Proceedings:

Dr. Sudip Sen graced us with his presence on 15 February 2024 to deliver a talk on the topic “Stem cells: Life Beyond regenerative medicine” as part of the Bachhawat Lecture series. His talk focused on the application of stem cells in medicine and disease models. He talked of the importance of stem cells as potent agents in treatment of cerebral palsy, studied through disease models, and understanding their efficacy. He also shared his work wherein he had been working on studying the efficacy of the drug *symphytum officinale*, in understanding its role in bone remodelling and understanding its role in alleviating, bone fractures through mouse models. His talk was both informative and thought provoking, and implored students to think beyond books and be acquitted with the recent research happening around. It enabled the students to understand the role of stem cells in

alleviating diseases and be acquitted with the latest technologies and techniques, in a lucid manner.
