for groundwater recharge

Dear Sir,

As you are aware, Sri Venkateswara College, University of Delhi, is known not just for its academics, sports and cultural vibrancy, but also for being environmentally conscious.

According to the report by your CGWB, groundwater level is declining by 0.5 to 2 metres annually in most parts of Delhi. Therefore, Sri Venkateswara College has been aiming to install Rainwater Harvesting (RWH) in our college for groundwater recharge.

I would highly appreciate it if you could kindly provide us with your technical expertise and guide us through various steps for installing RWH structures in our college. This will help us to fulfil our responsibility to recharge groundwater and contribute to increasing the water table in the area.

Please feel free to contact me (principal@svc.ac.in) or Dr. Vartika Mathur (vmathur@svc.ac.in; +91 9810386575), who is taking care of this initiative, for any queries or communication.

Looking forward to your favourable reply.

28.09.2019

The Dy. Commissioner of Police
South West District
Basant Lok, Vasant Vihar
New Delhi - 110 070

Sub: Sri Venkateswara College, New Delhi - Water Harvesting Structures in the campus - permission - reg.

Dear Sir,

I am pleased to inform you that the college has accorded necessary approvals from the management for a provision of water harvesting structures (3 nos.) in the college.

The work of "Construction of Rain Water Harvesting Structures in S.V. College: has been awarded to M/s Chaudhary Builders, Khasra No.299, Village Gokul Pur, Wazirabad Road, Shahdara, Delhi - 110 094 and the work will be supervised by the Tirumala Tirupati Devasthanams' Engineering Department stationed in the college campus.

I have been requested by the contractor and T.T.D. Engineering Department to obtain necessary approvals from your department for construction of Rain Water Harvesting Structures and other related works.

In the light of the above, I request you to kindly accord your approval for the Construction of Rain Water Harvesting Structures in S.V. College as the construction of Rain Water Harvesting Structures is a mandatory requirement as per NGT Guidelines for educational institutions.

Thanking you,

Yours sincerely
