

The most important vertical in an educational institution is teaching and learning. Every year students from diverse backgrounds come to college to fulfill their aspirations. Faculty members are sensitive towards their cognitive, intellectual and professional orientation and efforts are made such that their potential is optimized and they excel in academic and co-curricular endeavors. The college has an in-house internship program Sri-Vipra designed to inculcate problem solving and project- based learning in students. Value added experiments and Students' projects conducted under the DBT STAR college scheme also inculcated research aptitude in students. The college also organizes FDPs regularly to train teachers.

- **Experiential learning:** In order to give hands-on experience to students, field visits and educational trips are conducted.

Field visits conducted under:

DBT	STAR	College	Scheme:
